CODE:

Observer Reported two extremely bright pin point sources of light first observed in the east at an elevation angle of 30° . They moved together, blinking simultaneously, across the sky at about the same altitude and disappeared below the horizon in the West. Sources of light were visible for not less than 30 nor more than 60 seconds. Time of observation was 1930. Report of observation was received by SDO at 2300.

SDD Comment:

A check was made of the facilities listed in the SOP to determine if there was a logical explanation for the reported phenomena. Due to the hour of day (2300) and the length of time from the sighting to receipt of the report no information was obtainable.

Conclusions:

Flt. Test, WADC, had two A/C out testing anti-collision lights. one took off at 1830 & ~~one~~ another at 1900. The observer probably saw these two, or one of them, flying around. These lights are very bright.
