Between 8 12 & 8 20 PM -

About 100 miles to the east @ 15° elev. - proceeded across the zenith in a southwest by west - almost west. Thought it was a high flying aircraft but there was no sound and the lights were too bright. Almost as bright as Jupiter - but orange color. As he faced it the light on left went off and on twice during a period of about 8 seconds. Became very dim but not completely out.

You took your away for a moment & when you glanced back it was gone. You carefully examined the sky - the light did not reappear - however at this time you heard a sound like a drone - did not resemble jet or reciprocating engine - sounded more like 6 or 8 engines together.

~~Reported this after school - at University - you mentioned this phenomenon to your mother who in turn mentioned that you~~

After classes, at home, your mother mentioned that your brother had a saucer. Then you checked with him - compared notes - carefully - and saw the same thing. Then you called DTIC -

leaving house - walking towards car - facing east -
Saw Orange star - bigger than Jupiter -
Was moving in a Westerly direction.

Turned car around to face East - sat & watched for
five minutes.

Turned car & faced south - opened window - heard
a sound like a drone - or more than one airplane -
no resemblance to sound of jet nor conventional type motor.

when the lights reached their apex they disappeared.

In movement from east to apex at intervals the
left light would blink on & off and the right light
remained on at all times.

They were too close to gether to be wing tips of an
airplane. If the plane was really high the lights would
not be as big and bright as they appeared.

Total time better than five minutes -

This person was looking towards Jupiter as he does frequently. Saw another light - orange tint - coming towards him 75° Bearing - as it approached it appeared like two light. Went into house and fetched a home-made telescope. Definitely saw two light - could not tell whether they were joined or not. Light turned towards North & then only one light was visible.

While conversing over phone he saw light again - this time through window - came towards him & then blinked out.

At 20:13, still talking at phone, the light appeared again about 5' higher than previously. Size - about twice size of Jupiter. Slowly moved West - could definitely see two light. As they moved overhead one light stayed on and the other was flashing. Had some sound to it - heading West and disappeared beyond words towards Dayton. -
Time 20:20: This last sighting took place while talking at telephone to me - he left phone and went out for better sighting for a couple of minutes - heard the slight sound and saw the flashing light.
