3. SOURCE Civilians		10. CONCLUSION UNIDENTIFIED	
4. NUMBER OF OBJECTS One			
5. LENGTH OF OBSERVATION 40. Seconds		11. BRIEF SUMMARY AND ANALYSIS Three Res engineers observed a white smoke or vapor trail at 40-50,000 ft, while tracking a 79 ft Balloon at 73,000 ft through theodolite. Object moved in horizontal flight for approx 30 secs at a rate of 10 deg per 9 seconds (est 900 mph) then began vertical dive lasting 10-15 seconds. During dive object was visible several times appearing to glow. As object leveled off smoke trails ceased. Observation made from roof of General Mills Laboratory. 15 Oct Minneapolis fireball 8-5 COMMENTS: One of the observers is a meteorological engineer & is considered to be completely reliable. The other two sources are also considered reliable. The nearest AC&W facility was inoperativ at the time of the sighting. Two F-86 a/c were in the area 381 of Minneapolis at time of observation but this does not correlate with UFO. Sounds like a/c except for duration. UNIDENTIFIED. Dr Hynek records as fireball.

COUNTRY	UNITED STATES	REPORT NO.	(LEAVE BLANK)
AIR INTELLIGENCE INFORMATION REPORT			
SUBJECT	Page 1 of 2 Pages		
AREA REPORTED ON	FT. SNELLING, MINNESOTA	FROM (Agency)	Flt 2-A, 4602D AISS
DATE OF REPORT	21 Oct 1953	DATE OF INFORMATION	15 Oct 1953
PREPARED BY (Officer)	TIMOTHY J DELANTY, 2d Lt., USAF	EVALUATION	A-2
REFERENCES (Control number, directive, previous report, etc., as applicable)	AFL 200-2, ATIC FLYOBRPTS MANUAL, 25 July 1953		

SUMMARY: (Enter concise summary of report. Give significance in final one-sentence paragraph. List inclosures at lower left. Begin text of report on AF Form 112-Part II.)

I. SUMMARY: An unidentified flying object was reported by three (3) research engineers employed by General Mills Aeronautical Laboratories. It was observed during the theodolite tracking of a 79 foot balloon over ST. PAUL at 73,000 feet between 1010S and 1015S 15 October 1953.

The object was first observed as a comet-like smoke trail heading southward in horizontal flight passing below the sun which was at an elevation of approximately 25°. No sound was discernible during the entire observation. Object progressed in horizontal flight with an estimated altitude of 40,000 feet for approximately 30 seconds at the rate of 10° per 9 seconds. This represent 15 miles per minute or 900 miles per hour. (See chart I for variations on assumed altitude and speed). Object then began a vertical dive lasting 10 to 15 seconds. During this time it was visible several times appearing to glow. As object leveled from dive the smoke trails ceased and appeared as a grey mass through the theodolite screen. The object then disappeared from view in a quick flash reminiscent of a mirror reflecting sunlight. SOURCES say that object appeared to be of the same magnitude in the theodolite field as the balloon which they were tracking.

II. COMMENTS OF PREPARING OFFICER: All three men have extensive engineering background and two have flying experience. Mr. [REDACTED], a former B-17 pilot, is a Meteorological Engineer; Mr. [REDACTED], a private pilot, has 2 years post graduate work in Supersonic Aerodynamics; Mr. [REDACTED] is a Development Engineer. Mr. [REDACTED] made the entire observations with the naked eye while Mr. [REDACTED] observed the first portion of the flight through the theodolite. Mr. [REDACTED] observed the object through the theodolite during the last phases of flight.

What information has been obtained from SOURCES is believed to be completely reliable. The estimated altitude at which the smoke trails were observed leaves considerable room for speculation. Initial estimates were given in the vicinity of 40,000 feet but upon inquiry all

three men agreed that it could have been as high as 60,000 feet since they could not accurately determine the altitude with the theodolite. In addition to this fact they were unable to make a positive estimate as to the depth of field from the observation post to where the object was flying. These estimates were in relationship to known position of the balloon.

III. COMMENTS OF APPROVING OFFICER: Review of source material reveals initial sentence in paragraph two of this Summary concerning elevation of observation refers to the sighted object rather than the sun.

The nearest AC&I facility to the point of this observation was at the time of the observation inoperative however the logs of this organization show two (2) F-86's in the area south and west of Minneapolis at this time. This information is in no way intended to definitely correlate subject observation with these aircraft.

Report to: Air Intelligence Service Squadron, Flight 2A

SIGHTING OF UNIDENTIFIED OBJECT

The sighting described below took place during the theodolite tracking of a 79 ft. balloon floating at approximately 80,000 ft. on Project 85021 - Grab Bag. Observation was made from the roof at 2003 East Hennepin Avenue.

