3. DATE-TIME GROUP Local _____ GMT <u>25/2330</u>		4. TYPE OF OBSERVATION ☒ Ground-Visual ☐ Ground-Radar ☐ Air-Visual ☐ Air-Intercept Radar			
5. PHOTOS ☐ Yes ☒ No		6. SOURCE Civilian			
7. LENGTH OF OBSERVATION 2 hrs		8. NUMBER OF OBJECTS several		9. COURSE vertical	
10. BRIEF SUMMARY OF SIGHTING Witness reported a sighting of unusual objects on a great number of occasions between sunset and midnight. Objects were reported to appear in E and N and have erratic movements. Objects were brighter than planets and displayed colors that appeared as a spectrum.				11. COMMENTS Witness visited by Major Friend. After discussion with her the following facts were evident. Witness was never very specific and always used terms such as big, fast, huge, etc. However the information which is factual tends to indicate that a mirage was the cause of the various sightings. Due to lack of specific data it is impossible to determine the exact light sources for these observations.

BRIEF SUMMARY OF SIGHTING:

THE WITNESS REPORTED SIGHTING UNUSUAL OBJECTS ON A GREAT NUMBER OF OCCASIONS BETWEEN SUNSET AND MIDNIGHT. THE OBJECTS WERE REPORTED TO HAVE APPEARED IN THE EAST AND NORTH AND TO HAVE ERATIC MOTIONS. THE OBJECTS WERE DESCRIBED AS BRIGHTER THAN PLANETS AND TO DISPLAY COLORS THAT APPEARED AS A SPECTRUM.

EVALUATION: CASE CATEGORY: PROBABLY A MIRAGE

CONCLUSION: THE WITNESS IN THIS CASE WAS NEVER VERY SPECIFIC, USING SUCH NON-SPECIFIC ADJECTIVES AS BIG, FAST, HUGE ETC. HOWEVER, THE INFORMATION WHICH IS INCLUDED IN THE REPORT POINTS TOWARD MIRAGES AS A CAUSE. DUE TO THE LACK OF INFORMATION IT IS IMPOSSIBLE TO DETERMINE THE EXACT LIGHT SOURCES RESPONSIBLE IN EACH INSTANCE.

AFMIA-4a2x

UFO Sightings (Mrs [REDACTED])

SAFMI-3d (L/Col Tacker)

1. Reference the attached letters from Mrs [REDACTED] dated 25 Oct, 26 Oct, 1 Nov, 3 Nov and 11 Nov 1960. The letters were all addressed to Civil Defense Headquarters.
2. In the referenced letters, Mrs [REDACTED] claims to have sighted unusual objects on a great number of occasions between sunset and midnight. The objects were reported to have been seen by a number of people and Mrs [REDACTED] states that the appearances were unusual and the motions erratic. The objects were reported to have appeared in the east and north.
3. Telephone contact with Mrs [REDACTED] on 10 November 1960 did not add to the data concerned with the sighting. The witness couldn't or wouldn't contribute anything specific, but answered all questions with such non-specific adjectives as "huge" and "big" and described the motions of the object as "didoes."
4. Mrs [REDACTED] did contribute the fact that Rev [REDACTED] of Ft Seneca, Ohio had been to her house on 7 November to observe an UFO. Telephone contact was made with Rev [REDACTED] and he contributed the following facts: Mr [REDACTED] visited the home of Mrs [REDACTED] on 7 November 1960, at approximately 2300 hours, and at that time observed through his 3" telescope (20 power) an unidentified object. The object was generally north of the observer's position and at approximately 30° elevation. The object was described as being brighter than a planet and displaying to some extent spectrum like colors. Rev [REDACTED] believed the object to be brighter than the planet Venus. The azimuth of the object remained fairly consistent but the witness reported that the elevation probably increased slightly. Rev [REDACTED] stated he did not believe the object to be an aircraft of any type.
5. Telephone contact was made with the Erie Ordnance Depot to determine if any testing by them could be responsible. Firings at the depot have been conducted only between the hours of 0700 and 1300 during week days. Mrs [REDACTED] sightings always occurred between sunset and midnight.
6. It seems strange that Mrs [REDACTED] is the only person reporting objects from the area; if indeed, there were objects there such as she described.

