APL 200-5 MEMORANDUM

The observers first saw the object at 1900 hours on 10 July 1953. It was spotted approaching Forrest City, Arkansas at a very high altitude from the northwest. The observers were standing in front of the City Police Station in Forrest City. The object appeared to be moving very slow and in a straight line toward the southeast. It was a very bright silver color and looked like somekind of large light. It gave off no sound and there was no evidence of exhaust. It was visible for approximately forty-five (45) minutes then faded out of sight toward the southeast. The observers estimated the object to be about one and a half feet in diameter although it looked no larger than a dime from that distance. The observers were unable to judge the distance or the altitude. It appeared to be very high and at times seemed to be motionless.

The sky was clear and the wind was very low blowing from the northwest that evening in Forrest City.

No weather stations or airports are located in the Forrest City area.

Contact was made with a crop-duster pilot at Brinkley, Arkansas twenty-five (25) miles west-southwest of Forrest City. He has seen several weather balloons drifting around in the area in the last month and believes that the aerial object was one of these balloons.

REMARKS BY PREPARED OFFICER:

The significance of this report is to supply the Air Force with information which will help in solving the "Flying Saucer" cases.

- 18 - Very probably a meteor. Sending questionnaire. Ask your confirmation.
- 13 - Sending two questionnaires on this one since aerial and ground observation combined. Again this sounds like a ~~fast~~ ^{slow} meteor.
- 11 - Possibility here of upper air research balloon although our tracks on Moby Dick balloons show none in Arkansas for this date.

UAR activity starting from Carolina, area, however. Sending questionnaires to various observers involved. Time is wrong (0015Z) for local balloon release. Carrying this as unsolved.

Dear Dr. Hynck:

It has been sometime since we have received any comments on the sightings and are anxious to see your opinion on same. When do you expect to leave for your summer vacation? I am clearing base on 31 July but will hope to see you or at least call you before I leave. Am going to Washington on Wednesday and Thursday this week on Press Release and new AF regulation for this Project and to tie up my projects in general.

Capt Ruppelt is due back today and am anxious to see him, and as I think I have told you, he will be part-timing this project until my replacement arrives.

Best regards,

Bob Olsson

27 July 1953

Dear Capt. Ruppelt and Lt. Olsson;

Greetings, Captain, and glad to have you aboard again. (Pardon the Navy expression.) Here are my comments on the last few items that were sent to us. Of the three cases, one was clearly a fireball and can be dismissed. The other two cases are definitely more puzzling, particularly the Forest City, Arkansas of July 11. The questions we should like to have answered on this are stated on our regular Form "Eye." Little can be judged about it until we have this additional information.

The Shaw AFB one may have been a fireball but certainly an unusual one if it went into the overcast. Fireballs have been known to break out of the overcast, but it would be most unusual for one to come through the overcast, sail along for awhile, then back into the overcast. Therefore this case should be followed up. Again, the information we would like is on our Form Eye.

I shall be in New Mexico on Tuesday, Wednesday, and Thursday (28,29,30) and will take the trusty camera along just hoping; the following week I go to Ann Arbor and Boston. Then as Lt. Olsson has probably told you, I shall be in Europe all of September. I shall be on the watchout for phenomena over there. Lest you be fearful, this trip is not being charged to the Project! Though if some legitimate occasion arises to track something down, I shall of course do so. I certainly hope to see you at least once before I leave.

Cordially,

Allen Hynek

Allen Hynek

P.S. I'll look forward to seeing you again, Ed. If you can manage to get enough free time to visit us, I'm sure the data we have so far would be of much interest to you. Your first report will really be a thick one. We already have 150 pages of very interesting data. The sophisticated types of analyses are now in progress. Come to Columbus & observe us in action with the ^{IBM} machines — they are really amazing.

16. Tell in a few words the following things about the object.

a. Sound none

b. Color Silver

17. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

18. The edges of the object were:

- (Circle One):
- a. Fuzzy or blurred
 - ☒ b. Like a bright star
 - c. Sharply outlined
 - d. Don't remember

e. Other _____

19. IF there was MORE THAN ONE object, then how many were there? _____.
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

20. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

21. IF POSSIBLE, try to guess or estimate what the real size of the object was in its longest dimension.
_____ feet.

22. How large did the object or objects appear as compared with one of the following objects held in the hand and at about arm's length?