The time was between 1010 and 1015 CST on 15 Oct. 53. No sound was detected at any time during the observation.

The object was first observed as it passed below the sun at an elevation of approximately 25° heading southward in horizontal flight. It was detectable by a smoke or vapor trail which extended some distance behind it, but which did not persist, or form a cloud. The object itself was not visible even through the theodolite during the first part of the sighting.

During the horizontal part of its trajectory, the object moved across the sky at a rate of 10 degrees in 9 seconds. With an estimated altitude of 40,000 ft., this represents 15 miles per minute or 900 miles per hour.

After about 10 seconds of horizontal flight, the object appeared to go into a vertical dive. The possibility that the appearance of a dive was produced by the object merely receding into the distance seems unlikely since the speed normal to the line of sight was undiminished in the dive. The dive lasted for from 10 to 15 seconds at the end of which time the object was visible two or three times as it appeared to glow or reflect the light of the sun for perhaps a second at a time. Just at this time the vapor trail ceased, and for a second or two thereafter the object, its outlines still unrecognizable, was seen through the theodolite, not as a glare of (reflected?) light, but as a grey mass in the act of levelling off. Its size in the theodolite field was of the same magnitude as the 79 ft. balloon, which means that, since it was nearer, it would not be that large.

The observers believe that the object was most likely a jet aircraft, but several features were unusual.

1. The speed was higher than normally observed.
2. The vertical dive was a highly dangerous if not suicidal maneuver.
3. A jet aircraft in such a dive would be heard for miles, and would certainly cause a noticeable shock wave detectable in the area beneath it.
4. Vapor trails do not ordinarily occur during vertical motion (per Col. Shomo), though smoke trails could, of course.

It was thought that the Air Defense Command would be interested in what was seen, if

- a. They had no aircraft in the vicinity which could account for it, or if
- b. They had an aircraft accident which might be partly explained by this report.

- 2 -

Therefore, the above information was reported to:

Col. Shomo
Director of Combat Operations
31st Air Division
Telephone: Parker 9501, Ext. 7 or 8

the same morning.

U.S. AIR FORCE TECHNICAL INFORMATION SHEET

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will not be used for research purposes, and will be regarded as confidential material. Your name will not be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that, if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

15 OCT 1953
Day Month Year

2. Time of day:

10 10-15
Hour Minutes

(Circle One) A.M. or P.M.

3. Time zone:

(Circle One) a. Eastern
b. Central
c. Mountain
d. Pacific
e. Other

(Circle One)

a. Daylight Saving
b. Standard

4. Where were you when you saw the object?

2003 E. Hennepin Minneapolis Minnesota
Nearest Postal Address City or Town State or Country
Additional remarks: On the roof, using a theodolite on a balloon

5. Estimate how long you saw the object.

20-25
Hours Minutes Seconds

5. 1 Circle one of the following to indicate how certain you are of your answer to Question 5.

a. Certain
b. Fairly certain

c. Not very sure
d. Just a guess

6. What was the condition of the sky?

(Circle One) a. Bright daylight
b. Dull daylight
c. Bright twilight

d. Just a trace of daylight
e. No trace of daylight
f. Don't remember

7. If you saw the object during DAYLIGHT, TWILIGHT, or DAWN, where was the sun located as you looked at the object?

(Circle One) a. In front of you
b. In back of you
c. To your right

d. To your left
e. Overhead
f. Don't remember

8. IF you saw the object at NIGHT, TWILIGHT, or DAWN, what did you notice concerning the STARS and MOON?

8.1 STARS (Circle one)

- a. None b. Many
b. A few c. Don't remember

8.2 MOON (Circle one)

- a. Bright moonlight
b. Dull moonlight
c. No moonlight — pitch black
d. Don't remember

9. Was the object brighter than the background of the sky?

(Circle one) a. Yes (white) b. No c. Don't remember

10. IF it was BRIGHTER THAN the sky background, was the brightness like that of an automobile headlight? (Circle one)

- a. A mile or more away (a distant car)?
b. Several blocks away?
c. A block away?
d. Several yards away

e. other? The object, except at end, was a white trail

11. Did the object:

(Circle One for each question)

- | | | | |
|---|--------------------------------------|-------------------------------------|------------|
| a. Appear to stand still at any time? | Yes | ☒ No | Don't know |
| b. Suddenly speed up and rush away at any time? | Yes | ☒ No | Don't know |
| c. Break up into parts or explode? | Yes | No | Don't know |
| d. Give off smoke? | ☒ Yes | No | Don't know |
| e. Change brightness? | ☒ Yes | No | Don't know |
| f. Change shape? | Yes | ☒ No | Don't know |
| g. Flicker, throb, or pulsate? | Yes | ☒ No | Don't know |

12. Did the object move behind something at anytime, particular a cloud? (Circle one) Yes ☒ No Don't know IF YOU answered YES, then tell what it moved behind: _____

