1. Following is a report prepared by The Victorian Flying Saucer Research Society:

The Reverend [REDACTED] Reports of UFO Activity over [REDACTED] Mission and Vicinity, Papua, New Guinea, 1959.

a. Introduction to the Boianai Reports: The reports described in the following pages constitute the most remarkable testimony of intensive UFO activity reported to civilian investigators in the entire history of UFO research. The sightings are unique in that, for the first time, credible witnesses have reported the presence of humanoid beings associated with UFO's.

One important aspect of the Boianai incidents is that the UFO's were observed closely by the witnesses for a total period of some hours; accordingly the reports should be examined exhaustively for some clue as to the nature and origin of the craft, and for possible points of correlation with other credible reports.

b. Biographical Details of [REDACTED] The Principal Witness: Aged 31 years. Married with two children. Educated Trinity Grammar School, Melbourne, and St. Francis College, Brisbane. [REDACTED] Licentiate in Theology. A qualified teacher, he completed over eight years of service as a missionary in New Guinea.

c. [REDACTED] Reliability as Witness: VFSRS investigators found [REDACTED] at all times co-operative and obviously deeply interested in UFO's and the implications of their presence. Prior to his sightings he discounted the possibility of their existence as manned craft. He exhibits an impressive scholarly detachment and his objectivity is evident in reading the report which follows within. [REDACTED] still remains reluctant to speculate as to the origin or precise nature of the UFO's - at least, until he has had an opportunity to complete some research into the subject.

d. The Corroborative Witnesses: These numbered up to a total of 38 persons during the principal sightings at Boianai, 27 of whom signed the original statement examined by VFSRS investigators. The witnesses were all Papuan natives, several of whom were educated teachers and medical assistants.

e. Background to the Principal Sightings: The Boianai sightings climaxed a relatively short but remarkably acute period of UFO activity in the vicinity of eastern New Guinea. UFO's were observed by both Papuan natives and Europeans. Sightings were reported by educated Papuans and by totally illiterate natives relatively untouched by western civilization and quite ignorant of "flying saucers".

f. Types of UFO Sighted at Boianai and Range of Aerodynamic Performance:

(1) Types: Large, manned craft with elaborate superstructure and smaller apparently remote-controlled discs with no apparent protuberances.

(2) Performance: Hovering, pendulum swinging, tremendous spurts of speed. The manned UFO observed on June 27th was seen to cross the Bay at Boianai (approximately 30 miles wide) in less than a second. Even allowing for the admitted inaccuracy of such a calculation made by scientific laymen the range of the UFO's performance is staggering. The reported changes of color and light intensity are especially interesting.

PAGES

g. Evaluation of the Boianai Sightings: It is submitted that the following propositions may be cited as established by these sightings:

(1) The principal witness is veracious and psychologically stable. This is admittedly a subjective impression gained by investigators, but is supported by the balance of probabilities arising from a consideration of the witness's professional standing and training. The legion of corroborative witnesses supplies supporting testimony of an objective nature.

(2) The Boianai UFO's are not psychological phenomena. The undoubted psychological element present in some UFO sightings has been demonstrated by Jung in his recent treatise. However, the limits of operation of this factor are still undefined and it would appear arbitrary to relegate the Boianai sightings to the category of mass hallucination. The reader is especially referred to Father [REDACTED]'s prefatory remarks within.

(3) The Boianai UFO's are demonstrably not electrical phenomena, meteors, birds, conventional aircraft, and cannot reasonably be attributed to any of the gamut of accustomed physical rationalizations.

(4) The Boianai UFO's are advanced craft, manned by humanoid beings, capable of a fantastic range of aerodynamic performance.

(5) The Boianai sightings do not PROVE ipso facto that the UFO's are non-terrestrial spaceships; they indicate a strong LIKELIHOOD that they are such.

(6) UFO researchers need no longer enquire as to the NATURE of the UFO's but only as to their ORIGIN.

