SUMMARY: (Enter concise summary of report. Give significance in final one-sentence paragraph. List inclosures at lower left. Begin text of report on AF Form 112—Part II.)

1. On Wednesday, 25 May 1955 at 22:15 Mr. [REDACTED] Photo Repro Unit, Board of Trade T.O. 2 London stood in public passage way overlooking gardens adjacent to Dydney Road, London N-8 (North Haringay Sector of Borough). Mr. [REDACTED] just returned by bus from a walk and had on hand a pair of 8 x 30 fieldglasses (Prismatic).

Glancing (without the glasses) at the north-west sector of the sky he saw, what he identified as an American four engine bomber "which was engaged in a routine exercise flight at approx. 28,000 ft". The bomber's path of flight was south and slowly turning west, followed by four distinct vaportrails.

Simultaneously he observed (still with naked eye) to the left (west) of bomber an UFOB, the size of a hat pin. "This object outclassed any aircraft I have ever seen both in speed and flight characteristics, that also applies to guided missiles" was Mr. [REDACTED] own statement.

He then used his fieldglasses, thus enlarging the UFOB to the size of a good sized pea. He stated that with glasses, the bomber appeared $\frac{1}{2}$ inch, in size. The UFOB, clearly circular in shape, appeared as a round disk and was amber red in color. There was no vapor trail, as the UFOB approached the vicinity of the bomber at a very high speed.

In the first 3 seconds the UFOB suddenly stopped at an approximate altitude of 30,000 ft. and hovered almost directly overhead (and slightly to NW) for approx 2 $\frac{1}{2}$ minutes in the next 3 seconds it veered sharply to the north (away from the bomber, in the glasses approx a distance of 3 inches) and just as suddenly reversed it's course towards the bomber. About a second later it started off in a flash towards the west and in an incredibly fast speed it flashed across the sky and disappeared in distance (west) about 3 inches above horizon. Total time of observation 3 minutes, 10 seconds.

Enclosed Report of Mr. [REDACTED] is self-explanatory.

2. This estimate reflects information obtained voluntarily from Mr. [REDACTED].
3. In the opinion of the Reporting Officer Mr. [REDACTED] is a pleasant and well informed Britisher of some 28-30 years of age. He is single and an ardent believer in "Flying Saucer" Theory. He is a member of the British Flying Saucer Bureau of London. His report of this organization's Form is inclosed. He was definitely biased in his statements and positive that the UFOB was a Flying Saucer. This was his third sighting over a period of 9 years.

27. Give account of any other details

THE MOVEMENTS OF THIS OBJECT WERE DELIBERATE AND INTELLIGENTLY CONTROLLED. IT WAS SOLID, CLEAR CUT, AND HIGHLY SELF LUMINOUS IT WAS A DISC IN SHAPE, AND COULD NOT UNDER ANY CIRCUMSTANCES HAVE BEEN A METEOR, SHOOTING STAR, AIRCRAFT AS WE KNOW IT, OR BALLOON. IT APPEARED TO BE SURVEYING THE BOMBER.

28. Sketch Map of Locality of Sighting

Please draw a sketch map of the locality of the sighting shewing (1) Your exact position (2) The direction in which the Object (a) Appeared (b) Disappeared from view and (3) The direction of its course.

In order that we may locate the place on our Ordnance Survey Maps, please shew roads, towns, and villages within a radius of One Mile, also principle Buildings and Landmarks.

To the best of my knowledge and ability this is a true account of what I saw.
