

PROJECT 10073 RECORD CARD

1. DATE 3 Jul 59		2. LOCATION Needles, California		12. CONCLUSIONS ☐ Was Balloon ☐ Probably Balloon ☐ Possibly Balloon ☐ Was Aircraft ☐ Probably Aircraft ☐ Possibly Aircraft ☐ Was Astronomical ☐ Probably Astronomical ☐ Possibly Astronomical ☒ Other <u>Mirage</u> ☐ Insufficient Data for Evaluation ☐ Unknown	
3. DATE-TIME GROUP Local <u>1934</u> GMT <u>04/0334Z Jul 59</u>		4. TYPE OF OBSERVATION ☐ Ground-Visual ☐ Ground-Radar ☒ Air-Visual ☐ Air-Intercept Radar			
5. PHOTOS ☐ Yes ☒ No		6. SOURCE Civilian			
7. LENGTH OF OBSERVATION 10 mins		8. NUMBER OF OBJECTS 4		9. COURSE Stationary	
10. BRIEF SUMMARY OF SIGHTING Four kite-shaped objs size of a nickel. At first sight looked like eagle coming towards windshield. Flew back & forth sideways, but stayed in relatively same position. In sight 10 mins. A/c could not close on obj.				11. COMMENTS Possible reflection. Sighting appeared at dusk. A/c was not able to close & appearance did not change w/ heading.

Memo, AFCIN-4E4g, 24 July 59 (U) Unidentified Objects South China Seas

1st Ind (AFCIN-4E1a/^{Memorandum}Capt. Keriakou/lcm/74201)

26 August 1959

TO: AFCIN-4E4g

1. Inspection of radar returns of the suspected UFO's on KD-2 film for mission FJ-056 reveal no unusual or distinguishing factors that would afford data for an analysis. Radar returns seem to be normal scope points.
2. However, as a comment on Report #1264291, the UFO's could possibly be:
 - a. Submarine activity, to include a refueling operation.
 - b. Chinese fishing sampans off the China coast.
 - c. Giant Manta Rays (known to exist up to 25-30 ft. in wing span), floating on top of the sea or swimming just below surface. Color features indicated in basic report correlate with this theory; however, do rays reflect radar energy?