2. The above report was based on the following series of letters received by VFSRS from Reverend [REDACTED]:

Report on Unidentified Flying Objects, Boianai, Territory of Papua and New Guinea, 1959 by [REDACTED] at Boianai, July 14, 1959.

a. Introduction: These reports of observations together with relevant material combine to describe with fair accuracy what is thought to have been a series of activities in the sky at nights over and near Boianai by U.F.O.'s. Main recordings were made on the evenings of June 21st, 26th and 27th. /

As chief observer and sole recorder and reporter of the Boianai phenomena on those dates (at Boianai) I would now hesitate to re-state without further long consideration backed by scientific investigation any opinions or theories as expressed in my personal letters hastily written in that period and which are included in this present material. The value (personal) lies in their subjectiveness against what I hope is objective observational data, and in the complete change of mind from scepticism to the conviction that the UFO's as observed by me cannot be explained away in terms of natural phenomena in the light of past knowledge and experience.

Consideration to the following possible factors, however, cannot be overlooked if this paper is to have any value at all as an attempted objective record.

b. Hallucination: Sketches in the body of the report may be figment of imagination or hallucination. Hallucination may have been experienced simultaneously by the 27 eye-witnesses whose names appear on the signature list.

ORIGINATING AGENCY

Air Attache, AUSTRALIA

REPORT NO.

1,403,022

PAGE

4

OF

15

PAGES

c. Suggestion as an influence to "witnesses": There may have been undue influence by suggestion of a European observer over a less sophisticated or inexperienced native body; there may have been influence caused by subservience of the native body of "witnesses" towards the European observer.

d. Illusion: It is possible that "freak" atmospheric conditions or subjectiveness on the part of the observer(s) resulted in a mis-interpretation of natural phenomena.

e. Unreliable Observers: Inexperience in astronomical observation. Ignorance regarding such natural phenomena as falling stars, meteors, comets, electrical disturbances in the atmosphere; the appearance and usual movements of these.

f. Variation in descriptive evidence from different sources: (1) Mis-interpretation due to inexperience or faulty observation.

(2) Differences in interpretations by individual observers resulting from different experiences.

(3) Variation in distances between reliable observers and the phenomena sighted. Independent observers have noted and reported sightings from as far as twenty miles from Boianai, the source of activity.

In absence of scientific investigation into this present report, theory and hypothesis should be made with note to the following relevant facts concerning the conducting of the main part of the observation and execution of procedure in gathering evidence and writing the report.

(a) The sketch of the UFO later in this report was drawn by Papuan observer ~~Stanley~~. It is important in one significant detail from later sketches. The "underside" is described by him and drawn as showing four "black spots". These markings are replaced in subsequent descriptions and drawings by what appeared to be four straight legs or stands pointing diagonally downwards from the "base" of the UFO.

Can it be assumed therefore that suggestion played no part in respect of this detail upon the minds of observers in subsequent sightings when all, including ~~Stanley~~ independently thought they saw "legs", though descriptions of the general shape of the whole "object" were in fact much the same?

(b) Drawing up of the report was conducted in the following way:

1. On the night of June 26th immediately following the disappearance of the UFO through cloud, 38 witnesses were brought together into a well-lighted room.

2. On separate sheets of paper three observers, namely ~~Stanley, John, and~~ drew what they thought they saw. Each worked in separate parts of the room. Then the sketches were compared and it was found that each resembled the other differing only in size of drawing.

3. Representatives of groups who thought they observed "men" on the UFO wrote their signatures under the respective headings.

4. All observers were briefly addressed by the reporter and given the opportunity of signing a paper stating that a UFO as described in the sketches were seen by them. It was pointed out that they must be truthful and

OF

15

PAGES

sign only if they believed that they saw the UFO as represented by the three drawings. 27 observers of a total of 38 voluntarily signed.

5. The data entitled "U.F.O DATA BOIANAI" later in this report is a copy of the original recorded during the actual time of observation by the reporter.

