PAGES

1. Description of the Objects:

- Shape: Derby Hat.
- Size: Basketball.
- Color: White.
- Number: None (1).
- N/A
- Details: See Incl. No. 1.
- See Incl.
- Sound: Low growling sound.
- See Incl.

2. Description of course of object:

- Brought to the attention of the observer by the barking of dogs.
- Angle of elevation: Overhead.
- Angle of elevation upon disappearance: Vertically and slightly North East.
- Description of flight path: Hovering.
- Manner of disappearance: In to clouds.
- Time of sight: Unknown.

← equal to determine what a/c, balloons, other activities in the area at that time

3. Manner of observation:

- Ground visual:
- Optical aids: N/A.
- N/A.

4. Time and date of sighting:

- Zula time and date: 1900Z, March 6, 1957.
- Light conditions: Day.

5. Location of Observer: Negative.

6. Identifying information:

- Civilian name, age, mailing address, occupation: Asst. Gregory
(1) Name: [redacted]
(2) Age: Unknown ← young girl or adult.
(3) Mailing Address: Wingover Shooting Preserve, Great Meadows, New Jersey.
(4) Occupation: Housewife.
b. Military: N/A.

7. Weather and winds-aloft conditions:

- Observer account of weather conditions: Clear under low overcasts.
- Negative ← Winds? Velocity?
- Ceiling: 500 feet ← the ceiling was broken — and the sky was clear with clouds — but could not be seen, and possibly the ground?
- Visibility: Clear.
- Amount of cloud cover: Complete.
- Thunderstorms: Negative.

8. Any other unusual activity or conditions: Negative.

9. Interception or identification action taken: Negative.

10. Location of any air traffic in the area at time of sighting: Negative.

11. Position title of the preparing officer: Field Training Officer, Det. No. 3, 4670th Ground Observer Squadron, 200 E. State St., Trenton, New Jersey

12. Existence of physical evidence, such as materials and photographs: Negative.

March 13, 1957

U.S. Air Force Filter Center
State Street
Trenton, N.J.

Dear Sirs:

I have learned (belatedly) that your office is the proper place to report the sighting of an unidentified flying object described in the enclosed affidavit by my wife. This sighting is also being reported to Civilian Jaucer Intelligence in New York City which, we understand, is the recognized non-military agency currently concerned with such matters. (If CJI is not so recognized, please let me know, and tell me what agency is more appropriate.)

We would be most interested to know whether my wife's experience tallies in any respect with any sighting(s) by any one else in this area (Warren Co.) on or about March 6.

We wish absolutely no publicity for ourselves in this connection. Our calling [redacted] of High Bridge (mentioned in the affidavit) arose from the pure coincidence that I, as a free-lance writer and reporter, had been investigating the fantastic "Menger story" for some weeks just prior to Mrs. Martin's experience. We have given her data to other investigators of Menger, one of whom (Richard Harster of the Newark Evening News) will probably contact you presently. He is documenting and evaluating UFO reports of recent years in this area. He already has our data, in confidence, and is most welcome so far as we are concerned to any information you can give him in connection with it.

Sincerely yours,

Mar. 6 - Warren County, W. New Jersey - 2pm - Huge, white UFO (shaped like a Derby Hat) hovering low over field, with shimmering ray(s) below. Had a rocking-motion, undulating-rumble sound. Finally shot skyward & NE. Dogs barked (Familiar?). (Seen by Mrs. [redacted])

March 11, 1957

AFFIDAVIT by [REDACTED]

Even at the risk of being called hysterical, hallucinated or worse, I feel I must make record, on my oath as a woman, an American and a member of the human race, of the following:

That I saw an airborne object which bore no resemblance to any airplane, helicopter or balloon ever made and flown by man, so far as I know.

That I was in full possession of my senses and my sanity at the time, and all during the time, of my seeing this object, which lasted for at least one minute.

