Flying Saucer Report

KB/CIC/52-44

At approximately 0438 hours on 17 September 1952, Cpl Harold M. Blair, RA 15 425 378, Military Police Company, 8456th AAU, Killeen Base, Killeen, Texas observed a flying saucer type object fly over post 33 where he was sentry on duty.

Blair gave the following information during an interview with the undersigned: Daylight had not started to break as yet, and Blair was looking skyward observing the stars when he saw an object at approximately 1000 feet altitude fly directly over his head. The object was described as about 10' across, and had a green fluorescent appearance across the front, and two (2) six foot red flames protruding from the rear. The object was observed for approximately 2 to 3 seconds at an estimated speed of 700 to 800 miles per hour. Approximately 2 seconds after sight, a peculiar sound, something like a model airplane engine, was heard. The object was traveling from Southwest to Northeast.

Blair has had no experience as an aircraft observer, or no experience in astronomy.

This drawing is a reproduction of the sketch made by Blair.

PHILIP BADER, 901st CIC Det.