6. Diagrams were made by the reporter and signed voluntarily under the same conditions as described in paragraph 4 above except that the signatures are representatives of groups only.

7. The sketches relating to sighting at Gubanauna Point were made as part of a written statement by the Rev. [REDACTED] College, Dogura. This statement was drawn up by him a few minutes after the observation.

8. The UFO's sighted on 28 June 1959 are significantly different in appearance from any previously described.

NOTE: The reporter not being a mathematician has attempted estimates of size and distances. It is suggested that the measurements should not be regarded as indisputable. In this respect, as result of further practice with hand-measurement as noted later in the report, the reporter has taken the liberty of making alteration to original data. The HAND-SPAN which originally read as 8 inches now reads as five inches. Other estimated measurements should should therefore be adjusted accordingly. Signed: [REDACTED]

Dear [REDACTED],

(undated)

Have a look at this extraordinary data. I am almost convinced about the "visitation" theory. There have been quite a number of reports over the months, from reliable witnesses. The peculiar thing about these most recent reports is that the UFO's seem to be stationary at Boianai or to travel from Boianai. The Mt. Pudi vicinity seems to be the hovering area. I myself saw a stationary white light twice on the same night on April 9th, but in a different place each time. I believe your students have also sighted one over Boianai. The [REDACTED] and Mr. [REDACTED] have all seen it, or similar ones on different occasions - again, over Boianai, although I think the Baniara people said they watched it travel across the sky from our direction. I should think that this is the first time that the "saucer" has been identified as such.

I do not doubt the existence of these "things" (indeed I cannot now that I have seen one for myself) but my simple mind still required scientific evidence before I can accept the from-outer-space-theory. I am inclined to believe that probably many UFO's are more likely some form of electric phenomena - or perhaps something brought about by the atom bomb explosions, etc. That [REDACTED] should actually make out a saucer could be the work of the unconscious mind as it is very likely that at some time he has seen illustrations of some kind in a magazine, or it is very possible that saucers do exist, but it is only a 50/50 chance that they are not earth made, still less that they should carry men (more likely radio controlled), and it is still unproven that they are solids.

It is all too difficult to understand for me; I prefer to wait for some bright boy to catch one to be exhibited in Martin Square.

Yours, [REDACTED]

REPORT ON UFO SIGHTING

Place: Boianai

Time: 1 a.m. Sunday, 21st June, 1959

Weather Conditions: Patches of low cloud, otherwise clear. Moonlight.

Name of Observer: [REDACTED], Teacher

Description: (as told to [REDACTED] by the observer June 23, 1959 at Boianai.)

On coming out of the house at one O'clock on Sunday morning (21st June) I saw a bright light (white) silently coming out of the sky from a point about a quarter of a mile out to sea, slightly west of the Boianai station. It descended from what seemed a great height and I watched it for the space of about three minutes moving and descending eastwards and parallel to the coast. It stopped at a point a little to the east of the station and a height of about three hundred feet. There it remained stationary for perhaps half a minute and gradually decreased in brilliance until the shape of an inverted saucer could be discerned, which was tilted slightly backwards with part of the base visible. The object then moved upwards and disappeared from view into the clouds.

When first sighted, I thought it to have been a light similar to those dropped by 'planes during the war.

P.S. Underneath the saucer I saw about four round black spots.

Signed: [REDACTED] (OBSERVER)

NOTE: All this information was volunteered without any knowledge of previous sightings of UFO's by [REDACTED], and when questioned afterwards, [REDACTED] claimed never to have heard of "flying saucers". I asked him if he was quite sure the shape of the object was like an inverted saucer and was not, for instance, the shape of a plate, or like a "sixpence", or "like a ball". He was quite certain in his mind that it was more like a saucer than anything else.

