REMARKS Larry- Think the following will suffice for an answer here: "The sample you submitted in your letter of 13 October is "Chaff", made of aluminum foil. It is used by the Air Force in training for defense against enemy radar. When dropped from an aircraft it affects and confuses enemy radar. It is frequently found in areas of the US where such training is conducted. <i>That is correct with the letter</i> <i>L J Tacker</i>

Air Technical Intelligence Center,
Wright-Patterson Air Force Base, Ohio

Dear Sirs,

I am inclosing a small portion of a large amount of material that apparently fell from the skies in northern Ohio. There is evidence that this could not have been dumped from any near-by road.

My friends, who have sent this to me, asked me for an explanation, and I am forwarding some of the material to you for your evaluation. I have only speculations to give them. You have the ability to give them the facts.

Certainly, I will appreciate your comments and results of your examinations.

Sincerely and respectfully,

Dear Mr. [REDACTED]

Your letter of 13 October 1958 addressed to Air Technical Intelligence Center has been referred to this office for reply.

The sample you submitted in your letter is "Chaff" made of aluminum foil. It is used by the Air Force in training for defense against enemy radar. When dropped from an aircraft it affects and confuses radar. It is frequently found in areas of the United States where such training is conducted.

Thank you for your interest in this matter.

Sincerely,

Incl
(Chaff ret'd)

LAWRENCE J. TACKER
