Entire Document

1. The RHAF reports the following sightings of aerial objects, which are submitted for the record:

a. 0810Z 13 November 1958. An RHAF pilot flying near Volos, Greece, in an F84G at 43,000 feet detected contrails southward over Volos at about 55,000 feet. Contrails veered to NNE, then disappeared northward. Pilot estimates speed of unknown aircraft as 500 knots. He informed radar stations on sighting the contrails and was in communication with a radar site while observing the unknown. Although radar was able to track the RHAF aircraft no radar contact was obtained on the unknown aircraft.
