2. Mr. [REDACTED] had attempted to contact you today but apparently was unable to do so. He said that he knew you and that you would know him. He made reference to a sighting of 5 March 1960 from the same area and at the same time of day; 1750 hours. He said that you would be familiar with this case.

3. Mr. [REDACTED] is desirous of talking with you and will probably try to contact you on Monday, 18 April 1960. He had your office extension.

NNNN

On April 11 at Hazel
Green, Wisconsin 3 bright UFOs were photographed for 20 seconds
on 8 mm color film by housewife, Mary Jo Curwen.

April 11: Hazel Green, Wisc.—The
movie film of three UFOs reported
elsewhere in this issue.

NEW UFO MOVIE SUBMITTED TO AIR FORCE 1960

A new color movie taken April 11 by
a Wisconsin woman has been turned over
to the Air Force for analysis. The
movie, showing three bright UFOs, has
been viewed by NICAP member Charles
Morris, Dubuque, Iowa, who reported
sighting three elliptical UFOs March
4 (see March UFO Investigator.)
Morris, who had unsuccessfully exposed
several feet of movie film during his
own sighting, is investigating the new
case on behalf of NICAP. The UFOs are
visible on about 20 seconds of 8 mm
color film.

The successful color movie was taken
by Mary Jo Curwen, Hazel Green, Wisc-
consin. She and her family all saw the
UFOs. The film was first viewed by
the staff of the Dubuque Telegraph-
Herald, which had reported Morris'
sighting and film to the Pentagon.
(The AF later told the paper that
Morris had seen real UFOs—not any
known military or civilian aircraft.)
AFIC has promised to notify the paper
about its conclusions on the Curwen
film. The AF answer, and more details
on the sighting, will be covered in a
later issue.

Analysis and Conclusions: A sighting occurred in the vicinity of Dubuque, Iowa a few days prior to this sighting, and it received quite a lot of publicity. All this publicity could account, at least partially, for this particular report. Although it was reported that ~~xxxxxxx~~ the objects were photographed, the film was never received at AFIC. The claim was made that the objects showed up on the film; however, not being able to see the film, this claim is considered invalid.

(OVE)

Analysis Cont;

The reporting individual, a 17 year old girl, said that her brother first saw the objects, then she ~~saw~~ took some 8mm movie pictures of them. The size was reported as that of large transports, which would suggest that they were fairly close to the ~~3~~ witnesses. If this was the case, they ~~saw~~ should have been seen by other individuals, which apparently wasn't the case as there was no other reports concerning the objects. It is possible that the witnesses were influenced by the recent publicity on this subject, ~~xxx~~ it is also possible they saw three acft at a high altitude ~~xxx~~ reflecting the sunlight, their wings and tail obscured by this reflection. This, with a little exaggeration, could very well account for the report received. Therefore, this report is evaluated as prob acft, coupled with exaggeration.
