SUMMARY (Give summary which highlights the salient factors of narrative report. Begin narrative text on AF Form 112a unless report can be fully stated on AF Form 112. List inclosures, including number of copies)				
Mr. [redacted] observed an object on the night of 21 October 1957 which was similar in appearance and performance characteristics to the first USSR earth satellite. He thinks his sighting might constitute the appearance of a second USSR earth satellite. He made the observation while visually tracking the first earth satellite and its rocket along its announced route.

Commanding Officer
U.S. Signal Corps,
Fort Monmouth,
Eatontown, New Jersey

Dear Sir:

Enclosed is a sketch of the sky on the date and time indicated. Can you explain the object I saw. My wife also saw it. It was a naked-eye object, an identical, blinking, fast-moving counterpart of Sputnik.

I first picked up the rocket approximately in the center of the Square of Pegasus at approximately 7:29 P.M. as scheduled. It was visible to the unaided eye, but I also tracked it with 8X—35mm binoculars having a field of 115 yards.

I picked up the satellite at approximately 7:59 as scheduled, in Cassiopeia, and tracked it to the point below Serpens indicated. At this point a blinking, swiftly moving object appeared likely to collide with Sputnik and we watched it spellbound. What apparently were two jets flying fast and high appeared out of the southwest in the wake of the object which itself was soundless. By the time the planes reached the zenith, the object has disappeared in the N.E. and I could not hear the jet engines overhead until the planes, each bearing greenish-blue lights, were midway to the eastern horizon.

In the glasses the object and Sputnik appeared to be double, while the rocket appeared as a single, flashing object. I think I saw a second satellite traveling from west to east.

If you care to correspond with me I'll appreciate it.

Sincerely yours,

/s/t/ ~~████████████████████~~

Commanding Officer,
U.S. Signal Corps,
Fort Monmouth,
Eatontown, New Jersey.

Dear Sir:

Enclosed is a sketch of the sky on the date and ~~date~~ time indicated. Can you explain the object I saw. My wife also saw it. It was a naked-eye object, an identical, blinking, fast-moving counterpart of Sputnik.

I first picked up the rocket approximately in the center of the Square of Pegasus at approximately 7:29 P.M. as scheduled. It was visible to the unaided eye, but I also tracked it with 8X--35mm binoculars having a field of 115 yards.

I picked up the satellite at approximately 7:39 as scheduled, in Cassiopeia, and tracked it to the point below Serpens indicated. At this point a blinking, swiftly moving object appeared likely to collide with Sputnik and we watched it spellbound. What apparently were two jets flying fast and high appeared out of the southwest in the wake of the object which itself was soundless. By the time the planes reached the zenith, the object had disappeared in the N.E. and I would estimate its speed every bit as fast as Sputnik. I could not hear the jet engines overhead until the planes, each bearing greenish-blue lights, were midway to the eastern horizon.

object

In the glasses the ~~satellite~~ and Sputnik appeared to be double, while the rocket appeared as a single, flashing object. I think I saw a second satellite travelling from west to east.

If you care to correspond with me I'll appreciate it.

Sincerely yours,
~~Neptune, New Jersey~~
