MEMORANDUM FOR OFFICE OF THE SECRETARY OF DEFENSE
ATTENTION: Assistant for Civil Defense

SUBJECT: (U) Sighting of Unidentified Flying Objects

1. Reference is made to your letter, Subject: "Unusual Phenomena", dated 23 February 1956, to The Secretary of The Air Force which was referred to this office for action. We, in-turn, assigned action to the Air Technical Intelligence Center.

2. Inclosed is a copy of the reply to the correspondence, as requested for your files.

Mr. ~~W. H. H. H.~~
~~W. H. H. H.~~
Fremont, Nebraska

Dear Mr. ~~H. H. H.~~

The information concerning your sighting of an unidentified flying object in December 1955 has been forwarded to the Air Technical Intelligence Center for reply.

Your letter report and illustrations has been studied with interest; however, additional information is needed in order that a complete analysis of the case may be made. It is, therefore, requested that you fill out and return the inclosed technical information sheet for that purpose.

You may be assured that your interest in this program is greatly appreciated.

Sincerely,

Dear Mr. Tilley:

We enclose herewith material which was forwarded to this office by the State Game and Forestation Commission, which they received from a man in Fremont reporting the sighting of an unidentified object.

General Henninger has seen it, and states that inasmuch as this party appears to be very sincere, we should forward it to your office.

Very truly yours,

Austin S. Bacon

Eerie Fireball Seen Again at Ord

The second appearance of a float-
ing fireball has been reported at
Ord and a mysterious colored light
has been reported near Fremont.

Two Burwell women, Mrs. Gla-
dys Rose, teacher at Taylor and
Mrs. James Cunningham were
driving on Highway 11 near Ord
about 9 p.m. one evening recently.

Here is Mrs. Rose's story as re-
ported by the weekly Ord Quiz:

"We were driving fairly slow
about 35 miles an hour and had
just passed the Ord cemetery.

"As the car approached a corn-
field on the extreme south limits
of the Evelyn Sharp airport, I saw
a molten orange ball raise out of
the cornfield and soar in a grace-
ful arc across the highway.

"I immediately turned to Mrs.
Cunningham and said, 'What did
you see?'

Mrs. Cunningham answered: "I
saw an orange fireball cross the
road."

Grapefruit-Size

The women said the fireball was
about the size of a large grape-
fruit and soared across the high-
way and then went out.

"It was visible through the wind-
shield all the time it was in flight.
Mrs. Cunningham and I estimated
it was about as high as a tele-
phone pole and a half," said Mrs.
Rose. It was estimated 75 feet
from the auto and made no sound.

She said she wasn't frightened,
"but we just couldn't figure it out."

Later they went back to inves-
tigate but found nothing.

This is an artist's conception of the fireball two Burwell
women saw near Ord.

Last summer Don Wiberg, an
Ord High school youth, said a
mysterious glow in Mira Valley
near Ord chased his auto while
returning home from Loup City
a b e u t midnight. Something
stampeded a herd of cattle through
a corral fence the same night
along the road.

A White Light, Too

On the same night Wag Homes of
Fremont said he saw near Oak-
land a large white light which
later blinked on and off in colors
of red, blue and white. He said he
was driving on Highway 77 from
Lyons to Oakland when he spotted
the light to the west. He estimated

it was two miles away and about
100 feet off the ground.

Homes said he drove back to
Oakland, got his brother, and re-
turned. They spotted it south of
where it was originally seen and
drove toward it. The light disap-
peared again so the two headed
back to Oakland. When they got
almost to Oakland they saw the
flashing colors again to the east of
Highway 77 and over a hill.

Homes got other witnesses to
watch the light. Then he said it
went up into the sky. He said it
made no noise.

The next night, he said, he saw
the same light again for about 30
seconds west of Oakland.

Jan. 1, 1956

~~San Francisco, Calif.~~
Fremont, Neb.

