Subject: UFO Report

Gentlemen:

The attached report of the sighting of a
UFO is forwarded to you for disposition.

Yours very truly

Meteorologist Acting in Charge

[REDACTED]
Pleasant Hill, Calif.

October 9, 1958

Weather Bureau
Oakland Airport
Oakland, California

Gentlemen:

I would like to call to your attention an object of interest I noticed in the sky last night, (Oct. 8) at about 9:20 PM, and to inquire if you have received any other reports about it.

The object itself appeared as a hazy bar of light, perhaps a degree in length, of orange color if I recall correctly, somewhat brighter at the ends than in the middle.

The object appeared in the west, passed rapidly across the sky 30 to 40 degrees south of the zenith, executed a couple of turns, and wandered into the haze of light from the highway to Walnut Creek, to the southeast. At about that time, an airplane headed southwest, from the direction of Concord or Travis, crossed the path the object had taken. For a few seconds, both plane and object were visible to me, and it is on the chance that someone might have seen it, and radiod the information to the Oakland Airport, that I have chosen to write to you.

The duration of the object's appearance could hardly have exceeded 15 seconds. From the rapidity with which its size and brightness changed as it moved away, it seemed to be travelling rather low than high. It moved much faster even than low flying planes, and no sound whatsoever could be heard until the appearance of the above-mentioned plane. It was moving much too fast to be wind-propelled, unless there were winds aloft of a few hundred miles per hour on a clear, calm, night.

The size of the object, its hazy, steady light, its ability to execute sharp turns and lack of luminous train clearly indicate it was not a meteor, several of which I also saw last night.

I would much appreciate any information you can give me on the nature and sightings of this object. I realize your department may not handle such matters, but would appreciate your bringing this letter to the attention of the appropriate office.

Yours very truly,
[REDACTED]

Mr. [REDACTED]
Pleasant Hill, Calif.

Dear Mr. [REDACTED]

Your letter dated 9 October 1958, addressed to the Weather Bureau at Oakland, California, has been forwarded to this Center.

We would appreciate your filling in the inclosed questionnaire in as much detail as possible to enable us to make a more accurate analysis of your sighting.

Your interest in these matters is appreciated.

Sincerely,

1 Incl:

Col. H. K. Gilbert
Air Technical Intelligence Center
Wright-Patterson AFB, Ohio

Dear Col. Gilbert:

In response to your letter of 30 October 1958 with enclosed questionnaire, am returning latter filled out as well as possible. Estimates of size, distance, etc. are almost impossible to make, but comparison might be made with a small airplane, flying low and moving very fast.

I hope this information will make possible identification of the object. I would very much like to learn what it was.

Yours very truly,

Incl #1

Case 1958

1 December 1958

Dear Mr. [REDACTED]

Your letter of 8 November 1958 concerning an unidentified flying object (with inclosed questionnaire) addressed to the Air Technical Intelligence Center, has been referred to this office for reply.

A check was made with the Army Aviation Section. They have six helicopters, H-37s, stationed in the San Francisco area which fit the description given by you. These helicopters, which are not based at very many locations, have an engine on each side of the fuselage driving one large rotor. It is our conclusion that you saw one of these aircraft flying in the area.

Thank you for your interest in the matter.

Sincerely,

LAWRENCE J. TACKER

U. S. AIR FORCE TECHNICAL INFORMATION SHEET

This questionnaire has been prepared so that you can give the U. S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes, and will be regarded as confidential material. Your name will not be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that, if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

8 Oct. 1955
Day Month Year

2. Time of day: 9 20
Hour Minutes

(Circle One): A.M. or P.M.

3. Time zone:

(Circle One): a. Eastern
b. Central
c. Mountain
d. Pacific
e. Other _____

(Circle One): a. Daylight Saving
b. Standard

4. Where were you when you saw the object?

[Redacted] Pleasant Hill Calif.
Address City or Town State or Country

Additional remarks: _____

5. Estimate how long you saw the object. — — 10-15
Hours Minutes Seconds

5.1 Circle one of the following to indicate how certain you are of your answer to Question 5.

a. Certain
b. Fairly certain
c. Not very sure
d. Just a guess

6. What was the condition of the sky?

(Circle One): a. Bright daylight
b. Dull daylight
c. Bright twilight
d. Just a trace of daylight
e. No trace of daylight
f. Don't remember

7. IF you saw the object during DAYLIGHT, TWILIGHT, or DAWN, where was the SUN located as you looked at the object?

(Circle One): a. In front of you
b. In back of you
c. To your right
d. To your left
e. Overhead
f. Don't remember

Good 11/1

8. IF you saw the object, at NIGHT, TWILIGHT, or DAWN, what did you notice concerning the STARS and MOON?

8.1 STARS (Circle One):

- a. None
- b. A few
- ☒ c. Many
- d. Don't remember

8.2 MOON (Circle One):

- a. Bright moonlight
- b. Dull moonlight
- ☒ c. No moonlight — pitch dark
- d. Don't remember

