3. DATE-TIME GROUP Local <u>08/0345 Z Feb 55</u> GMT _____		4. TYPE OF OBSERVATION ☒ Ground-Visual ☐ Ground-Radar ☐ Air-Visual ☐ Air-Intercept Radar			
5. PHOTOS ☐ Yes ☒ No		6. SOURCE <u>Civilian</u>			
7. LENGTH OF OBSERVATION <u>approx 45 minutes</u>		8. NUMBER OF OBJECTS <u>one (1)</u>		9. COURSE <u>alternately R/W</u>	
10. BRIEF SUMMARY OF SIGHTING One (1) object, alternately red and white was observed to apparently maintain a slow and straight course, after an initial spurt of speed which covered 3-4 miles.				11. COMMENTS The duty officer at the Miramar Airport stated in the preliminary report that he scanned the sky at the time the report came into him and that the only lights that he could see were red lights from field radio towers and red, green and white lights from airfield beacons. This report is resolved as probably airfield lights.

1. SOURCE: MRS. [REDACTED]

Age: 36

Occupation: Housewife

Education: High School

FOR OFFICIAL USE ONLY

11. **RESUME:** SOURCE was a small woman weighing about 100 pounds. She was [REDACTED] and [REDACTED] and appeared to be an extremely nervous person. SOURCE stated that she had spent three (3) years as a Navy WAVE in the U.S. during which time she worked in the [REDACTED] Section and had done some work in the [REDACTED] Tower. She spoke very rapidly and would never give a direct answer to any question asked during the interview. She was not sure of any statement made, she gave several conflicting statements as she seemed [REDACTED].

It is the opinion of the investigator that the information furnished by this [REDACTED]

12. SOURCE'S DESCRIPTION OF SIGHTING (UNCLASSIFIED):

1. SOURCE made her observations from the porch of her second floor apartment, which faces west.

2. **OBJECT "A"** - On several occasions (approximately 12) between the dates of 7 - 16 February 1955, SOURCE observed a round blanching red light that was sometimes due west, sometimes northwest and sometimes southwest of her position. The object seemed to be between 500 to 800 feet altitude and about three miles away. The object usually appeared from 0230Z to 0530Z. Sometimes the object was stationary and other times it moved to the northwest or to the southwest. SOURCE used an ordinary two cell flashlight and blinked Morse code toward the object and stated that the object blinked back to her each time. Although the object's usual color was red, SOURCE stated that the object blinked back to her in white. The object's blinking was very rapid and SOURCE was unable to read it. SOURCE usually sent the message "come here" with her flashlight and stated that the object only blinked in white after she sent the message. SOURCE stated that at times, after the object had blinked back to her, it moved to the northwest very fast "like a jet" and disappeared. SOURCE would not attempt to guess the size of the object. SOURCE never used visual aids to observe the object.

3. **OBJECT "B"** - At approximately 160200Z Feb 55, while SOURCE was observing Object "A", four (4) objects appeared from the east heading west. Each object had a small white light on it which was all SOURCE could see. There was no sound but the objects moved at exceptionally high speed. SOURCE blinked "come here" with her flashlight, one of the objects blinked back to her and then the objects made sharp right turn and came over SOURCE's head. The objects then disappeared to the north. The objects appeared again at approximately 160600Z Feb 55 from the south and were about 500 feet altitude. SOURCE again blinked with her flashlight and again one object blinked back to her, then the objects disappeared to the north.

PAGE 6 OF 6

UNCLASSIFIED

INNO #2 to 1-6-4803-2-55 Statement by A/21 Rear Jones, 1846P, JCS

FOR OFFICIAL USE ONLY

UNCLASSIFIED

Mrs. Overland called me at the Air Control Tower, Lindbergh Field, San Diego, California, several times during the night 2 weeks of February between 7 and 8 o'clock PM, and reported she saw a flashing red light suspended in the air from 400 to 2000 feet, just above the same place every time. Each time she would call I looked in the direction she saw the red light and could see nothing, but each time the call was received from Mrs. Overland we had either commercial airplanes or Air Force planes entering the traffic pattern or departing the airport with some in all position she reported seeing the flashing light. It is my belief that what she saw was the flashes of the lights on the tail of this plane or the red light on the left wing. As for the low altitude lights, they were probably obstruction lights on the towers.