Dear Sirs,

I am writing you to find out more information about a certain thing I saw, Dec. 30-31 1955. I was traveling from Lyons, Neb. to Oakland, where I used to live, on my way I see in the west a large white light low approx. 100' or less above the ground not moving that I could tell when I got to Oakland I went a mile south of town and drove down a road stopped and here I could see this light it was blinking Red, blue and white, I est. its distance away at about 2 miles from where I was and about 100' high or less it was blinking and not moving. I went back to town got my brother we went out there and it was gone, before it had not moved as I could tell, we looked south further and we saw it down south very low it was moving so we headed south on U.S. 22 for about a mile and cut over on a country road

but we never saw anything so we
headed back towards town by following
the country roads when we got over with
the city dump I looked towards some hills
in the east and there it was very low
above this one hill my brother saw it
to, and three or four others who I went
and got will look me up. We watched the
only way it went was up. While it
was very low the brightness of its blinding
light could be seen better than after it
got up higher, blinking Red, blue, and white.

Could you please tell me what this
could have been as we are all around
my house out at Oakland wondering what it
was.

Sat. night I saw it in the west
up by cabland again at about 12:30 at
night. I only saw it for about 30 sec.
but the light was the same Red, blue,
and white only the blue was sort of a greenish
blue this time. There was no sound at all.

I hope you can tell us what this
was. Some say it was a Helicopter others
say a star but I am not sure. Do stars
blink? Helicopters would make a noise.

Enclosed find a diagram of how it was
seen both nights.

Thank you very much for
any information you have.

~~Yours,~~

~~Wm. H. Wood~~

1. This office has received many inquiries from individuals and UFO clubs requesting the Air Force evaluation of UFO reports, some of which the Air Force never received. The time required to honor such requests would prevent the office staff from performing their primary duty of analysis.

2. The Air Force viewpoint concerning so-called "flying saucers" is well known. No evidence has been found to prove their existence.

3. The following sightings referenced by Mr. Kaiser, were not received by this office:

- a. 15 Dec. 1955, Cambridge
- b. 3 Jan. 1956, Pasadena
- c. January 1957, Florida

Many such sightings are reported to newspapers, UFO clubs, or to individuals and never reach the Air Force.

Office Of The Secretary Of Defence
Washington 25, D. C.

Sirs:

Please send me affirmation that the following reports of Unidentified Flying Objects are, or are not Flying Saucers and if not, why.

December 15, 1955 .- Cambridge, - At 5 p.m. a girl of 12 saw a " huge round object, spinning around, and humming." The object seemed to be giving off a white light.

At the same time the girl's 25 year old brother some miles away reported seeing a " brilliant object in the sky. "

METALLIC FRAGMENTS SPRAY OVER

Case 127, Yakobu, Vatulele, Fiji Islands, reported December 27, 1955—Whatever the origin and purpose of the fireball and its inexplicable behavior, i.e., much like a ranging missile, we look searchingly to other relative events for a possible clue. Such a clue may be found in the report reaching us from Suva in the Fiji Islands. The Auckland Star, December 27, '55 reported, "During a lightning storm, the village of Yakobu, in Vatulele, was showered with metallic fragments of all sizes. Nobody was hurt. A possible explanation, said the Star, 'was that a meteorite exploded at a low level, causing a flash thought by the islanders to be lightning. Such an explosion could have caused a shower of meteorite fragments. Samples of the metallic shower are to be sent to the Fiji Mines Department.'"

Harold Fulton, of C.S.I., New Zealand, who sent CRIFO the news item, noted, "I am writing to Vatulele authorities for samples of the metallic shower." Perhaps remote, in connection with the Fiji incident, but not so remote by nautical miles is the bizarre affair of the Joyita. This 70 ton cruiser, which steamed out of Apia in Western Samoa for the Tokelau Islands Oct. 2, 1954, had 24 people aboard, but for some mysterious reason the vessel did not reach the Tokelau. It was found on November 10 "wallowing lifelessly in a light sea" reported Life magazine, but no one was aboard. Unaccountable was the burned-out semi-circular section on topside. We have no way of knowing, but the Joyita may have experienced a similar "lightning storm" like that over Yakobu.
