C O P Y - HANDWRITTEN LETTER

Sun. Jan 12, 58

Dear [REDACTED]

We saw what definitely was Sputnik No. 1 fall Jan 2nd at 7:50 PM (Thursday) just north of New Orleans. This is a desolate locality with swamps etc. This object fell about one mile in front of us, straight down and we were able to view it for 10 or 15 seconds. It was a perfect sphere with a glow around it and the circle itself was white. Having worked in an aluminum heat treating dept. during the war I am familiar with heated metal. I reported this sighting in detail to the Dallas FBI who in turn referred it to the Air Force here in Dallas and then I also gave details to the Smithsonian Astrophysical Observatory in Cambridge, Mass.

They all expressed doubt that they would search for this.

My two nephews and myself are lifelong residents of Dallas and certainly know there is no reward connected with finding this satellite. We know that finding the satellite intact would be of immense scientific value as well as historical. We have withheld this information from the press thinking maybe the government wanted to keep it a secret for awhile.

We haven't been shown the courtesy of advising us whether they are looking for this or not and we don't want the report pigeon-holed some place.

Being supporters of yours we will leave the decision up to you, that after you've seen the full report of this (Dallas OSI) report, maybe they sent it on to Wash., you may advise us accordingly. If you want to release this to the press you have our permission or if you want to keep it a secret we will do likewise.

I am 48 years old and have seen comets, meteors, falling stars, and they all have tails and this didn't. You may be sure that we are positive this was the satellite. Please advise,

Yours Sincerely

[REDACTED]

Sun. Jan 12, 58

Dear ~~██████████~~ ^{PERMIT}
JAN 14 1958

We saw what definitely was
Sputnik No. 1 fall Jan 2nd at 7:50pm
(Thursday) just north of New Orleans.
This is a desolate locality with
swamps etc. This object fell about
one mile in front of us, straight down
and we were able to view it for 10 or 15
seconds. It was a perfect sphere with
a glow around it and the circle its self
was white. Having worked in an
aluminum Heat treating dept. during the
war I am familiar with heated metal.
I reported this sighting in detail to
the Dallas F.B.I who in turn referred
it to the Office of Special Investigation
of the Air Force here in Dallas and
then I also gave details to the
Smithsonian Astrophysical Observatory
in Cambridge, Mass.

They all expressed doubt that they
could search for this.

My two nephews and myself are
life long residents of Dallas and
~~we~~ certainly know there is no reward
connected with finding this satellite.

✓
We know that sending the satellite
that would be of immense scientific
value as well as historical. We have
withheld this information from the press
thinking maybe the government wanted
to keep it a secret for awhile.

We haven't been shown the courtesy
of advising us whether they are looking
for this or not and we don't want the
report pigeonholed some place.

Being supporters of yours we will
leave the decision up to you, that
after you've seen the full report of
them (Dallas O.S.I) report, make a copy
sent it on to Wash., you may advise
us accordingly. If you want to
release this to the press you have
our permission or if you want
to keep it a secret we will do likewise.

I am 48 years old and have seen comet
meteors, falling stars and they all have
tails and this didn't. You may be sure
that we are positive this was the
satellite. Please Advise.
Yours sincerely

UNITED STATES SENATE

Office of the Democratic Leader

Washington, D. C.

February 6, 1958

Dear Sir:

I am enclosing a communication which I have received from one of my constituents. I will appreciate your giving serious consideration to this problem, based on its merits.

Please let me have as prompt a reply as possible, returning the enclosure, in order that I can inform the writer.

Sincerely,

(Signed) Lyndon B. Johnson

Lyndon B. Johnson

P. S. Please address reply to Lyndon B. Johnson, U.S. Senate, Washington, D. C. If additional information is required, please telephone Arthur Perry at CA 4-3121, extension 5141.

COMMENTS (Use reverse, if necessary)

Capt Copas/ahb/7000

1. Attention is invited to attached memorandum from the Directorate of Special Investigations, which pertains to a reported sighting of the descent of the Soviet earth satellite "Sputnik I".

2. It is requested that your files be checked to ascertain if any satellite or UFOB reports and/or investigative action occurred on the basis of the report described by Mr. L. L. Swindell in his letter to Senator Johnson (inclosure to attached AFOSI memo). If this matter has not previously been brought to your attention, it is requested that it be evaluated on the basis of known information concerning Soviet earth satellites "Sputnik I" and "Sputnik II", and as a UFOB report if deemed appropriate.

