Murchison Citizens Report Sighting "Flying Saucers"

For the third time in as many days reports from persons, who said they had observed "strange metallic-colored disks" in the skies near Athens, came in Thursday.

Mrs. T. M. Taylor, Murchison postmistress, stated that she had seen one of the objects on Tuesday prior to the time that Mrs. A. L. Skinner, Athens housewife, made the first reported sighting.

Mrs. Taylor said she saw the object from her back yard as she was hanging out clothes and said that she was certain what she saw was not a reflection. She said the object was shining brighter than any plane reflection she had ever seen.

She said there was no vapor trail, as is sometimes left by jet-planes, or no sound of engines. Mrs. Taylor said she sighted the object between 12 and 1:00 o'clock Tuesday, and thought that she watched it three or four minutes.

She said she could not determine the shape of the thing but that it definitely was not moving, just hovering in the north at approx-

imately a 90 degree angle in the sky.

Mrs. Taylor said she ran toward her house to call her husband but that when they returned the object had gone.

Mrs. Skinner's sighting was also made while she was hanging out clothes but she was able to give a more accurate description of what she saw and it is believed from the accounts of the incident that Mrs. Skinner's sighting was at a closer range.

Another sighting made the same day as Mrs. Skinner's but also unreported at the time was made by a man who lives about five miles northeast of Murchison. He requested his name be withheld from the account.

He said he made his sighting at 9:15 in the eastern part of the sky and apparently at a great distance away. He said he first thought he had seen a jet because of haze or vapor trails in the vicinity.

He said he watched the object for some time, however, and

became convinced that it was not a plane because of the rapid speed at which the thing was climbing. The man, who is a former serviceman, said the gleaming object was going straight up at an apparently tremendous rate of speed. He said he knew that the Air Force have some jets that will fly faster than the speed of sound but that they don't appear to be moving so fast when observed at a great distance.

He said the object "shot" straight up for a time and then headed into the east and quickly disappeared.

Phil Dibert, a Tyler Morning Telegraph reporter, reported seeing an unidentified object near Winona Wednesday morning. His description fitted the one given by Mrs. Skinner, although it was not as detailed. He said that one disappeared in the same manner as the one seen by Mrs. Taylor.

Further reports had been received by The Athens Review Friday morning but an interview with the observers had not been arranged at press time.

The Athens Review - ATHENS, TEXAS

8 JAN 1954

Headed Toward Tyler

Saucer-Like Object Seen Here Monday

An object resembling a publicized Flying Saucer was observed hovering in the sky on the outskirts of Athens in the immediate vicinity of the Tyler Highway by Mrs. A. L. Skinner, Jr., who resides about a half mile from where she first sighted the phenomenon.

Mrs. Skinner, who was hanging out clothes in her back yard at the time, said she first saw the silver, metallic-gleaming object, completely surrounded by a glimmering haze, approaching from the east. She said she stared at it and tried to determine its nature.

It stopped, Mrs. Skinner said, hovered for a moment and then seemed to bank and slide back in a northeastern direction without making a full turn. She described the turn as being a "tilting and sliding" motion.

Mrs. Skinner, who said the object resembled a "large ten gallon hat" when one observed the haze surrounding it, said she saw no smoke, heard no engines nor saw none of the colors which sometime are reported by persons as accompanying the "ships."

Mrs. Skinner said the haze seemed to be heavier at the "crown of the hat" and much thinner around the lower part or brim. She said the object lost its appearance of a hat when it made its strange turn.

The thing then appeared to be circular in construction and the high top took on a dome-like appearance. She said she could not determine the speed, size or height of the object but that she thought she observed it for about five minutes before it passed from her view toward Tyler at a speed which appeared to be slower than an airplane flying at about the

same distance away.

The sighting was made by Mrs. Skinner at about 3:30 p. m., Monday, and she said after watching the object for a time she ran to a neighbor's house nearby and called to her.

Mrs. Skinner's neighbor was unable to get outside of her house in time to see the object, however, but Mrs. Skinner said she hoped that someone else near Athens or along the route seemingly taken by the object may have seen it and would report it as soon as they learned that someone else had observed it, too.

REPORT ON AERIAL OBJECT OBSERVED

1. Name of Observer: [REDACTED]
2. Address of Observer: [REDACTED] Mallala, S.Aus.
3. Occupation of Observer: Electrician
4. Date & Time of Observation: 14 Jan 54 at 1120 hours
5. Period of Observation: 5 seconds
6. Manner of Observation: Visual. Position 130°30'E 34°27'S
7. Where was object first observed: Up and in front of observer
8. What first attracted observer's attention: Nothing in particular
9. Did object appear as a light or as a definite object: Definite object
10. How many: One only
11. Color of light or object: silver
12. Apparent shape: flat and square
13. Any detail of structure observable: no
14. Any method of propulsion obvious: no
15. Any sound: no
16. Height, or angle of elevation: 025° above horizon
17. Speed, or angular velocity: not able to estimate
18. Any experience which enables observer to be reasonably certain about the answers given to 16 and 17: No particular experience
19. Direction of flight with reference to landmarks or points of the compass: Appeared in position 180°T from observer's position & traveled in a general western direction.
20. Did the object remain on a straight path, deviate or manoeuvre at all: Appeared to rise and descend and move in a general westerly direction until it rose vertically at a great speed.
21. Was any trail of exhaust, vapour or light seen: no
22. Where did object disappear, e.g. in mid-air, behind a hill, over the horizon: in mid-air.

