[REDACTED] Northwest #614
Washington, D C

Dear Miss [REDACTED]

The sighting which you reported to the Air Force of an object observed in September 1958 is similar to many observations of satellites or aircraft. The duration of one minute is more consistent with an aircraft. The duration of flight and the appearance are also in accord with a satellite observation.

Without an exact time and date we cannot rule out an observation of the Sputnik satellite. However, the data presented is more in accord with an observation of a high flying aircraft. Also, the passage of time prevents an attempted identification of a specific aircraft flight.

Sincerely,

HECTOR QUINTANILLA, Jr
Major, USAF
Chief, Project Blue Book

Dear Sirs:

Although I am late in bringing this to your attention, I saw an object in mid or late September, 1958, for which I would appreciate an explanation, if you have one.

At the time I saw this object, I was sitting just at nightfall on the upper balcony of my (then) home on [REDACTED], just north of the Sheraton-Park Hotel. I was gazing in a southwesterly direction at the lights of planes coming in to National Airport and also at two or three stars that were rather low in the southwestern sky. Finally, my gaze fixed on one brilliant star, like the Evening Star, and I stared at it for a full minute or longer. Suddenly I was astounded to realize that it was not a star but a moving light coming in my direction. I jumped up in, I might say, great excitement because I felt I was looking at something extraordinary and that it would pass directly overhead. As it came nearer, I strained my ears to catch the sound of a motor or some outline of the object to which it was attached. However, it just came on swiftly, powerfully, and silently at about the speed of a fast plane. There was nothing more than the light, which did not appear to increase in size as it came toward me or cast any illumination out from it, nor did it have a tail as a comet would have. Once it passed overhead, the roof of the house shut it out from view and it disappeared in a slightly northeasterly direction. I could not say whether it was a small light that had passed at about the height of a plane, or a much larger light but very far away in space.

The following week, I read in the newspaper that there had been quite a flurry of reports of unknown objects sighted that particular week in which I noted this light. I have always been a scoffer at the "little men from Mars" people. However, there was not a full moon at the time - if any, it was in the first quarter - to illuminate a passing object, but it might have been the sputnik the Russians launched in 1957 still circling the earth. What troubled me about this light was whether it would be a hazard to aviation but then I decided it would be just as much a hazard to the planes of a foreign power, so that could not have been its purpose.

Very truly yours,

[REDACTED]
(Miss [REDACTED])

~~REDACTED ADDRESS~~

4 February 1965

Dear Miss [REDACTED]:

In order for the Air Force to evaluate your report of an unidentified flying object, the attached FTD Form 164 should be completed as fully as possible and returned to this office. The Air Force will evaluate the report, and you will be advised of the findings.

Sincerely,

MASTON M. JACKS
Major, USAF
Public Information Division

U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will not be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

Third or fourth week of
September, 1958.

Day Month Year

2. Time of day: 8-8:30

Hour

Minutes

(Circle One):

A.M.

or

(P.M.)

3. Time Zone:

(Circle One): ☒ a. Eastern
b. Central
c. Mountain
d. Pacific
e. Other _____

(Circle One): ☒ a. Daylight Saving
b. Standard

4. Where were you when you saw the object?

Nearest Postal Address

Washington

City or Town

D.C.

State or County

5. How long was object in sight? (Total Duration)

Hours

Minutes

Seconds

1 - from the time I realized it was not a star.

a. Certain

c. Not very sure

☒ b. Fairly certain

d. Just a guess

5.1 How was time in sight determined? By recollection

5.2 Was object in sight continuously? Yes ☒ No _____

6. What was the condition of the sky?

DAY

a. Bright
b. Cloudy

NIGHT

☒ a. Bright - i.e., not cloudy but not moonlit.
b. Cloudy

7. IF you saw the object during DAYLIGHT, where was the SUN located as you looked at the object?

(Circle One): a. In front of you
b. In back of you
c. To your right

d. To your left
e. Overhead
f. Don't remember

7/2

8. IF you saw the object at NIGHT, what did you notice concerning the STARS and MOON?

8.1 STARS (Circle One):

- a. None
- ☒ b. A few
- c. Many
- d. Don't remember

8.2 MOON (Circle One):

- a. Bright moonlight
- b. Dull moonlight
- ☒ c. No moonlight - pitch dark
- d. Don't remember

9. What were the weather conditions at the time you saw the object?

CLOUDS (Circle One):

- ☒ a. Clear sky
- b. Hazy
- c. Scattered clouds
- d. Thick or heavy clouds

WEATHER (Circle One):

- ☒ a. Dry
- b. Fog, mist, or light rain
- c. Moderate or heavy rain
- d. Snow
- e. Don't remember

10. The object appeared: (Circle One):

- a. Solid
- b. Transparent
- c. Vapor
- ☒ d. As a light
- e. Don't remember

11. If it appeared as a light, was it brighter than the brightest stars? (Circle One):

- a. Brighter
- b. Dimmer
- ☒ c. About the same
- d. Don't know

11.1 Compare brightness to some common object: Like a star when first sighted, then as it approached more like a small lamp of the kind used by railway men to signal.

12. The edges of the object were:

- (Circle One):
- a. Fuzzy or blurred
 - ☒ b. Like a bright star
 - c. Sharply outlined
 - d. Don't remember

e. Other _____

13. Did the object:

- a. Appear to stand still at any time?
- * b. Suddenly speed up and rush away at any time?
- c. Break up into parts or explode?
- d. Give off smoke?
- e. Change brightness?
- f. Change shape?
- g. Flash or flicker?
- h. Disappear and reappear?