13. Did the object appear: (Circle one) a. ☒ Solid? b. Transparent? c. Don't know

This was at the end of the sighting just after the vapor trail stopped

14. Did the object move in front of something at anytime, particularly a cloud? (Circle one) Yes ☒ No Don't know IF You answered YES then tell what it moved in front of: _____

15. Did you observe the object through any of the following?

- | | | | | | |
|-----------------|-----|----|----------------|--------------------------------------|----|
| a. Eyeglasses? | Yes | No | e. Binoculars? | Yes | No |
| b. Sun glasses? | Yes | No | f. Telescope? | Yes | No |
| c. Windshield? | Yes | No | g. Theodolite? | ☒ Yes | No |
| d. Windowglass? | Yes | No | h. Other? | _____ | |

16. Tell in a few words the following things about the object:

a. Sound None

b. Color Highly reflective or glowing as trail stopped, then gray.

17. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

18. The edges of the object were:

(Circle one)

a. Fuzzy or blurred

b. Like a bright star

e. Other _____

c. Sharply outlined

d. Don't remember

19. IF there was MORE THAN ONE object, then how many were there? _____

Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

20. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

See 17. please.

21. IF POSSIBLE, try to guess or estimate what the real size of the object was in its longest dimension.

40-50 feet. (very poor data for this value)

22. How large did the object or objects appear as compared with one of the following objects held in the hand and at about arm's length?

(Circle One) a. Head of a pin
b. Pea
c. Dime
d. Nickel
e. Quarter
f. Half dollar

g. Silver dollar
h. Baseball
i. Grapefruit
j. Basketball

k. Other *Seen through theodolite the object appeared about the same size*

22. 1 (Circle One) of the following to indicate how certain you are of your answer to Question 22.

a. Certain

b. Fairly certain

c. Not very sure
d. Uncertain

as the balloon (79 ft) but was closer, we believe.

23. How did the object or objects disappear from view?

For a second or two after it flashed, at the moment that the vapor(?) trail stopped, it was visible through the theodolite as a gray mass without clear outlines.

24. In order that you can give as clear a picture as possible of what you saw, we would like for you to imagine that you could construct the object that you saw. Of what type material would you make it? How large would it be, and what shape would it have? Describe in your own words a common object or objects which when placed up in the sky would give the same appearance as the object which you saw.

The object itself was never seen clearly enough to make possible any answer to this question.

25. Where were you located when you saw the object? (Circle one)

- a. Inside a building
- b. In a car
- c. Outdoors
- d. In an airplane
- e. At sea
- f. Other On the roof

26. Were you (Circle one)

- a. In the business section?
- b. In the residential section?
- c. In open countryside?
- d. Flying near an airfield?
- e. Flying over open country?
- f. Flying over a city?
- g. Other _____

27. What were you doing at the time you saw the object, and how did you happen to notice it? We were tracking a balloon with a theodolite. It flew into the region of the sky being viewed.

28. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

28.1 What direction were you moving? (Circle one)

- | | | | |
|--------------|--------------|--------------|--------------|
| a. North | c. East | e. South | f. West |
| b. Northeast | d. Southeast | f. Southwest | g. Northwest |

28.2 How fast were you moving? _____ miles per hour.

28.3 Did you stop at any time while you were looking at the object?

(Circle one) Yes No

29. What direction were you looking when you first saw the object? (Circle one)

- | | | | |
|--------------|---------------------|--------------|--------------|
| a. North | <u>c. East</u> | e. South | f. West |
| b. Northeast | <u>d. Southeast</u> | f. Southwest | g. Northwest |

30. What direction were you looking when you last saw the object? (Circle one)

- | | | | |
|--------------|---------------------|--------------|--------------|
| a. North | <u>c. East</u> | e. South | f. West |
| b. Northwest | <u>d. Southeast</u> | f. Southwest | g. Northwest |

31. If you are familiar with bearing terms (angular direction), try to estimate the number of degrees the object was from true North and also the number of degrees it was upward from the horizon (elevation).

31.1 When it first appeared:

- a. From true North ~150 degrees.
- b. From horizon 25 degrees.

31.2 When it disappeared:

- a. From true North ~150 degrees.
- b. From horizon ~25 degrees.

this can be determined more accurately by reference to the azimuth of the sun at the time.

32. In the following sketch, imagine that you are at the point shown. Place and "A" on the curved line to show how high the object was above the horizon (skyline) whe you first saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you last saw it.

33. In the following sketch place an "A" at the position the object was when you first saw it, and a "B" at its position when you last saw it.