That I saw the object at a distance of not more than 150 yards at about 2 p.m. on Wednesday, March 6, 1957, first from a rear window and then from out in the back yard of our home on the road from Great Meadows to Hope, New Jersey.

That the weather was clear under a low overcast, and the position of the object hovering in the air over the slope below our house was such that I could see it--and hear it--with absolute certainty and with concentrated effort to observe and remember every detail.

That my attention was first drawn to the object's presence by our dogs barking in their pens behind the house, and by their looking upward at the object, as they and I continued to do steadily until the object departed.

That the shape of the object closely resembled that of a huge derby hat, with a rounded dome-like crown 30 to 40 feet high and at

Cannot locate
either piece,

detailed
Road-M. Weekly
M.S. Standard.

least 50 feet in horizontal diameter, above a slightly curled-up "brim" that extended outward for 12 or 15 feet from the bottom of the crown. This brim or bottom surface of the object appeared to be sealed over smoothly and completely, in a gentle curve, with no holes or ports or windows or vents of any kind, of which I could see none anywhere else on the entire object.

That, in the absence of any openings ^{into} ~~it~~ it, I could see no beings, human or otherwise, inside the object who might be operating and riding in it, and no crew or passengers were visible on the object's exterior during its visit.

That the color of the object, all over, was a uniform white, dull but clean, with no spots, stripes or other markings whatsoever. Its texture was apparently non-metallic but reminded me strongly of pipe clay.

That a moderate breeze, from the northeast I think, was blowing in which the object hovered quite stationary except for a gentle rocking motion, like a boat at anchor on water. As the object rocked and in the same cadence it made a low growling or rumbling sound that rose and fell irregularly.

That beneath the object, extending vertically toward the ground, I seemed to see, and then not see, and then see again, a lot of streamers or lines of some material (or force) that twinkled like the fragile strands of tinsel with which one decorates a Christmas tree.

That without any marked change of sound except a soft rush of air, sucking away and not blowing toward me, the object abruptly ascended almost vertically, slightly northeasterly, at immense speed into the thick cloud cover (maybe 500 feet up) and was instantly

March 6, 1957. On Wednesday, March 6, 1957, at about 2 p.m., Mrs. [redacted] wife of a well-known writer and former editor of [redacted] magazine, saw an unearthly object hovering low over a field behind her house. The Martin property is situated on the eastern slope of the Jenny Jump ridge in Warren County, western New Jersey, and the house, on Shades of Death Road, commands a glorious view from the rear of the Great Meadows valley, to the east.

On the day in question, the sky was overcast, with a ceiling that grazed the 1100-foot summits of the Jenny Jumps. Mrs. [redacted] was talking on the phone when she became aware of a commotion from the hounds in their pen in the back yard. Hanging up, she went into the den to see what was disturbing them - as the weather had been warm, a neighboring farmer had already turned his cows out to pasture, and she was afraid that they might have wandered into her yard through a breach in the fence. Looking out through the den window, which faces due east, she saw the dogs clustered in the corner of their pen closest to the adjacent field; and hovering over this field, somewhat to her left and about 10 to 15 feet above the ground, was a huge, white, derby-hat-shaped construction. Mrs. Martin immediately ran outdoors to the end of the yard, facing the field.

"The shape of the object closely resembled a huge derby hat, with a rounded domelike crown 30 to 40 feet high and at least 50 feet in horizontal diameter, above a slightly curled-up 'brim' that extended outward for 12 to 15 feet on each side of the bottom of the crown. This 'brim' seemed to be sealed over smoothly and completely in a gentle curve, with no holes or ports or windows or vents of any kind."

"The color of the object was a uniform white, dull but clean, with no spots, stripes, or other markings whatsoever. Its texture was apparently non-metallic, and reminded me strongly of pipe clay."

The object was hovering almost stationary over the field. The witness described a gentle rocking motion from right to left, "like a boat at anchor in the water." At the same time, she heard a low "growling, or rumbling" noise coming from the direction of the object; this noise rose and fell in cadence with the slight rocking motion of the device.