(Circle One for each question)
 (when first sighted only.)

☒ Yes	No	Don't know
☒ Yes	No	Don't know
Yes	☒ No	Don't know
Yes	☒ No	Don't know
☒ Yes	No	Don't know
☒ Yes	☒ No	Don't know
Yes	☒ No	Don't know
Yes	☒ No	Don't know

* It just moved away from the star cluster - the words "speed up and rush" aren't appropriate as I first saw it.

14. Did the object disappear while you were watching it? If so, how? It was in sight continuously from the time I had been looking at it as a star, then began to move across the sky, first like a bright spark, but as it approached nearer more like a small lamp. It disappeared beyond the roof above me so I could not follow its flight from the back.

15. Did the object move behind something at any time, particularly a cloud?

(Circle One): Yes No Don't Know. IF you answered YES, then tell what it moved behind: _____

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): Yes No Don't Know. IF you answered YES, then tell what in front of: _____

17. Tell in a few words the following things about the object:

a. Sound No sound - it moved very silently.

b. Color White

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

Since I saw it first as a star, I think it would have been entirely covered by a match head.

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

There is nothing I can draw concerning its shape - as I said, I saw it first for a considerable length of time as a bright star - then as it approached nearer, it appeared to lose some of its sparkle and became more like a small lamplike light speeding by.

star
cluster

5.00'

My position →

7.5

20. Do you think you can estimate the speed of the object?

(Circle One)

☒ Yes

☐ No

IF you answered YES, then what speed would you estimate? The speed of a very fast jetfighter.

21. Do you think you can estimate how far away from you the object was?

(Circle One)

☒ Yes

☐ No

IF you answered YES, then how far away would you say it was? At a plane's height

22. Where were you located when you saw the object?

(Circle One):

a. Inside a building

b. In a car

☒ c. Outdoors

d. In an airplane (type)

e. At sea

f. Other _____

23. Were you (Circle One)

a. In the business section of a city?

☒ b. In the residential section of a city?

c. In open countryside?

d. Near an airfield?

e. Flying over a city?

f. Flying over open country?

g. Other _____

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (Circle One)

a. North

c. East

e. South

g. West

b. Northeast

d. Southeast

f. Southwest

h. Northwest

24.2 How fast were you moving? _____ miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One)

☐ Yes

☐ No

25. Did you observe the object through any of the following?

a. Eyeglasses

Yes

☒ No

e. Binoculars

Yes

No

b. Sun glasses

Yes

No

f. Telescope

Yes

No

c. Windshield

Yes

No

g. Theodolite

Yes

No

d. Window glass

Yes

No

h. Other _____

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

First, a star like the Evening Star, but as it came speeding in my direction it became more like a small lamp without dazzle or radiating beams, like a street lamp of the globe variety, seen several blocks away, or as a railway worker's signal lamp.

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass where you *last* saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

While I was watching the "star" it moved slightly to the west (my right); then I saw it in silhouette, as it were, a tiny spark of light moving away from the star cluster and moving across the open sky in a seemingly northerly direction; however, some change in the light made me realize it was coming in my direction, i.e., N.E.

29. IF there was MORE THAN ONE object, then how many were there? _____
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

No.

31. Was anyone else with you at the time you saw the object? (Circle One)

Yes

No

31.1 IF you answered YES, did they see the object too? (Circle One)

Yes

No

31.2 Please list their names and addresses:

32. Please give the following information about yourself:

NAME

[Redacted]

[Redacted]

Occupation: legal secretary - have good sight and hearing.

33. When and to whom did you report that you had seen the object?

late

January

1965

Day

Month

Year

- in response to an article in the paper inviting reports on UFO sightings, I wrote for the first time to "Operation Blue Book".

34. Date you completed this questionnaire:

10th

Day

Feb.

Month

1965

Year

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

I had been sitting for about 10 minutes on the 2nd floor balcony of my then home on [REDACTED] near Cathedral Avenue, Washington, D.C., between 8-8:30 p.m. onenight in mid to late September, 1958 (a week, I read later, when there had been a flurry of reports of UFO objects sighted). A number of times I had glanced at a cluster of stars in the southwestern sky; finally, for no particular reason, my gaze fixed on one of the most beautiful of these and I stared at it steadily for a long time, at least a minimum of a minute. Then, considering the length of time I had had it under observation, I was shocked to see it move slightly to the west (my right) and then, as I watched it for 7 or 8 seconds, continue across the sky in an apparently N.W. or northerly direction. Some increase in the light, however, made me realize it was coming in my direction (northeasterly) and I jumped to my feet in great excitement (like an Indian spotting the first sail on the horizon) to watch it pass. It came up fast through the night like a small lamp and passed swiftly and silently almost directly overhead, at the height, I thought, of a commercial plane. I tried to discover some outline of the object, some smaller lights along the side, or the sound of a motor, all with negative results - it just sped by with a kind of characteristic motion of its own.

At the time, I thought it must have been some airforce "secret device" or a plane so high in the stratosphere that I could not catch the sound of its engines but I suppose now it was a satellite or perhaps Sputnik I that the Russians put up in 1957, although at the time I did not associate with a sputnik - it seemed too close at hand, and there were no reports or timetables in the paper of its passing. It was extraordinary but not frightening - have you any idea of what it was precisely that I saw?
