COURSE<br>NE                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |
| 10. BRIEF SUMMARY OF SIGHTING<br>Round cone, size of a basketball, blue, red, white, green and orange. Had fingers at the pointed end, brighter than a star and moving overhead going in a NE direction and disappearing over the horizon behind mountains. Gave the appearance of tumbling. |  |                                                                                                                                                                                                                  |  | 11. COMMENTS<br>Sighting was 5 min. Report came from 13 sources consolidated in one report. Unable to determine if the time was this duration or covered the limits of reported sightings. Also colors from opposing ends of the spectrum, and unable to determine if all these colors were reported by all witnesses or if this was a composite. Or whether all reported tumbling. If the duration was that of a meteor, this sighting would be identified as such. Also an aurora was known to be in area. Insufficient data for evaluation.                                                          |  |