3. As indicated by the inclosures to the attached AFOSI Memo, this information was received by Air Force Liaison Division (SAFLL) for a reply to Senator Lyndon Johnson. Since the Directorate of Special Investigations is responsible for replying to SAFLL, it is requested that your reply be forwarded as soon as possible, directly to AFOSI-CD, ATTN: Lt. Col. Moore, with an information copy to this office.

MEMO NR 2

AFCIN-424/Capt G.T. Gregory
wm/69216

1. As result of a review of the matter stated in Comment Nr. 1, and evaluation of the data given by source, the following are submitted upon which to base a reply:

a. The Soviet satellite is a hollow, polished sphere approximately 23 inches in diameter. As such, it is the opinion of this Center that it would probably burn up between 30 - 80 miles altitude upon re-entry due to atmospheric drag.

b. It is unlikely that it would be seen as a perfect sphere if it did reach the earth intact and without fragmenting.

c. Assuming that the satellite remained intact or did not fragment upon re-entry, it would tend to strike the earth at a rather flat angle. The source states it came straight down.

d. Information available to us indicates that the sphere entered the earth's atmosphere and disintegrated a few days after the incident reported by source.

e. Source states that he observed the object for 10 to 15 seconds, and was able to describe its shape and color in some detail. The sighting duration appears to be unduly long, even if the satellite arrived at terminal velocity.

2. On the basis of the above it appears improbable that the object was the Soviet satellite.

3. ATIC has no UFO report whatsoever from that area or time; visual, radar or from aircraft. This case, however, requires a UFO report.

4. Because of Congressional interest, it is requested that action be taken to contact the source, merely to determine the probable area of fall; and conduct an investigation of that area in an attempt to recover the alleged object, in accordance with paragraph 4b, AFR 200-2, dated 5 February 1958. Our comments on this matter were discussed with the Smithsonian Astrophysical Observatory. They concurred.

5. Further to the above a query has been made recently to this Center for any data on fireballs and meteorites observed in that area from Dr. ~~XXXXXXXXXX~~, nationally known for meteoric and fireball work. A number of these bodies have been observed in that area.

✓ **Commander**
Keesler Air Force Base
Biloxi, Mississippi

1. In accordance with paragraphs 4b and 6c, AFR 200-2, "Intelligence - UFO", dated 5 February 1958, it is requested that investigative action be taken to ascertain the exact location of an unidentified aerial object which was reported to have fallen in an area North of New Orleans on the night of 2 January 1958; and an attempt be made to recover the object, or establish the probability of its impact or existence.
2. This action is requested on the basis of an inquiry by Senator Lyndon B. Johnson. Reference is made to Inclosures 4 and 5.
3. As the source is located in Dallas, Texas, this Center has requested that the Commander of the nearest Air Force Base contact and interview Mr. [REDACTED] for the express purpose of determining the location of the alleged impact. It was further requested that the information be immediately forwarded to your attention, in order that necessary action be initiated. (Copy of letter to Commander, Carswell AFB, Texas, is attached).
4. A preliminary analysis has been made by this Center. However, because of the Congressional interest, this case cannot be considered closed until subject investigation has been completed.

2 APR 1958

SUBJECT: Report of Interview

TO: Commander
Keesler Air Force Base, Mississippi

1. This is in reference to a sighting of an unidentified object reported by Mr. [REDACTED] of Dallas, Texas, on 6 January 1958. On that date, the report was made to a special agent of the 23rd District OSI at Carswell AFB, Texas.

2. As forwarded by the OSI, this report stated that Mr. [REDACTED] and two nephews were enroute from New Orleans, Louisiana, to Hattiesburg, Mississippi, on U.S. Highway 11, about 1950 hours, 2 January 1958, when they spotted a glowing object falling towards the earth at approximately 1000 feet, one to one and one-half miles ahead of them. The report went on to describe the location of the sighting and other pertinent data, and was forwarded by the 23rd District OSI to the Director of Special Investigations, Washington, D.C.

3. Mr. [REDACTED] then wrote to Senator Lyndon B. Johnson stating that what he saw was "definitely Sputnik I", that he was positive the object was the satellite, and asking Senator Johnson's aid in pushing an investigation. Due to this Congressional interest, this base was requested to contact Mr. [REDACTED] for the purpose of determining the object's exact point of impact with the earth's surface. Inclosure No. 1 is a report of the requested interview with Mr. [REDACTED] and his nephew, Mr. [REDACTED].

4. This report is considered necessary in view of the facts uncovered by this interview with Mr. [REDACTED].

5. Upon withdrawal of Inclosure, this correspondence may be downgraded to unclassified in accordance with Paragraph 37-h, AFR 205-1.

