14. Did the object disappear while you were watching it? If so, how?

There were a total of 13 objects, one which was clearly seen to come from somewhere near center of moon (was full moon at time) with fantastic speed and suddenly stopped about 300 ft up from ground, changed color and silent for 5-10 minutes, then took off suddenly with burst of speed, disappeared and vanished, then suddenly two more of 6 round bright white objects appeared and they were seen near moon and 300-350 ft up at an angle over a window.

15. Did the object move behind something at any time, particularly a cloud?

(Circle One):

Yes

No

Don't Know.

IF you answered YES, then tell what

it moved behind:

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One):

Yes

No

Don't Know.

IF you answered YES, then tell what

in front of:

The moon which was full at the time of sighting which was night time and 100% clear sky.

17. Tell in a few words the following things about the object:

a. Sound

None

b. Color

one object oval shape seen from side cherry red + yellow color, all others - bright white.

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

of the first object about 1/2 would've been covered, but not sure of others as moved too swiftly 3 sec and was hard to count. No. of objects, was seen in sight a few seconds but would guess about 1/2 would be covered of each object. p.s. since 1952 have seen many U.F.O.s, some with + with out witnesses such as a disc, a real blue print copy of the famous white one below saw on May 10, 1954 in Miami Florida in N.W. sky, seen by 3 silent, appeared made a 90° angle turn, vanished, bright, then stars, direction W.N.W. from window. Know cause appeared in N.W. sky at that time and still there.

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails.

Place an arrow beside the drawing to show the direction the object was moving.

20. Do you think you can estimate the speed of the object?

(Circle One)

Yes

No

IF you answered YES, then what speed would you estimate? _____

21. Do you think you can estimate how far away from you the object was?

(Circle One)

Yes

No

IF you answered YES, then how far away would you say it was? _____

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

The round white object - like a flat small saucer
the first object - like a huge foot ball with a dome on top
center.

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you first saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you last saw it. Place an "A" on the compass when you first saw it. Place a "B" on the compass where you last saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

29. IF there was MORE THAN ONE object, then how many were there? 13 total

Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

forget day and date - but saw one football-shaped object like this one over Miami, Florida; very high - clear sky, many witnesses, was in South section moving slowly towards South west vanished, silent, clearly outlined & red, many stars on right about 1 minute & summer 1954 at night about 11:30 - 5:00 p.m. would be about head helicopter length would cover object.

24th July 1964
 Day Month Year

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

Object made no noise at any time or left smoke trails during entire time of sighting.
 Other 12 objects moved much too swiftly to tell accurately of height or distance or size of objects.
