10. BRIEF SUMMARY OF SIGHTING One oval-shaped object appearing as a brilliant light with a thin bright tail with a green light. Object was very small. Object was initially sighted at 180 dgrs azimuth; 45 dgrs elevation, and traveled a straight course to 360 dgr azimuth; 60 dgr elevation. Object was viewed visually for 30 minutes and disappeared by fading out of sight. Time, duration, description, & position indicate Mars. Evaluated as astro body due to contradictory info of source		11. COMMENTS ATIC Form 164 was sent to source on 16 Aug 56. Information fm completed form conflicts w/ initial rpt on the following points: 1) Obj was observed for 1 hr 55 mins & still visible when observer stopped watching. 2) Obj moved fm 160° azimuth; 35° elevation during the observation. 3) Source say obj at one time traveled at high speed to W and returned.