34. What were the weather conditions at the time you saw the object?

34.1 CLOUDS (Circle one)

- a. Clear sky
 b. Hazy *some haze in lower levels*
 c. Scattered Clouds
 d. Thick or heavy clouds
 e. Don't remember

34.2 WIND (Circle one)

- a. No wind
 b. Slight breeze
 c. Strong wind
 d. Don't remember

34.3 WEATHER (Circle one)

- a. Dry
 b. Fog, mist, or light rain
 c. Moderate or heavy rain
 d. Snow
 e. Don't remember

34.4 TEMPERATURE (Circle one)

- a. Cold
 b. Cool
 c. Warm
 d. Hot
 e. Don't remember

35. When did you report to some official that you had seen the object?

15 Oct. 1953
 DAY MONTH YEAR

36. Was anyone else with you at the time you saw the object?

(Circle one) Yes NO

36.1 IF you answered YES, did they see the object too? Yes No

36.2 Please list their names and addresses:

[Redacted names and addresses]
Minneapolis, Minn.

37. Was this the first time that you had seen an object or objects like this? Yes No

37.1 IF you answered NO, then when, where, and under what circumstances did you see other ones?

A plane leaving a vapor trail, or a sky writer appears much like the observed phenomenon, but the performance was unique.

38. In your opinion what do you think the object was and what might have caused it?

In my opinion, the object was either a jet aircraft, which went faster and through different maneuvers than ~~are~~ are usually associated with jets, or it was some object with which I am not familiar, and cannot imagine in detail.

39. Do you think you can estimate the speed of the object?
(Circle One) Yes No

IF you answered YES, then what speed would you estimate? 900 m.p.h.

40. Do you think you can estimate how far away from you the object was?
(Circle One) Yes No

IF you answered YES, then how far away would you say it was? 79,000 feet.

41. Please give the following information about yourself:

NAME [REDACTED] [REDACTED] [REDACTED]
Last Name First Name Middle Name

ADDRESS [REDACTED] WHITE BEAR LAKE 10 MINN
Street City Zone State

TELEPHONE NUMBER [REDACTED]

What is your present job? Meteorologist Engineer

Age 35 Sex Male

Please indicate any special educational training that you have had.

a. Grade School _____ e.e. Technical school Aircraft
b. High School _____ (Type) Maintenance
c. College M.I.T. f. Other special training _____
d. Post graduate _____ Pilot (USAF)

42. Date you completed this questionnaire:

5. Estimate how long you saw the object. 45-55
Hours Minutes Seconds

5. 1 Circle one of the following to indicate how certain you are of your answer to Question 5.

a. Certain

b. Fairly certain

c. Not very sure

d. Just a guess

6. What was the condition of the sky?

(Circle One) a. Bright daylight
b. Dull daylight
c. Bright twilight

d. Just a trace of daylight
e. No trace of daylight
f. Don't remember

7. If you saw the object during DAYLIGHT, TWILIGHT, or DAWN, where was the sun located as you looked at the object?

(Circle One) a. In front of you

b. In back of you

c. To your right

d. To your left

e. Overhead

f. Don't remember

Incl #4

8. IF you saw the object at NIGHT, TWILIGHT, or DAWN, what did you notice concerning the STARS and MOON?

8.1 STARS (Circle one)

- a. None b. Many
b. A few c. Don't remember

8.2 MOON (Circle one)

- a. Bright moonlight
b. Dull moonlight
c. No moonlight -- pitch black
d. Don't remember

9. Was the object brighter than the background of the sky?

(Circle one) a. Yes b. No c. Don't remember

10. IF it was BRIGHTER THAN the sky background, was the brightness like that of an automobile headlight? (Circle one)

- a. A mile or more away (a distant car)?
b. Several blocks away?
c. A block away?
d. Several yards away e. other? WHITE BILLLOWING TRAIL

11. Did the object:

(Circle One for each question)

- | | | | |
|---|------------|-----------|------------|
| a. Appear to stand still at any time? | Yes | <u>No</u> | Don't know |
| b. Suddenly speed up and rush away at any time? | Yes | <u>No</u> | Don't know |
| c. Break up into parts or explode? | Yes | <u>No</u> | Don't know |
| d. Give off smoke? | <u>Yes</u> | No | Don't know |
| e. Change brightness? | Yes | No | Don't know |
| f. Change shape? | Yes | No | Don't know |
| g. Flicker, throb, or pulsate? | Yes | No | Don't know |

12. Did the object move behind something at anytime, particular a cloud? (Circle one) Yes No Don't know IF YOU answered YES, then tell what it moved behind: _____

13. Did the object appear: (Circle one) a. Solid? b. Transparent? c. Don't know

14. Did the object move in front of something at anytime, particularly a cloud? (Circle one) Yes No Don't know IF You answered YES then tell what it moved in front of: _____

