10. BRIEF SUMMARY OF SIGHTING One round (like a star), cream colored object size of a pea at arm's length. Object looked like a star and left no trail. Object was seen at 60 dgr elevation and azimuth of 180 dgr. Object disappeared in the same direction. Obj was observed visually for 1 and $\frac{1}{2}$ seconds.				11. COMMENTS Sighting conforms to the criteria for a meteor evaluation. Duration, description manner of disappearance indicate cause of sighting was astronomical (meteor).

10. BRIEF SUMMARY OF SIGHTING 1) Ten bluish-green objects similar to birds in shape and the size of a matchhead at arm's length. Objs got dimmer & faded. Objs were observed visually for approx ten seconds. 2) 20-30 bluish green round objs size of a matchhead at arm's length. Objs at first formed a spread V formation, then into a tighter V formation. Objs came out of clouds, moved on a straight & level flight path fm NE to SW at speed faster than jet. Objs disappeared into hazy clouds after having been seen visually for five to eight seconds.				11. COMMENTS Description, size and shape of objects indicate sighting caused by a flight of migratory birds.