(Circle One):

- a. Head of a pin
- b. Pea
- c. Dime
- d. Nickel
- e. Quarter
- f. Half dollar

- g. Silver dollar
- h. Baseball
- i. Grapefruit
- ☒ j. Basketball
- k. Other _____

- 22.1 (Circle One of the following to indicate how certain you are of your answer to Question 22.

- a. Certain
- ☒ b. Fairly certain

- c. Not very sure
- d. Uncertain

23. How did the object or objects disappear from view?

*It just disappeared
for one can't see it.*

24. In order that you can give as clear a picture as possible of what you saw, we would like for you to imagine that you could construct the object that you saw. Of what type material would you make it? How large would it be, and what shape would it have? Describe in your own words a common object or objects which when placed up in the sky would give the same appearance as the object which you saw.

25. Where were you located when you saw the object?
(Circle One):

- a. Inside a building
- b. In a car
- ☒ c. Outdoors
- d. In an airplane
- e. At sea
- f. Other _____

26. Were you (Circle One)

- a. In the business section of a city?
- ☒ b. In the residential section of a city?
- c. In open countryside?
- d. Flying near an airfield?
- e. Flying over a city?
- f. Flying over open country?
- g. Other _____

27. What were you doing at the time you saw the object, and how did you happen to notice it?

*My dog [redacted] was
playing in the yard on the ground
[redacted] saw it, and called me*

28. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

28.1 What direction were you moving? (Circle One)

- | | | | |
|--------------|--------------|--------------|--------------|
| a. North | c. East | e. South | g. West |
| b. Northeast | d. Southeast | f. Southwest | h. Northwest |

28.2 How fast were you moving? _____ miles per hour.

28.3 Did you stop at any time while you were looking at the object?

(Circle One) Yes No

29. What direction were you looking when you first saw the object? (Circle One)

- | | | | |
|---|--------------|--------------|--------------|
| ☒ a. North | c. East | e. South | g. West |
| b. Northeast | d. Southeast | f. Southwest | h. Northwest |

30. What direction were you looking when you last saw the object? (Circle One)

- | | | | |
|--------------|--------------|---|--------------|
| a. North | c. East | ☒ e. South | g. West |
| b. Northeast | d. Southeast | f. Southwest | h. Northwest |

31. If you are familiar with bearing terms (angular direction), try to estimate the number of degrees the object was from true North and also the number of degrees it was upward from the horizon (elevation).

31.1 When it first appeared:

- a. From true North _____ degrees.
- b. From horizon _____ degrees.

31.2 When it disappeared:

- a. From true North _____ degrees.
- b. From horizon _____ degrees.

32. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it.

It was as high when I last saw it as it was when I first saw it.

33. In the following larger sketch place an "A" at the position the object was when you first saw it, and a "B" at its position when you *last* saw it. Refer to smaller sketch as an example of how to complete the larger sketch.

34. What were the weather conditions at the time you saw the object?

34.1 CLOUDS (Circle One)

- ☒ a. Clear sky
- b. Hazy
- c. Scattered clouds
- d. Thick or heavy clouds
- e. Don't remember

34.2 WIND (Circle One)

- ☒ a. No wind
- b. Slight breeze
- c. Strong wind
- d. Don't remember

34.4 TEMPERATURE (Circle One)

- a. Cold
- b. Cool
- c. Warm
- ☒ d. Hot
- e. Don't remember

35. When did you report to some official that you had seen the object?

10 July 1953
Day Month Year

36. Was anyone else with you at the time you saw the object?

(Circle One) ☒ Yes No

36.1 IF you answered YES, did they see the object too?

(Circle One) ☒ Yes No

36.2 Please list their names and addresses:

37. Was this the first time that you had seen an object or objects like this?

(Circle One) ☒ Yes No

37.1 IF you answered NO, then when, where, and under what circumstances did you see other ones?

38. In your opinion what do you think the object was and what might have caused it?

I don't know

39. Do you think you can estimate the speed of the object?

(Circle One) Yes ☒ No

IF you answered YES, then what speed would you estimate? _____ m.p.h.