Signed: [REDACTED] (REPORTER)

Dear [REDACTED],

Life is strange, isn't it? Yesterday I wrote you a letter, (which I still intend sending you) expressing opinions re the UFO's. Now, less than 24

hours later I have changed my views somewhat. Last night we at Boianai experienced about 4 hours of UFO activity, and there is no doubt whatsoever that they are handled by beings of some kind. At times it was absolutely breathtaking. Here is the report. Please pass it round, but great care must be taken as I have no other, and this, like the one I made out [REDACTED], will be sent to Nor. I would appreciate it if you could send the lot back as soon as possible.

Cheers, Convinced [REDACTED]

P.S. Do you think [REDACTED] should know about this? ([REDACTED] is at present in the Daga country and will not be returning home until 16th July at earliest). If people think it worth while, I will stand cost of a radio conversation if you care to make out a comprehensive report from the material on my behalf !! It's interesting Territory news if nothing else. [REDACTED]

U.F.O. DATA BOIANAI

Saturday

Large UFO first sighted by [redacted] at 6 p.m. in apparently same position as last night (June 26, 1959) only seemed a little smaller, when [redacted] saw it at 6:02 p.m. I called [redacted] and several others and we stood in the open to watch it. Although the sun had set it was quite light for the following 15 minutes. We watched figures appear on top - four of them - no doubt that they are human. Possibly the same object that I took to be the "Mother" ship last night. Two smaller UFO's were seen at the same time, stationary. One above the hills west, another overhead. On the large one two of the figures seemed to be doing something near the center of the deck - were occasionally bending over and raising their arms as though adjusting or "setting up" something (not visible). One figure seemed to be standing looking down at us (a group of about a dozen). I stretched my arm above my head and waved to our

UNCLASSIFIED

SUPPLEMENT TO AF FORM 112

ORIGINATING AGENCY

REPORT NO

Air Attache, AUSTRALIA

1,403,022

PAGE 11

OF

15

PAGES

surprise the figure did the same. [redacted] waved both arms over his head then the two outside figures did the same [redacted] and self began waving arms and all four now seemed to wave back. There seemed to be no doubt that our movements were answered. All mission boys made audible gasps (of either joy or surprise perhaps both).

As dark was beginning to close in, I sent [redacted] for a torch and directed a series of long dashes towards the UFO. After a minute or two of this, the UFO apparently acknowledged by making several wavering motions back and forth. Waving by us was repeated and this followed by more flashes of torch, then the UFO began slowly to become bigger, apparently coming in our direction. It ceased after perhaps half a minute and came on no further. After a further two or three minutes the figures apparently lost interest in us for they disappeared "below" deck. At 6:25 p.m. two figures re-appeared to carry on with whatever they were doing before the interruption (?). The blue spot light came on for a few seconds twice in succession.

The two other UFO's remained stationary and high up - higher than last night (?) - smaller than last night.

6:30 p.m. I went to dinner.

7:00 p.m. No. 1 UFO still present but appeared somewhat smaller - observers go to church for Evensong.

7:45 p.m. Evensong over and sky cloud covered - visibility V.L.

10:40 p.m. A terrific explosion just outside the Mission House. Nothing seen. Could have been an electrical atmospheric explosion as whole sky overcast. At 11:05 a few drops of rain. This may or may not have something to do with UFO. The explosion seemed to be just outside the window - NOT ordinary thunderclap - but a penetrating 'earsplitting' explosion. It woke up people on the station.

SUNDAY - June 28, 1959

No sign of UFO 6 p.m.

6:45 p.m. 1 only UFO practically overhead - slightly north - very high, but clearly distinguishable due to hovering.

7:30 p.m. Same UFO - moved to southern position but still more or less overhead.

9:10 p.m. 3 UFO's in almost straight line - all high, sky clear.

11:10 p.m. 8 UFO's - this the greatest number yet seen at one time. One fairly low, but except for occasional hover, no activity seen on board.

11:20 p.m. A sharp metallic and loud bang on Mission House roof as though piece of metal dropped from great height. No roll of "object" down roof slope afterwards. Outside 4 UFO's in circle around station. All high.

11:30 p.m. To bed and UFO's still there.

Monday - June 29, 1959

A.M. Roof examined. No apparent sign of mark or dent, which one might expect after last night's noise.