15. Did you observe the object through an of the following?

- | | | | | | |
|-----------------|-----|-----------|----------------|-------|-----------|
| a. Eyeglasses? | Yes | <u>No</u> | e. Binoculars? | Yes | <u>No</u> |
| b. Sun glasses? | Yes | <u>No</u> | f. Telescope? | Yes | <u>No</u> |
| c. Windshield? | Yes | <u>No</u> | g. Theodolite? | Yes | <u>No</u> |
| d. Windowglass? | Yes | <u>No</u> | h. Other? | _____ | |

16. Tell in a few words the following things about the object:

a. Sound NONE

b. Color OBJECT NOT DISCERNABLE, TRAIL WHITE

17. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

SEE ATTACHED SKETCH

18. The edges of the object were:

- (Circle one)
- | | |
|--------------------------|---------------------|
| a. Fuzzy or blurred | c. Sharply outlined |
| b. Like a bright star | d. Don't remember |
| e. Other <u>NOT SEEN</u> | |

19. IF there was MORE THAN ONE object, then how many were there?
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

20. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

21. IF POSSIBLE, try to guess or estimate what the real size of the object was in its longest dimension.
 ? feet.

22. How large did the object or objects appear as compared with one of the following objects held in the hand and at about arm's length?

(Circle One) a. Head of a pin g. Silver dollar
 b. Pea h. Baseball
 c. Dime i. Grapefruit
 d. Nickel j. Basketball
 e. Quarter k. Other OBJECT NOT DISCERNABLE WITH
 f. Half dollar NAKED EYE

22. 1 (Circle One) of the following to indicate how certain you are of your answer to Question 22.

a. Certain c. Not very sure
 b. Fairly certain d. Uncertain

23. How did the object or objects disappear from view? VAPOR OR SMOKE
TRAIL GRADUALLY DISSIPATED AND DISSAPPEARED.

24. In order that you can give as clear a picture as possible of what you saw, we would like for you to imagine that you could construct the object that you saw. Of what type material would you make it? How large would it be, and what shape would it have? Describe in your own words a common object or objects which when placed up in the sky would give the same appearance as the object which you saw.

25. Where were you located when you saw the object? (Circle one)

- a. Inside a building
- b. In a car
- c. Outdoors
- d. In an airplane
- e. At sea
- f. Other _____

26. Were you (Circle one)

- a. In the business section?
- b. In the residential section?
- c. In open countryside?
- d. Flying near an airfield?
- e. Flying over open country?
- f. Flying over a city?
- g. Other _____

27. What were you doing at the time you saw the object, and how did you happen to notice it? OBSERVING A BALLOON (79 FT. DIAM. - 74000 FT.)

SMOKE TRAIL APPEARED FROM BEHIND BLDG. STRUCTURE AND PASSED IN VICINITY OF THE BALLOON.

28. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

28.1 What direction were you moving? (Circle one)

- | | | | |
|--------------|--------------|--------------|--------------|
| a. North | c. East | e. South | f. West |
| b. Northeast | d. Southeast | f. Southwest | g. Northwest |

28.2 How fast were you moving? _____ miles per hour.

28.3 Did you stop at any time while you were looking at the object?

(Circle one) Yes No

29. What direction were you looking when you first saw the object? (Circle one)

- | | | | |
|--------------|---------------|-----------------|--------------|
| a. North | c. East | e. <u>South</u> | f. West |
| b. Northeast | d. South east | f. South west | g. Northwest |

30. What direction were you looking when you last saw the object? (Circle one)

- | | | | |
|--------------|--------------|-----------------|--------------|
| a. North | c. East | e. <u>South</u> | f. West |
| b. Northwest | d. Southeast | f. Southwest | g. Northwest |

31. If you are familiar with bearing terms (angular direction), try to estimate the number of degrees the object was from true North and also the number of degrees it was upward from the horizon (elevation).

31.1 When it first appeared:

- a. From true North 145-150 degrees.
- b. From horizon 23-25 degrees.

31.2 When it disappeared:

- a. From true North 175-180 degrees.
- b. From horizon 18-20 degrees

32. In the following sketch, imagine that you are at the point shown. Place and "A" on the curved line to show how high the object was above the horizon (skyline) when you first saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you last saw it.

33. In the following sketch place an "A" at the position the object was when you first saw it, and a "B" at its position when you last saw it.

