REMARKS: (General description of what you saw--use back if necessary)

There were 1500 of them 50 squads
with 10-15 saucers. There was one stationary
saucer. It remained still for 15-20 mins.
It looked like they they came from Venus
or from behind the planet. Every time
I look at Venus I see little lights on or
around the planet.

Dear Sir:

I am sending you a report on flying saucers. You may not think much about it. If I had a pair of field glasses I could tell you more. Could you clear some intelligence reports on flying saucers, and could you send me some pictures, I might be to identify the saucer I saw. Could you send me your picture and twining, one large enough to fit in my billfold.

yours truly,
