10. BRIEF SUMMARY OF SIGHTING One, disk-shaped object, like anemery wheel, silvery-white incolor, appeared to the observer for a period of six seconds. Object traveled a circular flight path from E to N at an extremely fast rate of speed. The obj was estimated to be approximately 230 ft in diam.				11. COMMENTS Four trails could possibly contrils and the speed of object could be attributed to reflection of sunlight. A check with COC Weather at ADC revealed there were no temperature inversins at time of sighting. Observer possibly saw the reflection of sun off a high flying jet a/c and contrails of jet a/c.