9. Was the object brighter than the background of the sky?

(Circle One):

☒ a. Yes

b. No

c. Don't remember

10. IF it was BRIGHTER THAN the sky background, was the brightness like that of an automobile headlight?:

(Circle One) ☒ a. A mile or more away (a distant car)?

b. Several blocks away?

c. A block away?

d. Several yards away?

e. Other

11. Did the object:

(Circle One for each question)

- | | | | |
|---|--------------------------------------|---------------------------------------|------------|
| a. Appear to stand still at any time? | Yes | ☒ No | Don't Know |
| b. Suddenly speed up and rush away at any time? | Yes | ☒ No | Don't Know |
| c. Break up into parts or explode? | Yes | ☒ No | Don't Know |
| d. Give off smoke? | Yes | ☒ No | Don't Know |
| e. Change brightness? <i>only with distance</i> | ☒ Yes | No | Don't Know |
| f. Change shape? | Yes | ☒ No ? | Don't Know |
| g. Flicker, throb, or pulsate? | Yes | ☒ No | Don't Know |

12. Did the object move behind something at anytime, particularly a cloud?

(Circle One):

Yes

☒ No

Don't Know.

IF you answered YES, then tell what

it moved behind: _____

13. Did the object move in front of something at anytime, particularly a cloud?

(Circle One):

Yes

☒ No

Don't Know.

IF you answered YES, then tell what

it moved in front of: _____

14. Did the object appear:

(Circle One):

a. Solid?

b. Transparent?

☒ c. Don't Know.

15. Did you observe the object through any of the following?

- | | | | | | |
|-----------------|--------------------------------------|-------------------------------------|----------------|-----|-------------------------------------|
| a. Eyeglasses | ☒ Yes | No | e. Binoculars | Yes | ☒ No |
| b. Sun glasses | Yes | ☒ No | f. Telescope | Yes | No |
| c. Windshield | Yes | No | g. Theodolite | Yes | No |
| d. Window glass | Yes | No | h. Other _____ | | |

16. Tell in a few words the following things about the object.

- a. Sound none at all
- b. Color orange ; when more distant, purple

17. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

18. The edges of the object were:

- (Circle One): ☒ a. Fuzzy or blurred
b. Like a bright star
c. Sharply outlined
d. Don't remember

e. Other _____

19. IF there was MORE THAN ONE object, then how many were there? _____.
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

20. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

21. IF POSSIBLE, try to guess or estimate what the real size of the object was in its longest dimension.
_____ feet.

22. How large did the object or objects appear as compared with one of the following objects held in the hand and at about arm's length?

(Circle One):

- a. Head of a pin
☒ b. Pea
 c. Dime
 d. Nickel
 e. Quarter
 f. Half dollar

- g. Silver dollar
 h. Baseball
 i. Grapefruit
 j. Basketball
 k. Other _____

- 22.1 (Circle One of the following to indicate how certain you are of your answer to Question 22.

- a. Certain
☒ b. Fairly certain

- c. Not very sure
 d. Uncertain

23. How did the object or objects disappear from view? Faded into glare & light
in S.E. sky

24. In order that you can give as clear a picture as possible of what you saw, we would like for you to imagine that you could construct the object that you saw. Of what type material would you make it? How large would it be, and what shape would it have? Describe in your own words a common object or objects which when placed up in the sky would give the same appearance as the object which you saw.

Perhaps the size of a small airplane, flying fast and low, underside of wings luminous orange, enlarged or brighter at wing-tips.

25. Where were you located when you saw the object?
(Circle One):

- a. Inside a building
- b. In a car
- ☒ c. Outdoors
- d. In an airplane
- e. At sea
- f. Other _____

26. Were you (Circle One)

- a. In the business section of a city?
- ☒ b. In the residential section of a city?
- c. In open countryside?
- d. Flying near an airfield?
- e. Flying over a city?
- f. Flying over open country?
- g. Other _____

27. What were you doing at the time you saw the object, and how did you happen to notice it?

star-gazing, & watching for meteors. It
came behind trees while I was looking about in that
direction.

28. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

28.1 What direction were you moving? (Circle One)

- | | | | |
|--------------|--------------|--------------|--------------|
| a. North | c. East | e. South | g. West |
| b. Northeast | d. Southeast | f. Southwest | h. Northwest |

28.2 How fast were you moving? _____ miles per hour.

28.3 Did you stop at any time while you were looking at the object?

(Circle One) Yes No

29. What direction were you looking when you first saw the object? (Circle One)

- | | | | |
|--------------|--------------|--------------|--|
| a. North | c. East | e. South | ☒ g. West |
| b. Northeast | d. Southeast | f. Southwest | h. Northwest |

30. What direction were you looking when you last saw the object? (Circle One)

- | | | | |
|--------------|---|--------------|--------------|
| a. North | c. East | e. South | g. West |
| b. Northeast | ☒ d. Southeast | f. Southwest | h. Northwest |

31. If you are familiar with bearing terms (angular direction), try to estimate the number of degrees the object was from true North and also the number of degrees it was upward from the horizon (elevation).

