7. LENGTH OF OBSERVATION 1 hr 33 mins		8. NUMBER OF OBJECTS one		9. COURSE SE	
10. BRIEF SUMMARY OF SIGHTING Unidentified radar track. Speed between 40 & 60 kts.				11. COMMENTS Based on winds aloft, track movement & track groundspeed, the UFO could possibly be a balloon; however, lack of info makes a thorough analysis impossible. Also the anomolous propogation in the area could be the cause as could the effects of the permanent echos fm a temperature inversion. Case listed as insufficient data.

21 Jan 60

TO: AFCIN-4E4g

1. An analysis of the attached UFO message reveals the following possibilities:

a. The reported anomolous propagation in the area could possibly be responsible for the unidentified radar pick up, particularly if a severe temperature inversion existed and permanent echoes on the radar were predominant.

b. Based on the winds aloft, track movement and track groundspeed, the UFO could possibly be a balloon.

2. The lack of information on this UFO makes a more detailed and thorough analysis impossible.