34. What were the weather conditions at the time you saw the object?

34.1 CLOUDS (Circle one)

- a. Clear sky
- b. Hazy
- c. Scattered Clouds
- d. Thick or heavy clouds
- e. Don't remember

34.2 WIND (Circle one)

- a. No wind
- b. Slight breeze
- c. Strong wind
- d. Don't remember

34.3 WEATHER (Circle one)

- a. Dry
- b. Fog, mist, or light rain
- c. Moderate or heavy rain
- d. Snow
- e. Don't remember

34.4 TEMPERATURE (Circle one)

- a. Cold
- b. Cool
- c. Warm
- d. Hot
- e. Don't remember

35. When did you report to some official that you had seen the object?

15 Oct 1953
DAY MONTH YEAR

36. Was anyone else with you at the time you saw the object?

(Circle one) Yes NO

36.1 IF you answered YES, did they see the object too? Yes No

36.2 Please list their names and addresses:

FLETCHER, BARTHOLOMEW

RICHARD REILLY

37. Was this the first time that you had seen an object or objects like this? Yes No

37.1 IF you answered NO, then when, where, and under what circumstances did you see other ones?

38. In your opinio what do you thin the object was and what might have caused it?

OBJECT APPEARED TO BE A VAPOR TRAIL, EXCEPT THAT IT DISSIPATED RAPIDLY. TRAIL WAS CAUSED BY A METALLIC OBJECT WHICH GLINTED IN THE SUN TWICE JUST BEFORE THE "VAPOR TRAIL" DISSIPATED COMPLETELY. LOOKED LIKE JET PERFORMANCE EXCEPT FOR EXTREME SPEED IN BOTH HORIZONTAL AND VERTICAL MOTION.

39. Do you think you can estimate the speed of the object?

(Circle One) Yes No IN ANGULAR TRAVEL

IF you answered YES, then what speed would you estimate? ~ 1° Azimuth / SECOND

40. Do you think you can estimate how far away from you the object was?

(Circle One) Yes No

IF you answered YES, then how far away would you say it was? _____ feet.

41. Please give the following information about yourself:

NAME [REDACTED] [REDACTED] [REDACTED]
Last Name First Name Middle Name

ADDRESS [REDACTED] ST. PAUL 13 MINN

CODE:

DATE 21 OCT 53

WHILE OBSERVING A BALLOON (ALT 7,000 FT) A WHITE TRAIL APPEARED IN THE SKY COMING FROM BEHIND PART OF THE BUILDING STRUCTURE (ROOF OF BLDG.) IT FIRST APPEARED TO BE SMOKE WRITING, BUT VELOCITY WAS TOO GREAT, SO WE ASSUMED IT TO BE A VAPOR TRAIL FROM A JET. THE END OF THE SMOKE TRAIL DISSIPATED AS RAPIDLY AS THE BEGINNING WAS FORMED; THE LENGTH REMAINING ABOUT CONSTANT AND EQUIVALENT TO ABOUT 5-8° IN AZIMUTH. AS TRAJECTORY STARTED DOWNWARD, IT WAS AT FIRST ASSUMED THAT THE OBJECT WAS MOVING AWAY FROM US. THEN THE VERTICAL MOVEMENT BECAME VERY RAPID, PROBABLY ABOUT AS FAST AS THE HORIZONTAL VELOCITY. AS THE OBJECT MOVED DOWNWARD, THE TRAIL BECAME LESS & LESS DISTINCT AND FINALLY, AS THE OBJECT APPEARED TO BEGIN LEVELING OUT, THE TRAIL DISSIPATED COMPLETELY. AT THIS SAME TIME, TWO FLASHES WERE SEEN, WHICH WE ASSUMED TO BE REFLECTIONS FROM THE SUN AS THE OBJECT ROLLED ABOUT ITS LONGITUDINAL AXIS. THIS COULD BE EXPECTED FROM MANEUVERS IN A CONVENTIONAL CRAFT.

THE QUESTIONABLE ASPECTS OF THE SIGHTING WERE THE DISSIPATION OF THE TRAIL - UNCOMMON FOR VAPOR TRAILS; AND THE APPARENT SPEED, ESPECIALLY VERTICAL SPEED. USING THE ELEVATION ANGLE ($\approx 23^\circ$) AND THE RATE OF ANGULAR TRAVEL (ABOUT 1° AZIMUTH PER SEC.) VELOCITIES CAN BE ESTABLISHED BY ASSUMING DIFFERENT ALTITUDES OR DISTANCES AWAY FOR THE OBJECT.

UNDER ASSUMPTIONS FROM 30,000 FT. TO 50,000 FT. ALTITUDE, THE OBJECT WOULD HAVE BEEN TRAVELING BETWEEN 800 & 1600 M.P.H. EVEN ALLOWING A COMFORTABLE 20% ERROR THE OBJECT WAS PROBABLY MOVING AT GREATER THAN SONIC VELOCITY. VERTICAL MOVEMENT OF THIS MAGNITUDE FOR 10-15 SEC. WOULD PROBABLY BE VERY DANGEROUS IN KNOWN OPERATIONAL AIRCRAFT.

U.S. AIR FORCE TECHNICAL INFORMATION SHEET

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will not be used for research purposes, and will be regarded as confidential material. Your name will not be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that, if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

15 Oct 1955
Day Month Year

2. Time of day: 10 10

Hour

Minutes

(Circle One)

A.M.

or P.M.