40. Do you think you can estimate how far away from you the object was?

(Circle One) Yes ☒ No

IF you answered YES, then how far away would you say it was? _____ feet.

16. Tell in a few words the following things about the object.

a. Sound No sound

b. Color Light Bulb turning

17. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

18. The edges of the object were:

- (Circle One):
- a. Fuzzy or blurred
 - ☒ b. Like a bright star
 - c. Sharply outlined
 - d. Don't remember

e. Other _____

19. IF there was MORE THAN ONE object, then how many were there? _____
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

20. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

21. IF POSSIBLE, try to guess or estimate what the real size of the object was in its longest dimension.
_____ feet.

22. How large did the object or objects appear as compared with one of the following objects held in the hand and at about arm's length?

(Circle One):

- a. Head of a pin
- b. Pea
- c. Dime
- d. Nickel
- e. Quarter
- f. Half dollar

g. Silver dollar

- 22.1 (Circle One of the following to indicate how certain you are of your answer to Question 22.

- a. Certain
- ☒ b. Fairly certain

- c. Not very sure
- d. Uncertain

23. How did the object or objects disappear from view?

It looked like the tail light of an airplane at about 20,000 to 30,000 ft high, traveling about 200 miles per hour.

24. In order that you can give as clear a picture as possible of what you saw, we would like for you to imagine that you could construct the object that you saw. Of what type material would you make it? How large would it be, and what shape would it have? Describe in your own words a common object or objects which when placed up in the sky would give the same appearance as the object which you saw.

25. Where were you located when you saw the object?
(Circle One):

- a. Inside a building
- b. In a car
- ☒ c. Outdoors
- d. In an airplane
- e. At sea
- f. Other _____

26. Were you (Circle One)

- a. In the business section of a city?
- ☒ b. In the residential section of a city?
- c. In open countryside?
- d. Flying near an airfield?
- e. Flying over a city?
- f. Flying over open country?
- g. Other _____

27. What were you doing at the time you saw the object, and how did you happen to notice it?

We were sitting in the yard when our
attention was called to it by someone else.

28. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

28.1 What direction were you moving? (Circle One)

- | | | | |
|--------------|--------------|--------------|--------------|
| a. North | c. East | e. South | g. West |
| b. Northeast | d. Southeast | f. Southwest | h. Northwest |

28.2 How fast were you moving? _____ miles per hour.

28.3 Did you stop at any time while you were looking at the object?

(Circle One) Yes No

29. What direction were you looking when you first saw the object? (Circle One)

- | | | | |
|--------------|--------------|---|--------------|
| a. North | c. East | ☒ e. South | g. West |
| b. Northeast | d. Southeast | f. Southwest | h. Northwest |

|--------------|---|--------------|--------------|
| a. North | c. East | e. South | g. West |
| b. Northeast | ☒ d. Southeast | f. Southwest | h. Northwest |

31. If you are familiar with bearing terms (angular direction), try to estimate the number of degrees the object was from true North and also the number of degrees it was upward from the horizon (elevation).

31.1 When it first appeared:

- a. From true North _____ degrees.
- b. From horizon _____ degrees.

31.2 When it disappeared:

- a. From true North _____ degrees.
- b. From horizon _____ degrees.

32. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it.

33. In the following larger sketch place an "A" at the position the object was when you *first* saw it, and a "B" at its position when you *last* saw it. Refer to smaller sketch as an example of how to complete the larger sketch.

DATE

July 18, 1953

On the day of July 10, 1953 an object over the city was called to my attention by a passer-by. I observed the strange object for about 45 minutes. It was like a real bright star but definitely was not and was moving. It seemed to stay almost still for a few minutes and then started moving in a southward direction. The weather conditions were good, dry, warm and clear. I have no idea what it was or what it might have been.
