TO: SAFIS-3, Major Tacker										DATE 25 June 1958					
FROM: AFCIN-4E										COMMENT NO. <i>James J. Ballou</i>					
COMMENTS (Use reverse, if necessary) AFCIN-4E4g/Capt Gregory/ko/69216 1. Subject film was reviewed by this Center. 2. Returned to owner through your office, in accordance with paragraph 8 and 19 c, AFR 200-2. 3. The following are submitted to assist you in making a reply: a. A careful review of the film, together with the data submitted establishes that the object was definitely Venus. b. Significant to note that Mrs. [REDACTED] observed the object for two (2) full hours. During this period the object moved from 180 to 270 degrees, at an elevation of approximately 40 degrees. This is almost the precise track and elevation of Venus for that two-hour period.															

Cover Sheet, Cmt #1, dated 25 June 58 to SAFIS-3, Major Tacker, Subj: Report on and return of UFO Motion Picture Film - Mrs. ██████████, Dallas 30, Texas (Continued)

c. Venus was so bright during the month of December that all of the major newspapers, as well as scientific journals, commented on its size and brilliancy. Press clippings, attached, will emphasize this. Suggest that clippings with a note of thanks for her precise data which helped us identify the object, should also be included in your reply.

4. Request copy of your letter to be forwarded to the 745th ACW Sqdn., Duncansville, Texas, to indicate that the owner's request for the return of the film, has been complied with.

1. UFO: Reference your message AFCIN-4E4 3-572-E the information requested is as follows.

a. Description of the Object.

- (1) Three cornered star and would change the number of points. Closer to earth than star.
- (2) Grape fruit. ← Important: See item (c. (2))
(Size estimated - 45 seen through binoculars)
- ✓ (3) White, green and blue; then with binoculars - blue, green and white.
- (4) (one).
- (5) N/A.
- (6) Has points like antennas. ✓
- (7) No.
- (8) No.
- (9) Object looked like it had antennas which were being put out and taken in.

b. Description of course of object.

- (1) a very bright object in the sky.
 - (2) 40° elevation - 180° azimuth.
 - (3) 40° elevation - 270° azimuth.
 - (4) East to west. It would float around and then would return to original orbit.
- 2 hrs.
This object moved only 45 degrees in 2 (repeat) 2 hours (see item d.)

1. Existence of physical evidence, such as materials and photographs.

- (1) One 8mm roll of movie film which you now have.
- (2) Wollensak camera - 8mm movie type.
- (3) Telephoto.
- (4) Kodak type "A" outdoor color film.
- (5) N/A.
- (6) F 1.9.
- (7) None.
- (8) None.
- (9) N/A.
- (10) Camera pointing up and due south at 40° angle.

SAFIS-3/Maj. Tacker. cf/73328/2 July 1958

a 2 July 1958

Dear Mrs. [REDACTED]

This is to acknowledge and thank you for your unidentified flying object report of 12 December 1957 and the 8mm motion picture film you submitted to support this sighting. I am returning your film herewith.

A careful analysis of the precise data submitted established that the object was definitely the planet Venus.

For your information I am inclosing a copy of the latest Department of Defense Fact Sheet, dated 5 November 1957, on unidentified flying objects, together with copies of December 1957 news clippings emphasizing the seasonal brilliance of Venus at that time.

Sincerely,

Incls

LAWRENCE J. TACKER
