Dear Sirs:

Recently, while looking through some
old pictures, I came upon the enclosed snapshot.
There are two strange black dots on it which
I have circled. I am reporting them as u.f.o.s.
I do not know when this picture was taken.
I took it accidentally. One thing I do know.
He was around 1954 to 1956. Thank You

Yours Sincerely,
[REDACTED]

COMMENTS (Use reverse, if necessary)

1. Enlargements show that objects appear to be birds on the rise, probably pheasants
2. Bad photography: out of focus, and taken during what appears to be either a forest fire or fog.
3. Source should be queried why report a UFO 3 years after it happened.
4. In keeping with USAF policies, returning original and one enlargement to owner.