3. Time zone:

(Circle One)

a. Eastern

b. Central

c. Mountain

d. Pacific

e. Other

(Circle One)

a. Daylight Saving

b. Standard

4. Where were you when you saw the object?

[Redacted] Mpls Minn
Nearest Postal Address City or Town State or Country
Additional remarks: Roof of 4 story bldg

5. Estimate how long you saw the object.

Hours

Minutes

Seconds

5. 1 Circle one of the following to indicate how certain you are of your answer to Question 5.

a. Certainb. Fairly certain

c. Not very sure

d. Just a guess

6. What was the condition of the sky?

(Circle One)

a. Bright daylight

b. Dull daylight

c. Bright twilight

d. Just a trace of daylight

e. No trace of daylight

f. Don't remember

7. If you saw the object during DAYLIGHT, TWILIGHT, or DAWN, where was the sun located as you looked at the object?

(Circle One)

a. In front of you

b. In back of you

c. To your right

d. To your left

e. Overhead

f. Don't remember

Incl #3

8. IF you saw the object at NIGHT, TWILIGHT, or DAWN, what did you notice concerning the STARS and MOON?

8.1 STARS (Circle one)

- a. None b. Many
b. A few c. Don't remember

8.2 MOON (Circle one)

- a. Bright moonlight
b. Dull moonlight
c. No moonlight -- pitch black
d. Don't remember

9. Was the object brighter than the background of the sky?

(Circle one) a. Yes b. No c. Don't remember

10. IF it was BRIGHTER THAN the sky background, was the brightness like that of an automobile headlight? (Circle one)

- a. A mile or more away (a distant car)?
b. Several blocks away?
c. A block away?
d. Several yards away e. other? Appeared as a smoke trail

11. Did the object: (Circle One for each question)

- | | | | |
|---|------------|-----------|------------|
| a. Appear to stand still at any time? | Yes | <u>No</u> | Don't know |
| b. Suddenly speed up and rush away at any time? | Yes | <u>No</u> | Don't know |
| c. Break up into parts or explode? | Yes | <u>No</u> | Don't know |
| d. Give off smoke? | <u>Yes</u> | No | Don't know |
| e. Change brightness? | Yes | No | Don't know |
| f. Change shape? | Yes | No | Don't know |
| g. Flicker, throb, or pulsate? | <u>Yes</u> | No | Don't know |

12. Did the object move behind something at anytime, particular a cloud? (Circle one) Yes No Don't know IF YOU answered YES, then tell what it moved behind: _____

13. Did the object appear: (Circle one) a. Solid? b. Transparent? c. Don't know

14. Did the object move in front of something at anytime, particularly a cloud? (Circle one) Yes No Don't know IF You answered YES then tell what it moved in front of: _____

15. Did you observe the object through an of the following?

- | | | | | | |
|-----------------|-----|----|----------------|------------|----|
| a. Eyeglasses? | Yes | No | e. Binoculars? | Yes | No |
| b. Sun glasses? | Yes | No | f. Telescope? | Yes | No |
| c. Windshield? | Yes | No | g. Theodolite? | <u>Yes</u> | No |
| d. Windowglass? | Yes | No | h. Other? | _____ | |

16. Tell in a few words the following things about the object:

a. Sound None

b. Color Flash of sunlight appeared to be reflected

17. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

18. The edges of the object were:

- (Circle one) a. Fuzzy or blurred c. Sharply outlined
b. Like a bright star d. Don't remember
e. Other Saw no actual object

Only the trail.

19. IF there was MORE THAN ONE object, then how many were there?
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

20. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

21. IF POSSIBLE, try to guess or estimate what the real size of the object was in its longest dimension.

feet. *Size estimation not possible*

22. How large did the object or objects appear as compared with one of the following objects held in the hand and at about arm's length?

(Circle One) a. Head of a pin
b. Pea
c. Dime
d. Nickel
e. Quarter
f. Half dollar

g. Silver dollar
h. Baseball
i. Grapefruit
j. Basketball
k. Other

Saw no object, only the trail

22. 1 (Circle One) of the following to indicate how certain you are of your answer to Question 22.

a. Certain

b. Fairly certain

c. Not very sure

d. Uncertain

23. How did the object or objects disappear from view? *Suddenly, with flash of what appeared to be reflected sunlight*

24. In order that you can give as clear a picture as possible of what you saw, we would like for you to imagine that you could construct the object that you saw. Of what type material would you make it? How large would it be, and what shape would it have? Describe in your own words a common object or objects which when placed up in the sky would give the same appearance as the object which you saw.