Underneath the base of the object was a continual display of shimmering, wavery "lines" or "rays" that extended vertically almost to the ground. The effect was similar to the tinsel which hangs on a Christmas tree, although the substance, whether of material or non-material nature (the witness thought it might be some sort of "light ray") was not nearly as well defined as Christmas tree tinsel. Mrs. [redacted] thought that there was really only one wavery "line" or "ray" that shimmered rapidly downward toward the ground and then disappeared, immediately reappearing elsewhere with such rapidity that it gave an impression of more than one of these "lines."

Mrs. [redacted] watched this thing for a total of fully a minute. Abruptly, then, the object rose almost vertically into the sky with a slightly northeasterly slant, at an "immense rate of speed." As it rose from the field, she heard

gone from sight and hearing.

Within an hour of my experience, my husband telephoned me from New York City. I told him what I had seen, and told him again in fuller detail when I joined him at 7.20 that evening in the city. At his insistence I later that evening repeated my account and answered many questions while my memory was still fresh, at the home and in the presence of Mr. & [redacted] Gilda [redacted] 35th Street, N.Y.C. I told my story/again to several other friends in the next three days (March 7, 8 and 9), but made no formal report to any authorities, fearing ridicule. The evening of March 9, my husband persuaded me to talk to [redacted] of High Bridge, N.J. whose reported recent experiences with unusual flying objects had interested us. But Mr. [redacted] and his wife were "away for a few days, resting", according to the woman who answered their telephone. She was unwilling to put us in touch with the wengers by long-distance phone unless we went to High Bridge and let her size us up. This we did not do, and we have not subsequently heard from the [redacted].

This document is the first and only written account of the peculiar object which I saw and heard. It is worded by my husband, [redacted] but has been read and reworded for accuracy by me, and I solemnly swear to every statement in it.

with "flying
saucer" objects.

a "soft rush of air, sucking away and not blowing toward me." During its ascent the base of the object remained horizontal to the ground, and Mrs. [REDACTED] did not see any vents, openings, or markings of any kind through which the "rays" she described could have come. In a matter of seconds, it had risen through the overcast clouds just above the mountain tops. The dogs stopped barking.

At the time of her sighting, Mrs. [REDACTED] husband was in New York City; he called her a short time after the incident and learned of it then. "I told him what I had seen, and told him again in fuller detail when I joined him at 7:20 that evening in the city. At his insistence I later that evening repeated my account, and answered many questions while my memory was still fresh, at the home and in the presence of Mr. and Mrs. [REDACTED], of New York City. I told it reluctantly again to several other friends in the next three days (March 7, 8, and 9), but made no formal report to any authorities, fearing ridicule."

Mrs. [REDACTED] was referred to CSI through the good offices of [REDACTED]. On March 24, for [REDACTED] and [REDACTED], she very kindly went over the details of the observation once again. It proved possible to estimate the size of the object, because Mrs. [REDACTED] had noted at the time that the left edge of the "brim" was framed by a dead tree at the border of the far side of the field, while the right "brim" was framed by a pile of dead undergrowth. Mr. [REDACTED] paced the distance between the two landmarks and found it to be 40 long-legged paces - 120 feet. The object was approximately 150 yards from Mrs. [REDACTED]. The base of the object appeared on a level with, or slightly below, Mrs. [REDACTED] eye-level (as the field slopes downward and to the left, the [REDACTED] back yard is on higher ground than the part of the field over which the object was hovering). The top of the object as seen from the yard rose above the tops of the Jenny Jump range to the northeast.