The object viewed by Rev [REDACTED] and Mrs [REDACTED] could possibly have been a mirage of some common object. When talking with Rev [REDACTED] this possibility was pointed out to him and he accepted it as a possibility.

7. It has been impossible to obtain the weather data for the area due to its being in transit to the storage depot in North Carolina. Absence of the weather data makes it impossible to determine if weather was a factor in the [REDACTED] sighting. This sighting will be given further consideration after the weather data has been obtained.

8. In view of the limited data, it is impossible to state definitely the cause of the sightings by Mrs [REDACTED]. The tone of this witness, both from her letters and the telephone conversation, indicates that she is very high strung. It is quite possible that this witness has been observing common objects under unusual conditions, and due to her distraught condition, let her imagination expand upon the illusion which resulted in her viewing the object as a possible threat.

9. ATIC does not consider this case closed, and if subsequent data reveals the probable cause your office will be immediately notified.

U.S. AIR FORCE TECHNICAL INFORMATION SHEET

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes, and will be regarded as confidential material. Your name will not be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that, if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

25 Oct 60
Day Month Year

2. Time of day: 1830 1943 2000
1850 1910 2070
Hour Minutes

(Circle One): A.M. or P.M.

3. Time Zone:

(Circle One): a. Eastern
b. Central
c. Mountain
d. Pacific
e. Other _____

(Circle One): a. Daylight Saving
b. Standard

4. Where did you see the object?

[REDACTED]
Nearest Postal Address

OHIO
City or Town

State or Country

Additional remarks: _____

5. How long was object in sight?

Hours

Minutes

Seconds

5.1 How was time in sight determined?

LONG TIME

a. Certain
b. Fairly certain

c. Not very sure
d. Just a guess

6. What was the condition of the sky?

DAY

a. Bright
b. Cloudy

NIGHT

a. Bright
b. Cloudy

7. IF you saw the object during DAYLIGHT, where was the SUN located as you looked at the object?

(Circle One): a. In front of you
b. In back of you
c. To your right

d. To your left
e. Overhead
f. Don't remember

8. IF you saw the object at NIGHT, what did you notice concerning the STARS and MOON?

8.1 STARS (Circle One):

- a. None
- b. A few
- c. Many
- d. Don't remember

8.2 MOON (Circle One):

- a. Bright moonlight
- b. Dull moonlight
- c. No moonlight — pitch dark
- d. Don't remember

9. The object appeared:

(Circle One): a. As a light b. Shiny c. Dark d. Don't remember

10. If it appeared as a light, was it brighter than the brightest stars?

YES —

11. Did the object:

(Circle One for each question)

- | | | | |
|---|------------|-----------|------------|
| a. Appear to stand still at any time? | <u>Yes</u> | No | Don't Know |
| b. Suddenly speed up and rush away at any time? | <u>Yes</u> | No | Don't Know |
| c. Break up into parts or explode? | <u>Yes</u> | <u>No</u> | Don't Know |
| d. Give off smoke? | <u>Yes</u> | <u>No</u> | Don't Know |
| e. Change brightness? | <u>Yes</u> | No | Don't Know |
| f. Change shape? | <u>Yes</u> | No | Don't Know |
| g. Flash or flicker? | <u>Yes</u> | No | Don't Know |
| h. Disappear and reappear? | <u>Yes</u> | No | Don't Know |

12. Did the object move behind something at any time, particularly a cloud?

(Circle One): Yes No Don't Know. IF you answered YES, then tell what it moved behind: _____

13. Did the object move in front of something at any time, particularly a cloud?

(Circle One): Yes No Don't Know. IF you answered YES, then tell what in front of: STARS

14. Did the object appear: (Circle One): a. Solid b. Transparent c. Vapor d. Don't Know

15. Did you observe the object through any of the following?

- | | | | | | |
|-----------------|-----|----|---------------|------------|----|
| a. Eyeglasses | Yes | No | e. Binoculars | Yes | No |
| b. Sun glasses | Yes | No | f. Telescope | Yes | No |
| c. Windshield | Yes | No | g. Theodolite | <u>Yes</u> | No |
| d. Window glass | Yes | No | h. Other | _____ | |

16. Tell in a few words the following things about the object.

a. Sound None

b. Color RED - YELLOW - ORANGE

17. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

LIKE A LIGHT -

18. The edges of the object were:

(Circle One): a. Fuzzy or blurred

b. Like a bright star

c. Sharply outlined

d. Don't remember

e. Other _____

19. IF there was MORE THAN ONE object, then how many were there? _____

Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

MORE THAN ONE OBJECT.

20. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

EAST OR WEST -

21. How large did the object appear to you as compared to an object with which you are familiar?

SIX INCHES AT THEIR DISTANCE.

22. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

MUCH LARGER

23. Did the object disappear while you were watching it? If so, how?

LIKE A LIGHT GOING OUT

24. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

25. Where were you located when you saw the object?
(Circle One):

- a. Inside a building
- b. In a car
- c. Outdoors
- d. In an airplane (type)
- e. At sea
- f. Other

AND

26. Were you (Circle One)

- a. In the business section of a city?
- b. In the residential section of a city?
- c. In open countryside?
- d. Near an airfield?
- e. Flying over a city?
- f. Flying over open country?
- g. Other

27. What were you doing at the time you saw the object, and how did you happen to notice it?

28. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

28.1 What direction were you moving? (Circle One)

- | | | | |
|--------------|--------------|--------------|--------------|
| a. North | c. East | e. South | g. West |
| b. Northeast | d. Southeast | f. Southwest | h. Northwest |

28.2 How fast were you moving? _____ miles per hour.

28.3 Did you stop at any time while you were looking at the object?

(Circle One) Yes No

29. What direction were you looking when you first saw the object? (Circle One)

- | | | | |
|--------------|--------------|--------------|--------------|
| a. North | c. East | e. South | g. West |
| b. Northeast | d. Southeast | f. Southwest | h. Northwest |
| | | | i. Overhead |

30. What direction were you looking when you last saw the object? (Circle One)

- | | | | |
|--------------|--------------|--------------|--------------|
| a. North | c. East | e. South | g. West |
| b. Northeast | d. Southeast | f. Southwest | h. Northwest |
| | | | i. Overhead |

31. If you are familiar with bearing terms (angular direction), try to estimate the number of degrees the object was from true North (thru east) and also the number of degrees it was upward from the horizon (elevation).

31.1 When it first appeared:

- a. From true North 0° degrees.
- b. From horizon 0-10° degrees.

31.2 When it disappeared:

- a. From true North 45° degrees.
- b. From horizon _____ degrees.

UP ALL NIGHT

32. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it.

33. In the following larger sketch place an "A" at the position the object was when you *first* saw it, and a "B" of its position when you *last* saw it. Refer to smaller sketch as an example of how to complete the larger sketch.

34. What were the weather conditions at the time you saw the object?

CLOUDS (Circle One)

- a. Clear sky
- b. Hazy
- c. Scattered clouds
- d. Thick or heavy clouds

WEATHER (Circle One)

- a. Dry
- b. Fog, mist, or light rain
- c. Moderate or heavy rain
- d. Snow
- e. Don't remember

Always
Clear —

35. When and to whom did you report that you had seen the object?

Day

Month

Year

36. Was anyone else with you at the time you saw the object?

(Circle One) Yes No

36.1 IF you answered YES, did they see the object too?

(Circle One) Yes No

36.2 Please list their names and addresses:

Rev.

37. Was this the first time that you had seen an object or objects like this?

(Circle One) Yes No

37.1 IF you answered NO, then when, where, and under what circumstances did you see other ones?

38. In your opinion what do you think the object was and what might have caused it?

Possible from Camp Peary

39. Do you think you can estimate the speed of the object?

(Circle One) Yes No

IF you answered YES, then what speed would you estimate? _____

40. Do you think you can estimate how far away from you the object was?

(Circle One) Yes No

IF you answered YES, then how far away would you say it was? _____

41. Please give the following information about yourself:

NAME _____
Last Name First Name Middle Name

ADDRESS _____
Street City Zone State

TELEPHONE NUMBER _____

Age _____ Sex _____

Indicate any additional information about yourself, including any education, which might be pertinent.

42. Date you completed this questionnaire:

Day Month Year

Oct. 25, 1960.

