That Was A Weather Balloon In Sky Here Yesterday, No Saucer

It seems fairly certain today that object spotted in the sky over Greenwich late yesterday afternoon was a large weather balloon.

The air spotters tower at Greenwich Point and Stamford Museum received many queries after hundreds of residents saw the object in the clouds and talk once again got around to flying saucers.

Nicholas Rosa, science curator at the Stamford Museum, said he trained a telescope on the large balloon and saw an instrument box dangling from it. He said the balloons sometimes attain a height of 100,000 feet and can be seen for 100 miles.
