(11) Observers state an aircraft was flying in the vicinity but behind them from the direction they were looking. This aircraft had three lights on it—red, white and green. The aircraft was flying in same direction as sighted object.

(12) The location of the sightings is within a Civil Airway (AMBER 7). The daily log of the Narrine Lifeguard Station, Newburyport, Mass., did not reveal any unusual sightings. The Coast Guard personnel on duty stated that aircraft are seen and heard in that area day and night. (The Lifeguard Station is physically located about one air mile from the position of the observers.)

A guard on duty during time of the sighting, at the Radar Experimental Site, Narrine Coast Guard Station, states that no unusual noise or objects were heard. He also stated that aircraft are heard continually passing over the site at all hours day and night.

Investigation with the Boston Approach Control Center personnel revealed that on Airway Amber 7, at times, aircraft do hold or delay approach to Boston in the vicinity of Hampton, slightly north of Salisbury Beach. This situation can happen on outbound flights to the north as well as to the south. Hampton, just north of Salisbury, is used at times for reference when changing flight plans from VFR to IFR as well as IFR to VFR.

Inclosure No. 1 was obtained by observer (6)(a) from USAF Headquarters, Washington, D.C. This observer wrote to Air Force Headquarters asking for information and procedures used in reporting unidentified flying objects. He then, in turn, sent the inclosure to this organization.

It is the analysis of the Reporting Officer that the sightings were an aircraft seen in the process of climbing or turning within the airway in the area of Hampton, Salisbury Beach, and Newburyport, Mass.