(This is one of the most detailed and definite sightings that has ever been reported to us, and the possibility of a mistake caused by some "conventional" object can be immediately excluded. It is always necessary, of course, to consider the possibility of deliberate invention, and in this connection it should be noted that Mr. [REDACTED] had very recently had his interest in flying saucers aroused by the Menger claims, whose falsity he soon detected. His wife's exceptional sighting just at this time therefore strikes one as an unusual coincidence, and one may think of the "H.O." episode. However, in the judgment of the Research Section, only a person sophisticated in the saucer literature could concoct a story whose details agree with, and yet differ from, existing observations in so convincing a fashion. It seems unquestionable that neither Mr. nor Mrs. [REDACTED] had at that time the background necessary to invent a tale like this, and our present feeling is that it should be accepted as a perfectly genuine and extremely informative observation of an artificial construction which obviously did not originate on this planet.)

SUBJECT: UFO Letters

TO: AFOIN-X1A

FROM: AFOIN-4

DATE: 8 MAY 1957 COMMENT NR. 2

1. Attached is information and other pertinent data upon which to base a reply to Mr. [REDACTED] letter. References will be by paragraph number, as pencilled in the margin of Mr. [REDACTED] letter.

2. This Center has no knowledge or record of the visits on 2 April with General [REDACTED] and Mr. [REDACTED] to which Mr. [REDACTED] refers, or of his letter dated 3 April. It is believed that any statements which might have been made by General [REDACTED] during the interviews have been misinterpreted, inasmuch as we feel certain that the Chief of the Air Force's Information Services is cognizant that the Air Force UFO program is now and has been continuously active for the past ten years.

3. Reference paragraph 3, Comment 1. This Center is in receipt of an Intelligence Report AF 112 in which Mrs. [REDACTED] reports a UFO, and includes a letter from Mr. [REDACTED] commenting on his wife's UFO sighting, see inclosure. There is insufficient data in Mrs. [REDACTED] report upon which to form any valid conclusions. However, it is significant to note that Mrs. [REDACTED] appears to have gone to some lengths to give her report some authenticity by rendering it into affidavit form. Your attention is particularly invited to the summary comment of the preparing officer regarding the Warren County Area.

Information Sheet

Upon which to base a reply to letter dated 15 April from Mr. [REDACTED]
[REDACTED] Each paragraph in subject letter has been given a pencilled number to facilitate reference to this sheet.

Par Ref

- 1 This Center has no knowledge regarding letters of 2 and 3 April, presumably on the subject of UFOs.
2. A full report regarding this case, with pertinent analyses and conclusions, was submitted to your headquarters under the personal signature of General [REDACTED] within 24 hours after a request to this Center for an investigation. Reference ATIC message EFTO A4-155, dated 14 March 1957. Case file was submitted to your office 8 April 1957, per your request in teletype message AFOIN-541555 dated 29 March 1957. It should be reiterated that this Center's conclusions were submitted to, and concurred by an eminent scientist in this field. SEE TAB A + B
- 3 This Center has no knowledge or report of the UFO sighting in question.
- 4a Statement is correct; however, if feasible, it should be suggested to Mr. [REDACTED] that Project "Blue Book" Report Nr. 14 will be released for sale to the general public, which will include statistics and summary for the period subsequent to 5 May 1955.
- 4b JANAP and AFR 200-2 have never been classified SECRET. JANAP originally carried a RESTRICTED classification. The original AFR 200-2, promulgated April 1952, also carried a RESTRICTED classification for a short while. Both were declassified by Presidential Executive Order Nr. 10501 soon thereafter. It does concern itself with responsibilities and procedures with regard to reporting sightings. However, there has been considerable misinterpretation regarding what UFO information should be released to the public because of an unfortunate use of bad wordage in the pertinent paragraph of AFR 200-2. This has been corrected in the proposed new AFR 200-2 recently submitted to your office.
- 4c Project "Blue Book" Report Nr. 14, will be periodically brought up-to-date to reflect the Air Force's latest findings in this field. No need for any special report is considered necessary, as addendums to this study will permit the general public to have a continuous picture from the UFO programs inception.
- 4d It seems inconceivable, and highly improbable, that the alleged remark would be attributed the Chief of USAF Office of Information Services.

