10. BRIEF SUMMARY OF SIGHTING One bright round object, and one dark round object "in upper right", both the size of a pea at arm's length. Objects were first seen at 45° elevation in the east and disappeared very high in the East North East after having been seen visually and through binoculars and telescope for 2 hours 25 minutes.		11. COMMENTS Although this sighting indicates a Astronomical hypothesis, ATIC Form 164 was sent to Source on 9 Jan 57 to obtain exact course of object. Results of analysis of returned form will be indicated in the Monthly UFOB Summary.

2 December 1956
San Luis Obispo, California

Case 278, San Luis Obispo, Cal., Dec. 2, 1956—Reported the San Diego Union, "Five mysterious lights were seen in the sky. One observer said they were too bright to be stars. Three policemen and a newspaper reporter watched the lights for 45 minutes and described them as having a pulsating red glow, then changing to blue and finally to white."⁷

Ed. San Luis Obispo made news in November when it was selected as the site for Mon-Ka the Martian to contact earthlings from his saucer. Saucerites claim that saucers did appear over San Luis Obispo on the designated date, but authorities counterclaimed that the objects seen were balloons. However, the predicted radio contact never took place—and the affair was tagged a hoax by most civilian researchers. With so much emphasis put on San Luis Obispo, it seems in line that other sightings, such as the one of Dec. 2, should take place and be publicized.

Case 277, Baltimore, Md., Dec. 3, 1956—Quoting the Baltimore Sun, "Two men reported they saw a flying object streak away from a large transport plane while they were standing at Charles and Centre Streets. Curvin Bush and Robert Bryant, guards at the Walters Art Gallery, said, 'We thought at first the tail or a section of a wing had broken loose. But then the plane reversed its direction from northeast to southwest to follow the thing.' They said the object was 'flat, oval-shaped and very bright.' It appeared to be spinning counterclockwise. They said they watched it until it disappeared behind a building. . . ."

Case 279, Stow, Ohio, Dec. 4, 1956—Investigator, Herbert Clark, now residing in Akron procured the following report for CRIFO, but did not get permission to use the sighter's name. Writes Clark: "Time, 11:55 p.m. Sighter . . . former Marine sergeant. Sighter looked overhead, saw reddish object, 'flying much faster than a jet'—flying NE, very high, no sound. Object appeared size of a star. Two objects at approx. one to two second intervals, came out at 90° from first object. This would make them flying to the NNW. Disappeared quickly. Main object remained on course until it disappeared from view. Entire incident, according to sighter, occurred in approx. 6 to 8 seconds." Comments Clark, "From what I could gather in the conversation, the witness seemed reliable. However, I have to wonder about the time sequence."

Case 280, Patrick AFB, Florida, Dec. 11, 1956—

Writes a correspondent whose name we will not use,

~~Today a rocket was fired and it went quite away~~

~~upstairs. On the return flight a jet was covering the~~

photos, and out from behind the rear bounced two saucer

type ships at 25,000 feet. Through 7 x 50 glasses they

were bright and gleaming—as the sun on a bright day.

One was 400 feet to the rear and the other farther back

and both traveling at 4500 or faster speeds. . . .

CRIFO's correspondent goes on to tell of the objects

making a 90° turn—and the jet trying to turn with them,

but without luck. He comments, "The machines left him

(the jet) holding his hand."

31 December 1956
Washington Heights, N.Y.C.

December 31, 1956. [REDACTED], who lives in Washington Heights, N.Y.C., noticed an exceptionally bright light from his 8th floor window at 11:35 p.m. Busy at the moment, he paid little attention until the intense brightness made him look out the window, which faces north and commands an unobstructed view of the Hudson River. The object was spherical, white with a faint tinge of green; its edge was sharply defined. At the rear was a tail-like projection, inclining slightly upward. This "handle" was as long as the diameter of the main object, and about half as thick. The entire object, including "handle," was as large as the full moon, and far more brilliant; its brightness lit up the river beneath it. It left no trail. The "handle" definitely seemed to be part of the object. There were no wings, "windows," or other structural features visible.

When first seen, the object appeared to be directly over the river, north of the George Washington Bridge, traveling westward at about twice the speed of an airliner as it passes over the same area at a normal altitude. Its elevation was estimated at 30° to 40°, and Mr. [REDACTED] had the impression that its altitude above the river was only about 1000 feet. When the object reached a point about 20° above the Jersey Palisades, it petered out, "like the closing down of a camera diaphragm." Mr. [REDACTED] is sure it did not disappear at high speed into the distance, but simply shrank and "went out." About 10 seconds elapsed from the moment the light was noticed through the window until the object finally disappeared; the object itself was under good observation for about four seconds. No other aircraft in the area; no noise heard; as yet, no confirmatory reports.

The resemblance to the [REDACTED] object will be noted.