31.1 When it first appeared:

- a. From true North 260 degrees.
- b. From horizon 45 degrees.

31.2 When it disappeared:

- a. From true North 120 degrees.
- b. From horizon 20 degrees.

32. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it.

33. In the following larger sketch place an "A" at the position the object was when you *first* saw it, and a "B" at its position when you *last* saw it. Refer to smaller sketch as an example of how to complete the larger sketch.

sketch is not
appropriate

34. What were the weather conditions at the time you saw the object?

34.1 CLOUDS (Circle One)

- ☒ a. Clear sky
- b. Hazy
- c. Scattered clouds
- d. Thick or heavy clouds
- e. Don't remember

34.2 WIND (Circle One)

- ☒ a. No wind
- b. Slight breeze
- c. Strong wind
- d. Don't remember

34.3 WEATHER (Circle One)

- ☒ a. Dry
- b. Fog, mist, or light rain
- c. Moderate or heavy rain
- d. Snow
- e. Don't remember

34.4 TEMPERATURE (Circle One)

- a. Cold
- ☒ b. Cool
- c. Warm
- d. Hot
- e. Don't remember

35. When did you report to some official that you had seen the object?

9 Oct 1958
Day Month Year

36. Was anyone else with you at the time you saw the object?

(Circle One) Yes ☒ No

36.1 IF you answered YES, did they see the object too?

(Circle One) Yes No

36.2 Please list their names and addresses:

37. Was this the first time that you had seen an object or objects like this?

(Circle One) Yes ☒ No

37.1 IF you answered NO, then when, where, and under what circumstances did you see other ones?

Under similar circumstances, noticed a faint,
whisker-like object, elliptical shape, about
1" long, travel west to east for a few degrees disappearing
behind roof & could not catch sight of it again.

38. In your opinion what do you think the object was and what might have caused it?

It is easier
to think of things it was not. From the motion, etc, it
must have been self-propelled, but it was like no aircraft
I have seen before or since.

39. Do you think you can estimate the speed of the object?

(Circle One) Yes No

IF you answered YES, then what speed would you estimate?

> 200 m.p.h.

40. Do you think you can estimate how far away from you the object was?

(Circle One) Yes No

IF you answered YES, then how far away would you say it was?

2000 - 3000 feet.

41. Please give the following information about yourself:

NAME [Redacted] [Redacted] [Redacted]
Last Name First Name Middle Name

ADDRESS [Redacted] Pleasant Hill [Redacted] Calif.
Street City Zone State

TELEPHONE NUMBER [Redacted]

What is your present job? Chemist

Age 29 Sex m

Please indicate any special educational training that you have had.

a. Grade school _____

b. High school _____

c. College _____

d. Post graduate Ph.D. Chemistry

e. e. Technical school _____

(Type) _____

f. Other special training _____

Nov. 7, 1958

Reclining in folding beach chair & watching western sky, noticed bright, hazy orange dumbbell shaped object emerge from behind poplar trees that line the western edge of the property. It moved across the southern part of the sky, more rapidly than customary for airplanes. Motion appeared to be more or less perpendicular to dumbbell axis. In size, it was $\frac{1}{2}^{\circ}$ - 1° long. In brightness, about the same in total as a low airplane, but the light was diffuse or hazy, no discrete light source.

Got up almost immediately & ran to back of lot from where the southeast sky is visible. Object passed meridian 30° - 40° south of zenith, turned sharply southward for $\sim 10^{\circ}$, then northward again. Was faint against the glare of lights from shopping center, and seemed to be distant or moving more slowly.

While it was in S.E., a low flying plane flew across the path the object had taken, headed in the direction of the Oakland Airport. Object was still visible beyond the plane, though faint. Wrote to Oakland Airport on lunch that someone in the plane might have seen & reported it.

When in the S.E., the object was no longer distinctly orange or bar or dumbbell shaped, but more like a whitish patch. Could not follow its motion so well.

Object made no sound, and travelled on a path not much used by airplanes here.

First saw it in Aquila, it passed through northern Aquarius, I believe, and got lost in eastern Cetus.

Could hardly have been visible for more than 15 seconds, but this may be underestimated, as I could not time it. When it occurred to me to note the time it appeared, I estimated at least 5 minutes had passed, & the time was therefore about 9:20. Could be fixed accurately from the schedule of the airplane.
