1. DATE 11 Jul 59		2. LOCATION North Pacific (Hawaii)		12. CONCLUSIONS ☐ Was Balloon ☐ Probably Balloon ☐ Possibly Balloon ☐ Was Aircraft ☐ Probably Aircraft ☐ Possibly Aircraft ☒ Was Astronomical Fireball ☐ Probably Astronomical ☐ Possibly Astronomical ☐ Other _____ ☐ Insufficient Data for Evaluation ☐ Unknown	
3. DATE-TIME GROUP Local <u>9 sightings</u> GMT <u>see summary</u>		4. TYPE OF OBSERVATION ☐ Ground-Visual ☒ Shipboard & Air-Visual ☐ Ground-Radar ☐ Air-Intercept Radar			
5. PHOTOS ☐ Yes ☒ No		6. SOURCE Military & Civilian			
7. LENGTH OF OBSERVATION varied 3 - 15 secs		8. NUMBER OF OBJECTS varied/see summary		9. COURSE SE	
10. BRIEF SUMMARY OF SIGHTING Nine sightings of exceptionally bright light described variously as flaming meteors, dimly glowing obj, rnd & of an intense bluish-white color, bright star, auto headlight, moving very fast.				11. COMMENTS The description of the obj closely matches that of meteors of the fireball class.	

To indicate that even experienced observers may, under the strain of excitement, make errors in reporting, Captain [REDACTED] indicates that it was bright moonlight; however, the moon set at 0830Z, more than four hours prior to the sighting. Captain [REDACTED] indicates that there were traces of daylight, yet morning twilight did not begin at his position until 30 minutes after the sighting. Captain [REDACTED] indicates the object was probably a meteor.

It is concluded that the object responsible for this sighting was probably a "fireball".

[REDACTED] 0.

O retrato do dia

Pilotos encontraram "Disco Voador" sobre o Pacífico

SÃO FRANCISCO, 13 (UPI) — Um piloto da Pan American Airways informou que esta manhã um grupo de luzes sumamente brilhantes se aproximou de seu avião de passageiros a grande velocidade sobre o Pacífico e em seguida desapareceu bruscamente. Outros quatro pilotos de empresas aéreas que fazem o serviço sobre o Pacífico também informaram haver visto objetos não identificados.

Um porta-voz local da Pan American Airways disse que a primeira notícia foi dada pelo capitão George Wilson, piloto de um avião de passageiros DC-7 quando voava entre São Francisco e Honolulu às 6h 20m da manhã, hora local.

«Eram luzes extremamente brilhantes, rodeadas por luzes menores», disse o piloto, e acrescentou: «A aproximação do objeto se verificou quando voávamos a uns

6.400 metros de altura. Imediatamente o conjunto de luzes desapareceu rumo sul. Depois de uns dez segundos todas as luzes desapareceram». Terminou dizendo que o fenômeno ocorreu às 6.02 hora norte-americana do Pacífico». Nesse momento nos encontrávamos a 1350 km. de Honolulu» — acrescentou.

Depõem Outros Dois Pilotos

Pouco depois outros dois pilotos da mesma empresa informaram pelo rádio haver distinguido as mesmas luzes. O capitão Noble Sprunger, que se dirigia de Los Angeles a Honolulu, informou que observara os objetos às 6 horas um pouco mais ao sul da posição que tinha o aparelho de Wilson.

O terceiro piloto da Pan American Airways que viu as luzes foi o capitão E. G. Kelley, que saiu de São Francisco para Honolulu meia hora antes que Wilson. O porta-voz da Pan American Airways disse também que o piloto de um avião de passageiros da Canadian Pacific Airlines e o da empresa de transportes de carga Slick Airways, anunciaram haver distinguido as luzes. Ambos se dirigiam a Honolulu.

PILOTS MEAN WITH THE "FLYING DISK" OVER THE PACIFIC

San Francisco, 13 (UPI) A pilot of the Pan American Airways informed that this morning a ~~group~~ group of very brilliant lights approached his aircraft at great speed over the Pacific and then disappeared suddenly. ~~Four~~ Four other pilots of aviation enterprises which operate over the Pacific also inform that they have seen unidentified objects.

A local spokesman of the Pan American Airways said that the first notice was given by Captain ~~[REDACTED]~~, pilot of a passenger aircraft DC-7 when he was flying between San Francisco and ~~Honolulu~~ Honolulu at about 6:20 in the morning local time.

"They were very brilliant lights surrounded by lesser lights," the pilot said, and he added, "The approach of the object took place when we were flying ~~at~~ at about 6,400 meters altitude. Immediately the set of lights ~~disappeared~~ disappeared to the south. After some ten seconds all the lights had disappeared." He finished by saying that the phenomenon had occurred at about ~~6:02~~ 6:02 pacific time. "At that time we were ~~1,350~~ 1,350 km from Honolulu," he added.