- 5 In the opinion of this Center, the Air Force position in this matter should be firm and clear, as reflected in "Blue Book" Report Nr. 14 and the two DOD releases. However, care should be exercised not to place the Air Force in a position, where it may be misquoted or misinterpreted, to its detriment, by this individual's contemplated article in the American Weekly.
- 6a Reference ATIC report and case file, item 2 above.
- 6b The 4602d AISS is the prime UFO investigative organization. This organization, including other organizations or Commands (see TT messages in case file) conducted an investigation into this sighting. In view of the fact that many agencies may be brought into play in any specific case, each unaware of the other's participation in the matter, Mr. [REDACTED]'s statement that a call to the PAA pilot was "perfunctory" is not well taken.
- 6c Project "Blue Book" is still monitored by ATIC, but the name of the Project Officer is immaterial, as policy and high-level decisions do not originate with his office but on higher levels. The UFO program is an unclassified one. The files, however, because of intelligence and investigative personnel, procedures and techniques often contain classified material. For example, a check into the reliability of a UFO observer and the circumstances surrounding his report may reveal highly personal or derogatory data. In some instances individuals of high standing in their community are involved. The results of any authority given to non-official persons to have access to these files is obvious. The public and others have ^{respectably} ~~respectably~~ misconstrued this as an admission of hiding the "real facts."
- 6d This Center has no knowledge or any report concerning a UFO sighting by Senator Russell. Your attention is invited to a newspaper clipping, attached, in which Mr. [REDACTED] alleges that such a sighting had been made by Senator Russell but has been "gagged" by the Air Force. Any statement to the effect that the Air Force has or can put such restriction on any member of Congress does not require comment.
- 6e Project "Bear" is not known by this Center.
- 6f Evaluation of reports are released to Headquarters USAF in statistical form together with pertinent conclusions. The names of individuals, per se, are of little value, as factual, complete data is the objective. Any attempt to give a full report to each individual reporting a UFO would be a tremendous task. In those few exceptions made, experience has shown that the conclusions given

are generally unacceptable to the observer, and in fact, often has added fuel to the controversy. Mr. [REDACTED] apparently is under the impression that CIRVIS (Communication Instructions for Reporting Vital Intelligence Sightings) is an extensive analytical study similar to "Blue Book" Report Nr. 14, when in reality, merely represents procedures for reporting certain types of sightings.

DEPARTMENT OF THE AIR FORCE
WASHINGTON

OFFICE OF THE SECRETARY

16 May 1957

Dear Mr. [REDACTED]:

As General [REDACTED] is no longer Director of Information Services, your letter on unidentified flying objects was forward to me for reply.

Reference the Pan American sighting in early March, this was investigated by the 4602nd AISS and several other investigating agencies. All concluded that Captain Van Winkle observed a bolide or fireball (see attached). As each agency acted independently it is doubtful that any one made a perfunctory examination of the incident.

JANAP 146 and AFR 200-2 have never been classified as Secret. Both carried a Restricted classification for a short while and were declassified by Presidential Executive Order 10501. The Air Force is presently contemplating publishing a revised AFR 200-2 which should eliminate much of the misinterpretation of the original.

The Air Force is planning to release Project BLUE BOOK Report #14 for sale to the general public. It will be kept up to date so as to present a continuous picture of the Program. The statement which you attribute to Secretary Quince regarding BLUE BOOK is correct, but I seriously doubt that General Kinney made a statement that the whole area of thought on the UFO's was strictly for the birds.

[REDACTED] is merely a procedure for reporting certain types of sightings and not an extensive analytical study. Project BEAR is not known by the Air Technical Intelligence Center at Dayton. Reference your statement about Senator Russell being asked not to discuss his personally sighting a strange object, the Air Force has no knowledge of this.

Sorry for the delay in answering your letter, but we had forwarded it to the Air Technical Intelligence Center to get the information.

Sincerely,

Inclosure