Dear Sirs -

Through watching Echo I this summer, I became quite interested in our firmament. I went out every evening, not only to see Echo I, but to locate the different planets and constellations.

While watching the sky, many planes go over, but we have seen some things that are not planes and act mighty queer. We started to see these objects - possibly the latter part of July, but I know we have seen them every night in Aug., Sept. & Oct.

I have hesitated to say anything as usually anyone reporting an oddity is branded a crackpot. So I have been waiting for someone else to be called the crackpot. I had read an article in paper that said they wanted people to report anything strange they seen.

The objects we have seen are all one color, either all red, or all orange, or all a bright yellow - like a star. They flash off and on - that is the appearance coming toward you or going away from you, but once they are in view, directly to see the whole object - they don't flash and are a solid red, orange or yellow. There are no green lights on them at all, and there is no planes, and there is absolutely no noise. Most of the time, they move very slow,

appear to be gliding. They don't hold a straight course like an airplane. They move up and down and circle around, have even seen them going one way and they circle and start in another direction. At times they stand perfectly still then suddenly they dart off.

I had finally dismissed the idea from my mind, by telling myself, it was probably a patrol of the St. Lawrence Seaway. It has always been in the north and they travel from east to west or west to east. Have even passed each other and different colored ones. You can watch them for 15 to 20 minutes out of sight.

Last night Oct. 24, at about 8:45 P.M. my son was sitting on doorstep in our living room, which has a large picture window facing east and he called my attention to something red coming toward us. We went out on porch, heard the noise and soon a plane went directly over ^{our} house. I stood there watching the stars as there are so many big ones now in the east. I seen a large red one, blinking, and was about to go in house, when this supposedly star, took off and headed east, then south, circled and headed north, then east again. It was not flashing when standing still, only a twinkling or blinking, then as soon as it darted off it started flashing. There was absolutely no noise.

7 km at 11:30 P.M. I turned out the lights to go to bed and stood at picture window looking at stars. Again a huge red star in the north, suddenly took off and headed east, watched it out of sight and then spotted an orange one in the southeast moving east.

As long as they stayed in the north I thought of the St. Lawrence Seaway Patrol, but they are too much off their course for that.

I do care about this good old United States and this good old earth. I think most of us just take everything for granted - a human failing. Just hope you don't consider me a crackpot, though I will confess, I felt like one at first. Then my husband, son & daughters seen it too and seeing it every night I can't be a phenomenon.

I do hope you can set my mind at ease. Possibly, if it is a secret you can't divulge, could you possibly just write and say "OK" no explanation will be needed and I can stop star gazing, as it is good pneumonia time now. Also, hard on the eyes, - we have seen all this with the naked eye - no binoculars or telescope - can't see one. Please write and say "OK".

Yours truly,

Mrs. ~~_____~~

Pepper, Ohio.

Oct 25 -
6:30 P.M. in n. th - 1 red going E - 1 red going W, passed each other, flashing
6:50 P.M. in west - 1 yellow headed north from south,
no flash - solid mass.
7:03 P.M. 1 red from n. w heading east - 2 red heading east
7:10 P.M. 1 yellow from east heading west.
8:00 P.M. yellow headed west from east.
8:30 P.M. orange going east, red going west, flashed
passed but far apart. flashed

///

Civil Defense Hdqtrs.
Area 2
Battle Creek, Mich.

Nov. 1, 1960

Dear Sirs.

One thing I didn't report to you was a supposed star that acted queer and I seen it most of summer and all fall - even now. I don't recall the date that I first seen it acting up - but that night I called or tried to call a Mr. ~~_____~~ who was a teacher at Heidelberg college. Unable to call him, as he had left for New Jersey for a new teaching job I called Rev. ~~_____~~ of Ft. Seneca. He brought his German class he was teaching for the summer along and his telescope. Mr. ~~_____~~ and ~~_____~~ (all at college now) and I all watched this object with naked eye and it had red, green and bluish and yellow & orange lights on it. I had seen it most of summer and said it was moving but my family said I was imagining things. They would never stand long enough to see its capers. But that night we retired early; I was last to go to bed. I looked out at sky thinking I would catch a glimpse of ~~_____~~ cho I - stood for a moment watching and a white, milky looking object, shape of a cone whizzed past from west going east. 