The third pilot of the Pan American Airways who saw the lights was Captain ~~[REDACTED]~~ who left San Francisco for Honolulu a half an hour before ~~[REDACTED]~~. The spokesman for the Pan American Airways also said that the pilot of a passenger aircraft of the Canadian Pacific Airlines and a pilot of the ~~freight~~ cargo transportation enterprise, Slike Airways announce having detected the lights. Both were on the way to Honolulu.

A similar sighting, which saucer enthusiasts have publicized as a brilliantly lighted UFO that appeared to hold a definite course, occurred at 3:02 A.M. on July 11, 1959, also over the Pacific [18]. The pilot of a Pan American Airlines flight reported that a mysterious bright object accompanied at its left by four smaller lights had approached his plane at "inconceivable speed," made a sharp right turn, and then disappeared. The objects seemed to be flying evenly spaced in formation, and the pilot, who had never seen anything like it in all his years of flying, told the newspapers, "I'm a believer, now."

The official investigation began immediately. Four other commercial flights had reported seeing the object at the same time. In each case, the pilot stated that the objects seemed to head straight at his plane at high speed on a collision course, then made a 90-degree turn and disappeared. The various reports, however, showed significant disagreements. Some witnesses gave the color as white, some as orange-yellow. Of the several pilots, each gave a different description of the "formation": a big light with four smaller lights flying at the left; a big light surrounded by a cluster of six or seven smaller lights; a big light followed by four smaller lights; a big light in the center of a rectangle formed by four smaller lights. Of the five pilots who made official reports, one said the phenomenon was definitely not a meteor, two said it could have been a meteor, and two did not venture an opinion. The pilots of several other flights stated, on landing, that they too had seen the objects but had not radioed a report because they assumed it to be a meteor.

After mapping and correlating all the observations, ATIC completed the analysis and released the result to the press of July 14, only three days after the sighting, a remarkably efficient piece of work. Conclusion: the object was a fireball [20].

The literature of flying saucers contains dozens of similar incidents that fit perfectly into the meteor pattern. Pointing to this list of "unidentified" flying objects, saucer addicts still abuse the Air Force for concealing the "fact" that these UFOs are actually spaceships!

VETERAN FLIER VISIBLY SHAKEN

Airline Pilots See Mystery Lights

Honolulu (UPI) — A Pan American Airways pilot reported that a mysterious object approached his airliner at "inconceivable" speed early yesterday and then disappeared.

Four other transpacific airliner pilots reported sighting unidentified objects.

The pilot who made the first report was Capt. George Wilson, 43 years old, of Seattle, Wash., a 19-year flying veteran. He was flying a DC-7C from San Francisco to Honolulu when, at 3:02 a.m. Hawaii time (8 a.m. CDT), "one intensely bright white light followed by four smaller lights was seen about 1,000 miles east of Honolulu in clear skies," he said.

"WE WERE cruising at 20,000 feet with low clouds

decked below us when the object first appeared about 1,000 feet above us and to our left.

"My copilot, Richard Lorenzen of Los Altos (Cal.) and Flight Engineer Robert Scott stared open mouthed as the light came toward us at an extremely high rate of speed. For at least 10 seconds it maintained its course which was on an opposite heading to us and had it been another aircraft it would have passed well to our left.

"Suddenly the object made a sharp right turn at a speed inconceivable of any vehicle we know of and the light suddenly disappeared. The smaller lights were evenly spaced and were either part of the mysterious object or this was an

example of darn good formation flying."

WILSON, VISIBLY shaken, said he had never seen anything like this in his 19 years of flying. He added that he had never believed such foreign objects existed.

"I'm a believer now," he said.

Four other Honolulu-bound airliner pilots made similar reports at approximately the same time.

MEDDELANDE

Från K. Gösta Rehn Smedjevägen 2 A BROMMA		Till Dept of the Air Force Washington, D.C.	Datum Sept 3, 1959
Ärende UFO			Vår beteckning Eder beteckning — Edert meddelande Att. Major L.J. Tacker

Dear Major Tacker,

I thank you very much for your sending me several recent Fact Sheets and transcript of the TV discussion on the Armstrong Theatre.

I have been in touch with the Swedish Defense Staff which handles UFO-matters and they are in complete agreement with the US Air Force regarding the problem. As there has been several peculiar cases in Sweden too they as well as I have been looking into the matter (I being no saucer nut).

I hesitate to ask you to increase your kind courtesy and favor by sending me the comments you might have on the sighting, reported on July 12th 1959 by PAA Captain [redacted] from his flight Frisco to Honolulu. I have only the newspaper report. It would be very nice indeed to hear of the outcome.

As I stated in my previous request my reference is to [redacted] the Presidents appointment secretary at the White House. He knows me very well, we having camped together in various offices before the war. He is a Major in the AF, I think. Thank you.

5622 657. 250 000

Sincerely,
[redacted]
[redacted]

8 September 1959

Dear Mr. [REDACTED]

This acknowledges your letter of 3 September 1959 regarding Unidentified Flying Objects, particularly the July 11 sightings in the Pacific.

These sightings were attributed to an exceptionally bright and large meteor called a "fire ball" or "bolide."

Sincerely,

LAWRENCE J. TACKER
Major, USAF