Sir,

I wish to bring to your notice the sighting of an object, which could be described as a "Flying Saucer". The sighting occurred while I was in the company of a lady, and although our association was harmless, the meeting was clandestine, and if known could be most embarrassing to the lady. Under the circumstances it was the lady's wish, and my undertaking to her that the sighting not be reported. However, after careful consideration I feel it my duty to report the matter fully, and to honour the lady's wish, I will refrain from mentioning our names which will obviate any risk of her identity and/or association with me, becoming known. Also, in writing to you, I feel more confident than if writing to a Civil Department, that the whole matter will be treated in confidence. You may, of course, regard this as just an anonymous letter, but in view of the foregoing I earnestly request that it not be treated as such, as please appreciate that I would hardly go to this trouble to mislead you, or anyone else.

Both me, and my companions were without watches, and therefore the times mentioned can only be approximate, but you could no doubt establish accurate times, if you so desired, from events that will be mentioned. Naturally any measurements given can only be regarded as approximate.

The sighting occurred on Friday last, the 15th. inst., and we were in a car parked

near a Gravel Quarry at the Paps, which are two hills about 5 miles west of Mansfield. Entrance to the site is gained through a gateway off the Maroondah Highway, between Mansfield and Maindample. The sky was cloudless, and from our elevated position at the Paps, we had a clear view to the Eastward, and the street and house lights of Mansfield could be plainly seen in front of us. The car was facing East.

At about 9:30 pm we heard a faint whirring sound like the wind causes in telephone wires, but there was not a breath of wind, and as far as I know no telephone wires in the vicinity. Within a matter of seconds an object dropped into view directly in front of us at about 300 yards distant. In profile, the object looked like a mushroom, complete with short stem. We noticed two small green lights facing downwards on the underside of the mushroom. When about 200 feet above the ground, the object ceased to drop, and remained stationary, the green lights being immediately extinguished, and the whirring sound seemed to become louder.

For at least 10 minutes we had a full view of the object, which was circular, and at least 150 feet in diameter. In descent it looked in profile like a mushroom, but when stationary, we could plainly see that the profile was similar to two saucers with their edges together. The rim was in bright metal, like aluminium in appearance, and about 12 feet wide. The rest of the object, including the stem, was dull. The stem appeared to be about 20 feet in diameter, and about 25 feet in length. From the bottom of the stem to the top of the object seemed to be about 60 feet.

After the 10 minutes we heard the drone of a plane and having previously alighted from the car to have a better view of the Saucer, we saw the navigation lights indicating that the plane was travelling Northwards. Almost simultaneously the whirring sound from the Saucer ceased, and it made a rapid vertical ascent, emitting a yellow gaseous light from the bottom of the stem. We estimated that the time was then about 9:40 pm. On attaining about 3000 feet, the gaseous light from the stem ceased, and a similar light appeared on the side of the stem, and the Saucer then proceeded horizontally at a terrific speed in the direction of the plane. On completion of the circle, which was a wide one, the Saucer then headed towards us, and in the matter of seconds was again overhead at about 3000 feet. The green lights appeared under the Saucer, and on opposite sides of the stem, and the descent immediately commenced, and the Saucer became stationary in what appeared to us, to be the same position that it had occupied before leaving to pursue the plane, only a few minutes previously. We estimated the time to be about 9:50 pm.

We then decided to leave, and immediately the car lights were turned on, a green light appeared momentarily facing us, and from the edge of the Saucer, in the middle of the bright band. There was a sudden roar at the same time, and the Saucer departed leaving a stream of yellow gaseous light, being emitted from the side of the stem. With what seemed to be only the fraction of a second, the Saucer was on the outskirts of the Town, and only then did it commence to climb to a higher elevation, and then disappeared in a North Easterly direction.

In discussing the whole matter with my friend, she told me that there had been previous sightings in Mansfield, and these had been in the vicinity of the Golf Links, and the Saucer had been seen resting on the ground.

Such reports may have already reached you and other Authorities investigating this matter, but if not, I hope this one is of interest.

I would like to add that the Saucer in flight does appear to be of a bright metal, but from my observation the bright metal exists only as described in this letter.