That attracted my attention to this other object which was going in a counter clock wise movement and going toward east but gradually getting higher. I knew ~~my~~ would have access to the observatory at college that was why I called him. It was about 10 PM that evening when I first seen this object. I couldn't believe my own eyes, so knelt on floor and braced body against wall and chin on window sill. Got my husband out of bed falling, he thought it might go in a counter clockwise movement, I tried to call our Daily Paper - The Advertiser Tribune - no answer - you can't get the sheriff - nobody - I do recall it was in Aug. as it was only several weeks till school would start. Also that we turned on TV to get the 11 P.M. news, Warren Gutherie came on and never said anything, then Toledo 13 came on with local news and his last words were - "If you are watching in the east about 12 or 1 o'clock you will see the ten story balloon that Sohis put up tonight." So after that I dismissed it from my mind as the Sohis balloon, nothing was ever said in our paper about it, do they take it down every night then send it back up every night? Is it still in existence, it comes up in N.E.

3.

gradually going clockwise and counter clockwise until it works east and high, I called the ^{Lincoln} County Civil Defense Director Sun. nite ^{Oct. 30,} to see the crazy object. Finally got see my family out too and they were amazed. I had called a young fellow up Fri. nite Oct. 28, to have him bring his binoculars over. We watched it from 6:30 P.M. to 8:30 P.M. Then fog got so thick clear up into sky, you could only see occasionally. The ~~Lincoln~~ County Civil Defense Director - Mr. M. ~~_____~~ came out Sun. nite and brought binoculars - he viewed it and said it was no star and it was not a capsule balloon - such as Sahis has. The air was full of planes and this crazy object would start toward the planes then turn and head back again.

Oct. 31.
I wasn't watching the sky last nite as it was quite cloudy. I happened to look out about 9 PM and sky was fairly clear and moon and stars were out. I looked out a north window and low and behold - there was this crazy thing right straight north of our house - it was circling around then suddenly headed west for a ways then turned and came east. Watched it quite awhile and it suddenly disappeared. I tried to contact Mr. ~~_____~~ again. But he was gone. When he was here Sun. nite he called Toledo

4 from here and they looked at it, said they had a restricted view, but could see it spiraling. Mr. ~~XXXX~~ wanted them to send the fighter squadron but they said everything was locked up tight. I suppose because of that plane crash at airport last nite.

But last nite the air was full of planes earlier and I thought maybe that was the reason this object had changed position. It has always stayed on east side of road - near the road and low when it first makes its appearance - then gradually spiral until it gets high in east - but during spiraling it will veer a straight course at times to either, N., S., E., or W. Last nite I seen one of those red-blinking or flashing objects go over top of it, then only went a short ways and turned back towards it, made a flash or two and it was never seen again. It looked like an orange and also a red one came off of it.

While we were standing there talking I spotted a red light - appeared to be in a tree top, soon we saw it move and it was blinking and it glowed an orangish red just like the one that was close to our house. The nite we stood on porch and watched the plane go over. I wrote you about that one. At first we thought it was Mars but a planet don't blink or move.

5.
in clock wise and counter of course.
motions, we seen it from the side as it headed
south and north and as it turned you could
see a small white light on it - such as
an auto tail light with red glass broken
out or as an electric light bulb. While we
were watching this my son spotted another
one just down north of this one over tree
tops of woods. The other one was straight east
of our house. We watched them both and
suddenly the first one east of house just
disappeared - it must land or turn off light.
They can set perfectly still then suddenly
start their dives - they climb up - descend
down also. Finally the second one which
was the same color orange-red disappeared.
All three of these crazy objects we watched
in an 1 hrs time.

Makes you feel like you are ready for
the cage. But seeing is believing and if I'm
headed for the nut hatch, I'm going to have lots
of company. They say there is an explanation for
everything & they say if you investigate a
noise, sometimes it is nothing more than a mere
twig or bush scratching your house or window.

6

Believe me if I could fly a plane I'll bet I'd have an answer, also some more pertinent information and some pictures.

