SUBJECT

UFOB

SUMMARY (Enter concise summary of report. Give significance in final one-sentence paragraph. List inclosures at lower left. Begin text of report on AF Form 112a.)

I. CONTENTS:

PART ONE: Description of Sighting by Mr. [REDACTED], Le Grand, Iowa, Farmer.

PART TWO: Description of Sighting by Mr. [REDACTED], Marshalltown, Iowa, Service Station Attendant, Shell Oil Co.

PART THREE: Supplementary Investigative Efforts.

PART FOUR: Comments of Preparing Officer.

II. SUMMARY: Objects were sighted by Mr. Robert [REDACTED] at GOC NAN MIKE 1-5 BLACK post at Le Grand, Iowa (GEOREF FJNN 1401). Mr. [REDACTED] telephoned the GOC post at Marshalltown, Iowa (GEOREF FJNN 0504) on 5 Sep 55, and contacted Mr. [REDACTED]. Mr. [REDACTED], 39, had the objects in sight for two (2) hours and fifteen (15) minutes. The objects were in three (3) different quadrants. Mr. [REDACTED] 42, sighted only one of the objects and had it in sight for one (1) hour and fifteen (15) minutes.

2A-JFOB-3-55

I. SOURCE:

Marshalltown, Iowa

Occupation: Service Station Attendant

Qualifications: GOC Observer Approx. 3 Months

II. RELIABILITY: Reliability of Source could not be determined.

III. SOURCE'S DESCRIPTION OF SIGHTING: Source received a telephone call from GOC post at La Grand, Iowa informing him of three (3) objects in different quadrants of the sky. Source observed only one (1) in the Northeast section. It had a steady green light with what appeared to be a flashing red light on it. The object did not appear to move at any time. The object was approximately thirty degrees (30°) above the horizon and when Source went off duty it still appeared to be in the same place. Source observed the object from 0445Z to 0600Z. The red light flashed at one (1) second intervals. Source stated object was fifty (50) feet in all dimensions. Source also stated the object appeared to be the size of a pea held at arms length but shape and distance from observer could not be determined. Source's point of observation was on top of a hotel. Source stated that there were high broken clouds and a slight haze over city.

Flight 2-A, 4602D AISS

2A-UFOB-3-55

I. SOURCE:

Le Grand, Iowa

Occupation: Farmer

Qualifications: Three Years GOC Post Observer

II. RELIABILITY: Source is a college graduate (Liberal Arts) and appeared to be very truthful in all answers and opinions.

III. SOURCE'S DESCRIPTION OF SIGHTING: Source noticed RED and GREEN flashing light in the Northeast approximately thirty (30°) degrees above the horizon. Distance object was from observer could not be determined. Source could not describe the shape of the object other than it appeared to be a light in the distance. Source observed the object for a total of two (2) hours and fifteen (15) minutes and in this time the object appeared to move from the Northeast to the Southwest very slowly and fade from view. Object appeared to be the size of a pinhead held at arms length. Observation made through seven (7) power binoculars did not reveal any other details. At the same time of the above sighting Source discovered two (2) more objects. Except for direction, the above details apply. The second appeared in the East and moved slowly to the West south west. The third appeared in the Northeast and moved slowly to the East South East. The objects were still in view when the Source quit his post. (0600Z) Source stated he had been observing these objects every night for a period of five (5) nights. Objects are first sighted anytime between 2330Z to 0330Z. Usually the one in the Southwest comes up first. Weather conditions on the night of these particular sightings was good. The sky was clear and the winds were calm. No storms were reported in the near area.

SUPPLEMENTARY INVESTIGATIVE EFFORTS:

1. This UFOB was assigned to this Unit for investigation by Hqs, 4602D AISS. The initial report was obtained from the D/I 31st Air Division.

2. A thorough check was made of all research agencies in the Minneapolis area. There were no balloons from any of these agencies over Iowa at the time of the sighting. It was also noted that balloons from all these agencies carry only a flashing red light, and none carry a green or white light. "Moby Dick" balloons carry a white light. Further investigation brought out the fact that the lights on the balloons are of the type employed on the wing tips of aircraft and could not be observed from the ground if the balloon were over 10,000 feet away.

3. The U. of Minnesota observatory found nothing in their logs to indicate anything unusual on the night of the sighting.

COMMENTS OF THE PREPARING OFFICER

1. It is the opinion of the preparing investigator that the sighting was a star or planet for the following reasons:

a. Continued observation of the morning star and/or a planet could produce the effect of the green and red lights. One observer saw a steady green light with a flashing red. The other observed a flashing green and red with no steady interval.

b. The lack of or almost lack of motion could be explained by the earth's rotation.

c. Investigation discovered no balloon nor astronomical activity that would account for the sighting.

for + in the absence of
Edward M. Healy w/Sgt.
WALTER E. SAMPSON
2nd Lt., USAF
OIC F2A

COMMENTS of Approving Officer:

Concur with the opinion of the Preparing Officer that this sighting was astronomical in nature, probably caused by a star or combination of stars for the reasons listed above coupled with the fact that the objects were seen for a period of five successive nights.
