AIR INTELLIGENCE INFORMATION REPORT			
SUBJECT FLYOBRT			
AREA REPORTED ON Elberton, Alabama		FROM (Agency) 44DI, 806TH AIR DIVISION	
DATE OF REPORT 30 October 1952	DATE OF INFORMATION 24 October 1952	EVALUATION B-2	
PREPARED BY (Officer) Lt Col Theodore I. Pascoe, 3363A		SOURCE Personal interview with observer	
REFERENCES (Control number, direction, previous report, etc., as applicable) AFL 200-5, 29 Apr 52, A-4939-RP, msg 44DI 306ADIV 7700 30 Oct 52, and Ltr Hq USAF AFOIN-C/CC-2, 19 Dec 51			

SUMMARY: (Enter concise summary of report. Give significance in final one-sentence paragraph. List inclosures at lower left. Begin text of report on AF Form 112-Part II.)

At 2026 hours CST on 24 October 1952, an unidentified flying object was sighted by 1st Lt Edward J. Rau, AO-1912291, 52d Bomb Squadron, 68th Bomb Wing (M), Lake Charles Air Force Base, Lake Charles, Louisiana. 1st Lt Rau was acting as Observer on a T-11 type aircraft flying at a speed of 165 miles per hour at an altitude of 7500 feet, and a true heading of 75 degrees.

Object appeared in a position 10 to 15 degrees above horizontal plane of the aircraft, moving at a terrific speed much faster than that of an F-80, in a direction approximately 15 degrees away from the axis perpendicular to the heading of the aircraft, and disappeared at approximately 20 degrees above the horizontal plane of the aircraft. Object resembled a plate standing on end, moving in the direction of the concave surface of the object. (See Incl #1). The line of flight was very straight with a constant state of acceleration, i.e., no "floating", as in the flight of conventional aircraft.

AIR INTELLIGENCE INFORMATION REPORT

FROM (Agency)	REPORT NO.	PAGE	OF	PAGES
44DI, 806TH AIR DIVISION	IR-166-52	2	3	

- Brief description of the object:
 - Shape: Back part oval; appeared to be stretched out. Resembled plate standing on end, and moving in direction of concave side.
 - Size: Much larger than star when viewing star from ground, and smaller than the moon.
 - Color: Deeper orange than parachute flare when observed from 10 miles. Very brilliant. Not, repeat not, like hazy ball of light such as is seen when viewing tail of airborne jet aircraft.
 - Number: One (1).
 - Formation, if more than one: Not applicable.
 - Aerodynamic features: No floating characteristics. Object maintained constant state of acceleration.
 - Trail or exhaust: Appeared to have a tail, such as a comet.
 - Propulsion system: None apparent.
 - Speed: Unable to determine because of inability to properly assess distance. Traveled extremely fast, much faster than F-80 when viewed from ground.
 - Sound: None.
 - Maneuvers: None.
 - Manner of disappearance: Disappeared into distance as a streak of light.
 - Other pertinent or unusual features: Object maintained absolutely straight line of flight, and a constant climb of approximately 5 degrees.
- Time of sighting in 24-hour clock zonal time: 2026 hours CST.
 - Length of time observed: Approximately 5 seconds.
- Manner of observation:
 - Visual or electronic: Visual.
 - From air or surface: Air.
 - Speed: 165 MPH.
 - Altitude: 7500 feet.
 - Type of aircraft: T-11.
- Location of observer during sighting: 82 42W-34 6N.
 - Location of object with respect to observer:
 - Distance: Thought to be quite near because of rapid transit through cone of vision.
 - Direction: Approximately 15 degrees away from axis perpendicular to heading of aircraft.
 - Altitude: 10 to 15 degrees above horizontal plane when object came into view, and disappeared at approximately 20 degrees above horizontal plane.
- Identifying information of observer(s) and witness(es):
 - Observer: 1st Lt Edward J. Rau, AO-1912291, 52d Bomb Sq, 68th Bomb Wing (M). Subject officer holds AFSC 1534 (Navigator) and has held this AFSC for 20 months. He has approximately 700 hours flying time, over 50% of which is night time. His combat experience over Korea totals approximately 250 hours, all of which is night time. 1st Lt Rau states he has made frequent air-to-air observations of jet aircraft, and asserts he has never seen anything resembling this object. Report evaluated at B-2.
 - Witness: Captain Steve A. Marcinko, 16112A, 806th Operations Sq, 806th Air Base Group.
- Weather and winds aloft conditions at time and place of sightings: Visibility CAVI at 7500 feet; smoke haze up to 7000 feet. Visibility in haze 3 miles. Wind not over eight (8) knots. Moon was out of line of sight. Cockpit lights were all out.
- Any activity or condition, meteorological or otherwise, which might account for the sighting: None.
- Existence of any physical evidence such as fragments, photographs and the like, of sighting: None.
- Interception or identification action taken: None.

The Unidentified Object

We were flying at 7500 ft. at an airspeed of 165 M/P/H and heading of 075 degrees in a T-11 at 2026 CST on 24 Oct. 1952. The subject Object appeared into my cone of vision from the left slightly above the horizontal plane and passed out of sight to the right passing approximately perpendicular to the course line of the aircraft. It was larger than a star and had a deeper color, bordering an orange. It had a high degree of brilliance. A trail appeared behind the object believed to be an illusion caused by terrific speed. A definite shape could not be determined. The line of flight was very straight with a constant state of acceleration and an approximate angle of attack of 5 Degrees
