SOURCE

[REDACTED]

In the spring of 1954, I was hospitalized for treatment for: elow
jaundice at a military hospital near the Barrikadi Munitions Works
(48 48 N - 44 32 E). On two occasions during the period of my
convalescence, I, as well as other patients at the hospital, observed
the flight of an unknown object from horizon to horizon, flying from
southeast to northwest. This object appeared to be climbing. I
cannot describe the object, but as I remember, it took approximately
one minute for the object to leave the range of my vision. This
object caused a great amount of vibration in the air and made a
screeching, whistling noise which was different from the noise
made by an artillery shell in flight. I could not see the object
itself, but I did see disturbance in the air which seemed to envelop
it.