25. Where were you located when you saw the object? (Circle one)

- a. Inside a building
- b. In a car
- c. Outdoors
- d. In an airplane
- e. At sea
- f. Other Roof of bldg

26. Were you (Circle one)

- a. In the business section?
- b. In the residential section?
- c. In open countryside?
- d. Flying near an airfield?
- e. Flying over open country?
- f. Flying over a city?
- g. Other _____

27. What were you doing at the time you saw the object, and how did you happen to notice it? Observing a balloon flight when

the trail appeared approx 5000 ft below balloon

28. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

28.1 What direction were you moving? (Circle one)

- | | | | |
|--------------|--------------|--------------|--------------|
| a. North | c. East | e. South | f. West |
| b. Northeast | d. Southeast | f. Southwest | g. Northwest |

28.2 How fast were you moving? _____ miles per hour.

28.3 Did you stop at any time while you were looking at the object?

(Circle one) Yes No

29. What direction were you looking when you first saw the object? (Circle one)

- | | | | |
|--------------|---------------|---------------|--------------|
| a. North | c. East | e. South | f. West |
| b. Northeast | d. South east | f. South west | g. Northwest |

30. What direction were you looking when you last saw the object? (Circle one)

- | | | | |
|--------------|--------------|--------------|--------------|
| a. North | c. East | e. South | f. West |
| b. Northwest | d. Southeast | f. Southwest | g. Northwest |

31. If you are familiar with bearing terms (angular direction), try to estimate the number of degrees the object was from true North and also the number of degrees it was upward from the horizon (elevation).

31.1 When it first appeared:

- a. From true North 130-140 degrees.
- b. From horizon 25 degrees.

31.2 When it disappeared:

- a. From true North 160-170 degrees.
- b. From horizon 15-20 degrees

32. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you first saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you last saw it.

See sketch

33. In the following sketch place an "A" at the position the object was when you first saw it, and a "B" at its position when you last saw it.

34. What were the weather conditions at the time you saw the object?

34.1 CLOUDS (Circle one)

- a. Clear sky
- b. Hazy
- c. Scattered Clouds
- d. Thick or heavy clouds
- e. Don't remember

34.2 WIND (Circle one)

- a. No wind
b. Slight breeze
c. Strong wind
d. Don't remember

34.3 WEATHER (Circle one)

- a. Dry
- b. Fog, mist, or light rain
- c. Moderate or heavy rain
- d. Snow
- e. Don't remember

34.4 TEMPERATURE (Circle one)

- a. Cold
- b. Cool
- c. Warm
- d. Hot
- e. Don't remember

35. When did you report to some official that you had seen the object?

15
DAY

MONTH

12
YEAR

36. Was anyone else with you at the time you saw the object?

(Circle one) Yes NO

Yes

NO

36.1 IF you answered YES, did they see the object too? Yes No

Yes No

36.2 Please list their names and addresses:

37. Was this the first time that you had seen an object or objects like this? Yes No

Yes

No

37.1 IF you answered NO, then when, where, and under what circumstances did you see other ones?

Flying on a balloon observation near Mpts.
approx. Oct. 1951.

38. In your opinio what do you thin the object was and what might have caused it?

Don't care to speculate.

39. Do you think you can estimate the speed of the object?

(Circle One) ☒ Yes ☐ No

Angular Speed

~ 1° per second

IF you answered YES, then what speed would you estimate? _____ m.p.h.

40. Do you think you can estimate how far away from you the object was?

(Circle One) Yes ☐ ☒ No

IF you answered YES, then how far away would you say it was? _____ feet.

41. Please give the following information about yourself:

NAME
Last Name First Name Middle Name

ADDRESS Minneapolis Minn.
Street City Zone State

TELEPHONE NUMBER

What is your present job? Engineer Gen. Mils. Research Dev. Dept.

Age 23 Sex M

Please indicate any special educational training that you have had.

a. Grade School _____ e.e. Technical school _____

b. High School _____ (Type) _____

c. College _____ f. Other special training Private

d. Post graduate 2 yrs. Gen. Mils. in Pilot

Aero. Engineering. Major in
Supersonic Aerodynamics

CODE:

DATE 21-Oct-1953

On 15 Oct. 1953 while observing a high altitude balloon (altitude about 73,000 ft at the time) a trail appeared about 5° below the balloon. Mr. [REDACTED] operated the theodolite, using the rough, "V" sight while I looked through the instrument. After the initiating point of the trail appeared in the field, I assumed operation of the instrument, following the path by operating the mechanical azimuth & elevation controls on the instrument. Mr. [REDACTED] timed the rate of azimuth change. I saw no object. After the initiating point of the trail had gone well into the vertical phase of the trail I asked Mr. Bartholomew to observe the object through the instrument. After leaving the instrument and observing with the naked eye I noticed that the trail was rapidly disappearing, minimizing the possibility of the trail being vapor in my opinion. The vertical portion of the trail also strengthens this opinion I think.

The trail then exhibited a tendency to return to horizontal, and disappeared with a reflected flash. See foregoing description.
