10. BRIEF SUMMARY OF SIGHTING Large, bright object, leaving a blueish trail behind it was seen moving downward in a westerly direction at great speed. A second somewhat similar object was noticed later. Observers first believed object was a guided missile.				11. COMMENTS The characteristics, description, time in sight and other information indicate that the object was apparently a meteor. The press & radio in that area also stated that the object was of meteoric origin.	

On 13 Dec 57 an object believed to be a guided missile was seen moving in a westerly direction headed toward the Crimea.

On 14 Dec 57 a large, bright object was seen falling from the sky in the direction of the towns of Catalagzi and Kilimli. Approximately fifteen seconds later a second unidentified object was seen moving in a westerly direction at great speed, leaving a blue trace behind it. The latter object appeared to be moving about three inches above the horizon.
