Oct. 31, 1958.

Dear Sir:

This morning at about 15 minutes to 7 my father and at least ten other men saw a large light about the size of a basketball held at arms length over the lake about due north of Middle Bass Island, Ohio. The light was about the brightness of an electric light bulb or a gasoline lantern. It appeared and disappeared twice, each time growing dim until it no longer could be seen, and reappearing in the same manner. All this time the light appeared to be motionless.

These men who are all commercial fishermen were in three separate boats, two being about a mile apart and the third about two and one half miles Southeast of the other two.

After the light faded out no object could be seen where the

light had been. Visibility was good against a clear blue sky. I talked with one of the men by phone tonight and he told me he had seen the same light a week ago today in the same place. My father told me he saw it in the same place about 3 weeks ago. At both these other times the light behaved in the same manner.

All of these men average about 20 to 25 years of experience on the lake, and are quite familiar with airplane sightings. They said that it definitely wasn't an airplane as they even stopped their boats to watch it to check for a plane. If you are still interested in these things it might be worth your while to check on it as it might reappear.

Yours truly,

P.S. Do you want think that I'm "pulling your leg" I'm now graduating from Bowling Green State U. this spring with a B.S. degree in Biology.

Dear Mr. [REDACTED]

We are in receipt of your letter dated 31 October 1958, in which you report an unidentified object sighted by your father, and others.

The information which you have submitted is very limited in nature, and insufficient upon which to base a firm conclusion.

Therefore, it would be appreciated if you would have your father and one man from each of the other boats fill in the attached questionnaires in as much detail as possible. Upon completion, please return the forms to this Center in the inclosed envelopes.

Your interest in this matter is appreciated.

DATE ~~Oct~~ NOV. 10th

The first time we sighted this light we left Port-in-Bay to go to work at Middle Bass. Three of us as we keep a boat here but our main dock and twine is all at Middle Bass so as we were about half way over we seen this light at first it was so bright we thought it a flare, when it faded away but it came on again in a few seconds so I looked at my watch as I wanted to time it so we still thought it a flare but it faded it away again after its bright ness. So when we got into the dock and told our 2 bosses and another guy that works there, well they naturally started to kick us when we had to drink. Ha. Ha. So all was forgotten, only I could not get over it. This happened the first time about 3 weeks before Oct. 31st

DATE 17 Nov. 1958

We were traveling in a boat at about 335 degrees, when I noticed this unusually bright light about the size of a basketball about a mile and a half ahead of the boat. Immediately I informed the other fellows of it. I stopped the boat and we all looked. By then it was very bright but never moved. Then it disappeared completely. Then it came on again just as bright, for about 1 minute ~~was~~ without moving and disappeared completely. About a week later we seen it again in the same place with it doing the same thing. Two other of the fish boats in the same vicinity also seen it and they are filling the blunks out too.

So that night I came home and I told
my oldest son who wrote your letter
what we seen. My son is a senior at
~~B. G. S. U.~~ ^{B. G. S. U.} ~~B. G. S. U.~~ and was always
interested in flying saucers ~~or~~ what
he could Read. So on Fri. Oct. 31st
in the morning we came to Middle Pass
and got our crews in our boats
we started out to lift our nets.

Just as we got abreast of Sugar Island
the boss and myself and another
crew member this light again
appeared in the sky and I shouted
to the other two there is that light
again. So he shut off the motor and
we turned broad side so we would
not have any obstruction if the
wind shield and it acted the
same as the first time we seen