Boianai

June 30, 1959

Dear [REDACTED]

Have been having further experiences nightly with UFO - counted
1 large and 7 small over Saturday night,
1 large and 2 small Sunday night,
1 large and 4 small Monday night.

Believe it or not, [REDACTED] exchanged hand signals (before dark Saturday) with the occupants of the "mother" ship a little after 6 p.m. There is no doubt that she occupied by at least 4 men. Assuming that men are the same size as average of earth, I have worked out size of the ship - Top "deck" - 20' diameter) the "mother" - Bottom "deck" - roughly 35'.

Distance of operations, therefore, as we have sighted, have been, at highest altitude 2,500 feet; lowest altitude 450 feet.

That's all for now, must away on patrol.

Yours, [REDACTED].

P.S. No "human" activity has yet been observed on smaller UFO's, which seem to be disks rather than saucers.

UNIDENTIFIED FLYING OBJECTS

Date, Monday 6th July, 1959

At about 8:40 p.m. I noticed a white glow through the cloud, similar to that caused by the moon. Position - North West - a few degrees above Gubanauna Point (the Point is about 3 miles from the College).

The glow changed to a brilliant spot of white light. It descended and moved a little to the South. The brilliance faded to a glow and then to a faint glimmer.

After 5 minutes it glowed again brilliantly and moved in a circular motion (see sketch) anticlockwise. Then it moved further south and down until it became obscured by the Point of land at 9:00 p.m.

Through the binoculars I noticed it to be orange in color and shaped like a disk.

APPENDIX TO REPORT
STATEMENT

Dogura, 9th July 1959

Last night I went out of my house between 11:30 and midnight and I saw a bright beam of light shining across the sea near the shore and parallel to the beach.

The light was white and it lit up waves of the sea. I thought it was coming from a boat and so I returned to the house. I heard no noise.

Signed: [REDACTED] Teacher, Dogura

NOTE:

It is reported that [REDACTED], was dazzled by a bright white light in night of July 8th (about midnight).

No personal statement has been taken from him by me.

[REDACTED] lives on the beach below Dogura Plateau. It is said that he describes the light as originating in the direction of Guvanayba Point and that it lit up the coast line beyond Wedau.

The boat Kekaha (?) was at Wedau wharf on the evening of July 9th. If this information interests you it would be worth checking on the movement and activity of that boat then. Gubanauna Point is roughly 4 miles west of Wedau wharf.

3. The following is an evaluation of the foregoing information by a local interested agency.

REPORT ON THE INVESTIGATION OF UFO ACTIVITY IN THE BOIANAI AREA - NEW GUINEA

a. On Tuesday, 29th December 1959 I visited the [REDACTED] at his home in Sassafras, Victoria, and discussed alleged UFO activities in the area of Boianai, New Guinea.

b. The [REDACTED] Mr. [REDACTED] is a young married man. He is obviously well-educated and has had considerable experience as a missionary/teacher in New Guinea. He stated that until late June 1959 he had not considered UFO's seriously and even now was not convinced that what he had observed in the sky were, in fact, UFO's. He added that he would be prepared to accept any logical explanation for the phenomena. He did not appear to be seeking publicity, and claimed that the report was made public by his superior in Dogura. Further, he implied that the press and flying saucer organizations had distorted some of the facts.

c. Previous Experience of UFO's: Mr. [REDACTED] stated that UFO's have been seen regularly in the Dogura/Boianai area over a long period and that a number of the white population, including government officials, professional men and missionaries, were taking an active interest in them. The first occasion that the [REDACTED] had heard directly of UFO's operating in the area was in November 1958 when three of his friends in Dogura observed, on two separate occasions, lights travelling at high speed and at high altitude. One of these lights was said to be intermittent. In March/April 1959 he and his wife saw unexplainable lights high on Mount Purdi, which is some four to five miles south of the mission station, and which is not normally frequented by natives. These lights appeared to switch from one side of the mountain to the other with great rapidity.

