| 10. BRIEF SUMMARY OF SIGHTING<br>Two round, yellow-white objects approximately 15 feet in diameter as viewed through binoculars. Moved slowly in circles and in sight for 5 hours. Observed to the south at 30 dgrs elevation then moved slowly to the west. One object at 90dgr azimuth other at 180 dgr. |  |                                                                                                                                                                                                             |  | 11. COMMENTS<br>Observation of Mars in East and possibly Altair to south.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |  |
