REPORT # 1

UFO REPORT - 10/8/60 (on or about)

Witness: Mrs. [REDACTED] (and son, Steven, then age 8)
Westford, Massachusetts

Education: 10th Grade, High School
Occupation: Housewife

PLACE: Westford, Massachusetts

DATE: October 8, 1960 (on or about) TIME: 7:00 PM EDT (approx.)

SIGHTING:

(In Mrs. [REDACTED] own words) - "As my son and myself came N.E. on Concord Road (we came upon)...a clearing on the right hand side of the road. We knew that only an older couple lived there and though they have many chicken houses at the rear of their home, they were out of business. As my son Steve and myself approached the clearing and saw the house lit up at one end, we knew they were there and that all was well. Above the house (at the right end) were many lights. A very large circular object seemed to hover there. I had seen this same one in April of 1960 but only for seconds as it left straight up at that time. I told no one of the first sighting, hardly believing it myself... (My first contact about UFO came from a sister who lived several years in Washington state. A major in the Air Force told us of sightings over Panama in 1947.)...Steve and I sat in the car, which I had stopped, with knees shaking. I asked if we dared to get out and walk around. We decided to get out of the car. [REDACTED] took the flashlight as it was just after sundown and darkness was coming on. We got out, walked under the UFO. It was very large - I would say about 80 to 100 feet across. It had 6 picture windows in a row across the bottom. (behind these) was a very bright light which did not penetrate the surface of the ship. It wasn't any higher than an Elm tree, about 150 feet. As Steve put the beam of the flashlight on its surface, it was a very beautiful dark blue satin finish. We stood under it several minutes. Many lights came on at its outer rim. Blue-white lights. It started moving in a circular motion and moved out to the N.W. at a very fast speed, went up, and was gone. In all I would say we spent some 23 minutes there. We returned to the car and before I started it up my knees were no longer shaking. I didn't realize until this time that we were not afraid once we made the decision to leave the car. A very very strange but nice feeling of which we both had felt. I have filled out a form on this sighting but want you to understand we have no fears. With a sighting that close and that long, if anyone meant any harm it could have well been done in that length of time. My personal interest in all of this is a contact. That I want more than anything. We have had many good sightings since, of which I have filled out reports from the past to the best of my knowledge."

Additional information concerning this alleged sighting is as follows: The weather was clear. No sound was heard except a slight "whining" sound as it moved away. The object was sharply outlined and its apparent size was compared with a 14" platter held at arm's length.

Remarks

1. How difficult was it to see the object? *Very clear, dusk*

2. How far away was the object? *Neither in view*

3. How long did the object stay in view? *No*

4. What was the object's shape? *NOTHING*

If so, please tell how many, and draw a sketch of what you saw, including

5. Describe the object in detail. *Small, 100ft Diameter, 30ft thick, 8 square*
inches on bottom in a row, bright light could be seen but not (diffuse) shallow scattered
light. No sound

6. What was the object's color? *No*
of dark blue iridescent velvet

(Please describe, if you can give them)

7. How long did the object stay in view? *21 minutes*
to 22 minutes

8. How fast was the object moving? *Slowly built up speed*

9. How high was the object? *No*

10. How low was the object? *No*

11. How bright was the object? *No*

12. How dark was the object? *No*

13. Did you see anything else? *No*

14. How far away was the object? *No*

15. How high was the object? *No*

16. How low was the object? *No*

17. How bright was the object? *No*

18. How dark was the object? *No*

19. How fast was the object moving? *No*

20. How long did the object stay in view? *No*

21. How high was the object? *No*

22. How low was the object? *No*

23. How bright was the object? *No*

24. How dark was the object? *No*

Q. Information?
A. Yes.
Q. Information?
A. Yes.

1. Was the object of the observation when observed with the following held at arm's length?

- | | | |
|-------------|------------|-----------|
| a. Aircraft | b. Missile | c. Object |
| d. Rocket | e. Machine | f. Ship |
| g. Other | h. Other | i. Other |
- Object: **FLATTER (14" DIAM)**

MRS. JOSEPH T. CHORNEY of Westford, and her son, STEVEN

*Mother, Son Report UFO Sightings***Flying Saucers Seen Over Westford**

Have you ever seen a Flying Saucer or a UFO (Unidentified Flying Object)?

A Westford mother and her 12-year-old son claim they had two sightings, the most recent being on Sept. 15, and the first in April, 1960.

Mrs. Joseph T. Chorney and son, Steven, vividly recall both experiences which they say took place in the Greater Lowell area.

Mrs. Chorney's report, in her own words, follows:

"At exactly 7:50 p.m. on Sept. 15, 1964, my family observed a

large ship—a very dark object that appeared to be oval-shaped. It had two very bright lights, one at each end, but blinked alternately.

"It circled the area, then hovered for awhile, then came down southwest of my home. There were four small objects appearing like red lights that circled the area for several hours that same evening. They returned to the larger ship's area about midnight. Many aircraft (conventional) were seen that same evening."

Mrs. Chorney's first sighting

of a UFO occurred in April, 1960, and of that experience she reported:

"I saw a UFO on Concord Road, Westford. The same year, in October, my son Steven and I approached the exact same object in the same area about 150 feet above the ground. We stopped, got out of the car, and walked under it. It was very large with eight large 'picture' windows on the bottom in a row. There was light in the windows that was very bright.

SAUCERS

SAUCERS

(Continued from Back Page)

but it did not penetrate the surface.

"We counted the windows with a flashlight; which reflected off the surface of the object. It had a shallow scalloped edge, dark shiny surface, with many lights on the outer edge. We observed this object for about 22 minutes.

"The lights went out, and it left by moving itself in a circular motion. We could hear a slight whir coming from it at that moment."