d. Sightings of June/July 1959: Prior to the first sightings by the [REDACTED], he had undertaken a trek in the jungle for a period of ten days. On his return he was informed that one of his native teachers had observed a bright light in the sky, on the evening of the 21st June. Subsequently, over a period of approximately two weeks, the [REDACTED] observed a series of bright lights in various sections of the sky in the vicinity of his mission station. These lights were also seen by a number of his native staff (refer to copy of [REDACTED]'s report held by you).

e. On the night of the 26th June the largest of the bright lights had projections along the upper edge which resembled human forms. Although features and clothing could not be distinguished they appeared to respond to hand-waving by the party of observers who concluded that they must be humans. The [REDACTED] was unable to take photographs because he had no film at the time of the sightings.

Comments

f. Many of the white and native population of the area have been seeing bright lights which travel at great speed for some considerable time and are convinced of the existence of flying saucers.

g. Probably the constant light and the intermittent light observed in November 1958 were the USSR and US Satellites. The lights seen by the [REDACTED] on Mount Purdi, in March 1959, could well have been light from the setting sun reflected on wet or shiny-surface rocks.

h. Although the [REDACTED] could be regarded as a reliable observer, it is felt that the June/July incidents could have been nothing more than natural phenomena colored by past events and the subconscious influences of UFO enthusiasts. During the period of the report the weather was cloudy and unsettled with light thunder storms. Although it is not possible to draw firm conclusions, an analysis of rough bearings and angles above the horizon does suggest that at least some of the lights observed were the planets Jupiter, Saturn and Mars. Light refraction, the changing position of the planet relative to the observer and cloud movement would give the impression of size and rapid movement. In addition, varying cloud densities could account for the human shapes and their sudden appearance and disappearance.

4. COMMENTS of Reporting Officer: The villages of Boianai and Wedan are located at $10^{\circ} 02' S - 149^{\circ} 53' E$ and $10^{\circ} 06' S - 150^{\circ} 06' E$ respectively.

This office concurs with the conclusions drawn in paragraph h above.

It may be interesting to note that the Minister for Air recently received an inquiry from Major [REDACTED], representing the National Investigating Committee on Aerial Phenomena, regarding the [REDACTED] report and requesting he be furnished a copy. [REDACTED] also inquired as to whether the USAF was furnished the report. The Minister's office advised [REDACTED] to correspond directly with [REDACTED] for information concerning the sightings. Our message C-169, 3 December 1959 and AFCIN-3C cite C-130 31 December 1959 contains information upon which reply was based.

RAAF Statement on Gill Sightings

Representative [redacted] of Australia has forwarded a copy of a letter from Squadron Leader [redacted] in answer to his letter of 25 January 1960, requesting information to the RAAF's conclusions about the [redacted] sightings (APRO Bulletin, Page 1, November 1959 issue). The following is the text of [redacted] letter of 22 February: "Dear Sir, Thank you for your letter of the 25th January 1960. An officer of this Directorate has investigated Reverend [redacted] report of U.F.O. activities in the Boianai area of New Guinea, and copies of his findings have been submitted to proper authorities. As mentioned in cur 114/1/201 (22) dated 14th February, 1957, such [redacted] March 1960

reports are not releasable to the public. However, although it is not possible to reach any positive conclusions, we do not believe that the phenomena observed by the Reverend [redacted] and his party were manned space vehicles. An analysis of bearings and angles above the horizon does suggest that at least three of the lights were planets, e.g., Jupiter, Saturn and Mars. Light refraction, the changing position of the planets relative to the observers and the unsettled tropical weather could give the impression of size and rapid movements. (Signed), Yours Faithfully, [redacted] (Read again the report of Mr. [redacted] and Reverend [redacted] and see if you can stretch your imagination to the point where Mars, Saturn and Jupiter will fly pell mell across the sky at great speeds, and with men standing on them and waving, yet! There's something wrong with the astronomy textbooks! ... the Editor)
