23. How did the object or objects disappear from view? _____

24. In order that you can give as clear a picture as possible of what you saw, we would like for you to imagine that you could construct the object that you saw. Of what type material would you make it? How large would it be, and what shape would it have? Describe in your own words a common object or objects which when placed up in the sky would give the same appearance as the object which you saw.

25. Where were you located when you saw the object?
(Circle One):

- a. Inside a building
- b. In a car
- c. Outdoors
- d. In an airplane
- e. At sea
- f. Other _____

26. Were you (Circle One)

- a. In the business section of a city?
- b. In the residential section of a city?
- c. In open countryside?
- d. Flying near an airfield?
- e. Flying over a city?
- f. Flying over open country?
- g. Other _____

27. What were you doing at the time you saw the object, and how did you happen to notice it?

walking the dog.

28. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

28.1 What direction were you moving? (Circle One)

- | | | | |
|--------------|--------------|--------------|--------------|
| a. North | c. East | e. South | g. West |
| b. Northeast | d. Southeast | f. Southwest | h. Northwest |

28.2 How fast were you moving? _____ miles per hour.

28.3 Did you stop at any time while you were looking at the object?

(Circle One) Yes No

29. What direction were you looking when you first saw the object? (Circle One)

- | | | | |
|--------------|----------------|--------------|--------------|
| a. North | c. <u>East</u> | e. South | g. West |
| b. Northeast | d. Southeast | f. Southwest | h. Northwest |

| a. North | c. <u>East</u> | e. South | g. West |
| b. Northeast | d. Southeast | f. Southwest | h. Northwest |

31. If you are familiar with bearing terms (angular direction), try to estimate the number of degrees the object was from true North and also the number of degrees it was upward from the horizon (elevation).

31.1 When it first appeared:

- a. From true North _____ degrees.
- b. From horizon _____ degrees.

31.2 When it disappeared:

- a. From true North _____ degrees.
- b. From horizon _____ degrees.

32. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the *same* curved line to show how high the object was above the horizon (skyline) when you *last* saw it.

33. In the following larger sketch place an "A" at the position the object was when you *first* saw it, and a "B" at its position when you *last* saw it. Refer to smaller sketch as an example of how to complete the larger sketch.

34. What were the weather conditions at the time you saw the object?

34.1 CLOUDS (Circle One)

- a. Clear sky
- b. Hazy
- c. Scattered clouds
- d. Thick or heavy clouds
- e. Don't remember

34.2 WIND (Circle One)

DATE May 4, 1955

I have seen 3 separate incidents, two with the red, flashing light and the small white light, and one involving a bright flare-like white light.

(1) I was driving home from a friend's house when I saw 2 of the flashing red lights in a valley into which the road led. Thinking the lights belonged on a helicopter I went to see why they were so low. When I arrived near the spot where the lights were, I found there were two separate things. Being noisy, I stopped the car and the one light came toward me while the other moved away. The first light then passed over the car, with no noise, and started to pick up speed. I started to chase it to get a better look, but that was futile. This occurred last fall and I just dismissed it, although the object passed overhead not more than 100 ft. with no noise.

(2) A friend and myself were driving near [REDACTED] when we saw a single object such as I had seen

The first time flying over a hill, I told my friend of my previous experience and we gave chase. Topping the hill we saw the flashing light on the adjoining valley below the crest of the hill. It was heading in a general southerly direction and after watching for several minutes we again gave chase, this time with no success.

(3) After a time the above we were out looking for more of the same when we saw a bright white light suddenly appear and then and remain stationary for three minutes (approx) and then dim slightly and start to move in a northerly direction, and as it dimmed more and more it disappeared over the horizon in a twinkling of an eye. There was no beam such as aircraft landing lights would produce and again no noise even though it occurred less than an estimated mile away.

DATE May 4, 1955

1 The first night I saw the small lights. I was driving along with Ken Myers. We came along this one particular road and then pointed out this brilliant white flashing light with a small white fluorescent light below it. We went up the road further. In the top of the hills. The light had past the point we were standing but was in view. Its path was an arc. Its speed varied also the speed of the upper light varied according to the light's speed. There was no sound of any kind at all. We were within 100 yds. to 150 yds. Its altitude varied from 50 yds to 100 yds at the most. We had it in sight for between 2 to 4 minutes.

2 The next time I saw it was about a mile later. It was following the same path at the same time. The following Thursday we were looking on road and saw a large brilliant white light that hung in the air. There were smaller brilliant white light around the main white light. The lights remained in its position for a few minutes and started to move. The large white light moved as the object moved. The more the light moved the faster it moved. When it got as small as the other lights it was going at a tremendous rate of speed.

3 The last time I saw anything I had 2 friends with me. Their names are listed here. It looked like the lights I mentioned in 2.

It was within 1000 yds and about 500 yds high. It also followed an arc, but curved as low as the little ones. The light was the same color as mentioned. No more around.
