1. The observer does not say where he was located at time of sighting. Hermosillo, Sonora, Mexico is approx. 180 miles south of Nogales, the observer's destination, and the object could have been seen anywhere between these two points.

2. This report has very limited info. cannot form a valid conclusion.

Distinguido y apreciable Señor:

Aproximadamente el 22 de Mayo viajaba acompañado de mi esposa a la ciudad de Nogales Ariz., a las dos de la tarde, cuando al mismo tiempo notamos que algo se desprendia del cielo, como si fuera un aerolito, que cayo como a 10 millas de la orilla de la carretera, era una bola blanca brillante envuelta en llamas, como le digo a usted eran las dos de la tarde y cayo de sur a norte ~~cas~~ perpendicular a la tierra.

Le estoy enviando estos datos para si sus investigaciones le son de interes, estoy dispuesto a marcar el sitio donde vi este fenomeno.

De Usted,

yme/

LA MAS ALTA CALIDAD EN MATERIAL FOTOGRAFICO

Dear Sir:

Approximately on 22nd of May, I was traveling with my wife to the City of Nogales, Arizona. Around 2:00 o'clock in the afternoon when at the same time we saw that something came down from the sky like a meteor and landed about 10 miles from the side of the road. It was a brilliant white ball surrounded by flames. Like I said it was around 2:00 o'clock in the afternoon and was traveling in south to north direction perpendicular to earth. I am sending you this information so if it might be of any interest to your investigation and I'm ready to indicate the place where I saw this phenomenon.

Sincerely yours,