REPORT OF INTERVIEW WITH MR. [REDACTED]

The purpose of this report is to describe the results and impressions obtained by the undersigned during an interview on 26 March 1958 with Mr. [REDACTED] of Dallas, Texas, and his nephew, Mr. [REDACTED], also of Dallas. The interview was conducted to determine the point of impact of an unidentified flying object reported by these two gentlemen on 6 January 1958. Much difficulty was encountered in making initial contact with the two sources as neither of them was listed in Dallas directories. It should also be stated at the outset that Mr. [REDACTED] recently suffered a nervous breakdown and may not have been at peak mental efficiency during the interview. However, Mr. [REDACTED] appeared perfectly sound in every respect.

The general impression obtained from the interview was that the reliability of the initial sighting should be reconsidered in the light of the facts that will be stated in this report. (U)

At the time of the initial report, both men stated that they had "seen Sputnik I fall". They seemed very sure of this. However, when asked at this interview what they had seen they replied that they could not be sure, "it may have been an airplane light, a falling star, or a reflection of some kind." Though they reported initially the the object had fallen "straight down", during this interview they seemed to agree that it fell across their line of vision at an angle of approximately 60 to 75 degrees with the earth's surface. As to the size of the object, which was initially reported as being "24 inches in diameter", they stated that it was impossible to estimate the size with any accuracy, saying that it could have been "as big as a television set, or as big as a house." Mr. [REDACTED] described the object as being perfectly round and glowing on all sides, but Mr. [REDACTED] stated that it appeared to be more irregular in shape and that it was glowing only on the underside. Both agreed that the object was soundless and that the glow appeared to have stopped when the object passed from their line of vision behind some trees, and apparently struck the earth. (U)

It seemed that the reason both men were initially so sure that what they had seen was Sputnik I was the fact that they had been hearing on the radio news all day that the Soviet satellite was expected to fall at any time. It was also noted that they had gone through a great change in attitude on this matter. Originally they had delayed reporting the object for four days and then had waited six more days to request Congressional assistance. But in this interview they repeated several times that as far as they were concerned the matter was a thing of the past, that they were not particularly concerned about it either way, and that they were not particularly interested in the disposition of their report. (U)

REPORT OF INTERVIEW WITH MR. [REDACTED] (CONT'D)

Later, in a private interview with Mr. [REDACTED] it was learned that Mr. [REDACTED] had been unemployed for quite some time. During this period he had been doing a good deal of reading about the earth satellites and apparently became quite obsessed with the idea in general. After reporting that he had seen Sputnik I fall, Mr. [REDACTED] became convinced that his telephone was being tapped and did not use it for several weeks for fear of releasing some important information. (C)

With the above interview in mind, and with the impression I received of the two men, it is my opinion that this UFOB report should be viewed with more skepticism. (U)

This report is classified Confidential because it indicates impressions obtained by the interviewing officer. (U)

AFCIN-4E4/Capt Gregory/kmo/69216

1. Reference is made to telephone conversation between Major Tacker, SAFIS, and Captain Gregory, this Center regarding subject investigation, including a related matter of interest to Congressman Vinson, on Friday afternoon, 18 Apr 58.

2. Attached is a copy of the investigator's report (Incl #1) which Senator Johnson expressed a personal interest, together with a request for prompt reply (Incl #2). These are submitted for material upon which to base a reply.

3. It is recommended that the following points be considered for inclusion in Senator Johnson's letter:

a. Although source's report was somewhat incomplete and lacking in detail, particularly as to exact locations, four major Air Force agencies immediately went into action to investigate and resolve the alleged sighting: OSI, Keeler AFB, Carswell AFB, and the Air Technical Intelligence Center.

AFHQ O-86, 19 May 58, Subj: Results of Investigation Requested by Senator Johnson (Cont'd)

b. This case will serve to illustrate to Senator Johnson the painstaking efforts and thoroughness with which the Air Force undertakes to resolve UFO sightings, even such as this, where numerous efforts are made to locate the source and obtain the facts because the original report was incomplete.

c. In brief, after all the furor created by the source in demanding Congressional and FBI intervention, investigators found that he was of questionable reliability, contradicted much of his original statements, and in general, his report viewed with skepticism.

JUN 1958

Dear Senator Johnson:

Further reference is made to your inquiry concerning Mr. ~~██████████~~ of Dallas, Texas, who claims to have seen Sputnik No. 1 return to earth just north of New Orleans, Louisiana.

Since furnishing you information on 18 March 1958, the Air Force has made a further examination of this incident and has interviewed Mr. ~~██████████~~ in order to secure additional detailed information. Although all facts surrounding the incident have been carefully studied, nothing was found which would indicate that the unidentified object sighted by Mr. ~~██████████~~ was Sputnik No. 1.

MR:
