

PROJECT 10073 RECORD CARD

1. DATE 14 Jun 60		2. LOCATION Concord, Massachusetts		12. CONCLUSIONS ☐ Was Balloon ☐ Probably Balloon ☐ Possibly Balloon ☐ Was Aircraft ☐ Probably Aircraft ☒ Possibly Aircraft ☐ Was Astronomical ☐ Probably Astronomical ☐ Possibly Astronomical ☐ Other _____ ☐ Insufficient Data for Evaluation ☐ Unknown	
3. DATE-TIME GROUP Local 2100 GMT 15/0100Z		4. TYPE OF OBSERVATION ☒ Ground-Visual ☐ Ground-Radar ☐ Air-Visual ☐ Air-Intercept Radar			
5. PHOTOS ☐ Yes ☒ No		6. SOURCE Civilian			
7. LENGTH OF OBSERVATION no more than 30 sec		8. NUMBER OF OBJECTS one		9. COURSE S-W	
10. BRIEF SUMMARY OF SIGHTING Very large sphere in relation to star, extremely bright orange, first seen in the SSW, last seen in the W. Apparent motion was S-W, moved very fast, blinking, viewed for no more than 30 sec. Rose into view behind treetops and climbed to the W.				11. COMMENTS The apparent speed of the object was excessive for a balloon, but is suggestive of an a/c.	

July 26, 1960

Mrs. [REDACTED]

[REDACTED], Mass.

Dear Mrs. [REDACTED]

We have not been able to determine the nature of your recent observation, and are therefore forwarding your report to:

AFCIN - 4E4
Air Technical Intelligence Center
Wright-Patterson Air Force Base
Ohio

Any further correspondence regarding this matter should be sent to them.

Thank you very much for your time and interest, and should we be able to help you again please do not hesitate to write or call.

Respectfully,

[REDACTED] on

WWM/ts
cc: ATIC

REPORT FORM FOR UNIDENTIFIED OBJECTS

Information marked * is vital

- * Place of observation: ~~XXXXXXXXXXXXXXXXXXXXXXXXXXXX~~ Mass
- * Date: June 14, 1960 * Time: 9.00 P.M.
(Give Time Standard and whether a.m. or p.m.)
- * Accuracy of time given above:
(e.g. say "exact", or "+1 minute", or "+5 minutes", etc.)
No accuracy at all - in my interest and excitement I did not check but
stood some time watching the sky - 10:00 to 10:30 PM EDS
Direction in which object was first seen:
(To N, or SE, or WNW, etc.)
South-southwest slightly
Direction in which object was last seen: west
- * Length of time object was seen: no more than half minute
- * Apparent direction in which object travelled: south to west
(N-S, SW-NE, W-N, etc.)

Did it change direction? no - rose to my view from tree tops at the
back of my garden and rose in sky to west.

General impression of speed: very fast and blinking

Size and shape (if any): sphere - very large in
(If just like a star; say "star-like")
relation to star or planet and seemed fairly close to earth

Brightness and color: extremely bright and orange in color

Any marked variation in brightness? no

Did it explode, disintegrate, or suddenly vanish? no

* Any tail or trail? no

Did any sound accompany the object? I was on a screened porch and heard no sound

If sound followed later, give time interval:

Was it examined with binoculars or telescopes or photographed? no

Any other remarks: This object was in the half-way distance path of a beam which was not like an air beacon. I felt it was from Nike at Nobsco but might have been Lincoln. This beam was shorter in length than an air beacon. I should say it crossed the path, being never too high while visible to me, badly worded but I mean the beam itself as being a path of light

Name: [REDACTED]

Phone No: during day [REDACTED]

Address: [REDACTED]

Date: [REDACTED]

Concord, Mass

Not a satellite.

Possibly a balloon.

If not, then in "UFO" class.

AG.