Mr. ~~XXXXXX~~ said they were making a flying saucer in Canada - but he said a, not dozens of them. I didn't know of it until he told me. Also told me our radar is not perfected and planes can get through. As I said before I thought it was some kind of government patrol of St. Lawrence Seaway which we would see from the Lake going to Toledo. But most of these things cut off to the N.W. before they get to Toledo - my impression.

If these crazy things are not our governments property, then they are from foreign lands or the sky is just about ready to blow its top, if they turn into a comet. "Would you please write and say just 'oh' or 'It's none of your business' if you know about it and can't give an explanation because it being a govt. secret. If you don't reply I'm going to notify Washington D.C. as I think they should know about this."

I am sorry I couldn't type this as my daughter in college has our typewriter. Believe me I do know how to spell and know enough to make paragraphs. But am writing in a hurry and had to write you a catalogue in order to explain to my satisfaction. If I could talk to you or if you could see these things - then you would know - or have you seen them? Also - how many other mits have reported it? That's about the way I feel - but really I'm not. I'm quite normal, and don't tip the bottle, but it's enough to drive a person to drink. I have worried about it for the fact that I don't want to see our country invaded and stole from us. They might be unfriendly objects instead of friendly. If they are unfriendly they are sure getting an eye full of us and surrounding territory. They are absolutely noiseless - unless distance would be the cause and they don't look that far away. I

8,

Can hear jets from all direction when
you can't see them and also when you
can see them or at least the stream
they leave behind in the sky. There is
a regular airplane route over ^{warehouse} and I mean
over, literally, going N.W. to S.E. and vice versa.
There used to be one on north side of house
going west - other side of house going east.
But since this other route started, the
direct east-west route stopped. What gets
me is the way the crazy things act when
an airplane is in area - they are not
for the birds. You don't see them in the
daytime, anywhere from 6:30 P.M. on.
Anxiously awaiting that "OK" or "none of
your business!" Then maybe my nerves
will quiet down.

Sincerely Yours

Mrs. 

P.S. Would you please send me the Washington
D.C. address I can communicate with or
should I call on F.B.I.

Office of Civil and Defense Mobilization
Washington 25, D. C.

Nov. 3, 1960

Dear Sirs -

Enclosed you will find a letter I was going to send to Battle Creek, Mich. Hesitated to send it until I received word from them on my first letter. Also, because anyone reading the letter, unless they actually seen these objects, would think, to use an expression - "She's off her rocker". But if I am, there are a good deal more that have seen it and are off their rocker too.

I tried telling myself at first that perhaps the one object was a magnetic star, then decided it was the Ohio Ballon, but after seeing it go after airplanes - that scared me. I wondered too if it could be a radar station, as it goes after or toward the planes, then recedes as if it responds to a message. See what imagination can do!

I think there is a probable explanation to all of these objects - I surely hope so. I have no way of knowing or judging distance in the sky and realize that distance might give you a false impression. But a good many of us have seen it with the naked eye, and that is the way I have always seen all these things as we don't own binoculars or telescope.

I wish I knew someone in our community that had a knowledge of all the stars. I never seen any stars carry on like this before.

If you know about these objects and if
because of our country's national security you
cannot send an explanation, could you at least
write and say "ok" or "mind your own business".
It does worry me when I think it could be
a menace to our United States.

My husband says that some people are watching
the skies all the time and you would know about it.
But if everybody was like me they wouldn't tell
anyone - for fear of being branded a crack-pot. The
only way I got up nerve enough to write, was after
I persuaded a few others to stand still long
enough to see it. Because at times these objects will
set perfectly still - then suddenly start their dither.
Another reason I quit off writing or notifying anyone,
as my husband and son both seemed to think there
is a logical explanation, and that it is part of
our national security. My son is only 13 but quite
interested in Science and he gives me a scientific
explanation. I hope they are both right.

I guess I'll just have to find a job to keep me
busy so I won't have time to aim my eyes at
the skies.

So hope you can send - OK.

Sincerely

M/M

for COMMENTS

Dear Sirs -

The additional information enclosed I held back, waiting for word from you.

Yesterday, Thurs. Nov. 10, I received a phone call supposed to be from Wright Patterson Air Force Base in Dayton. Later in the day, "a bell rang"; the thought came to me - was it really from Dayton. I called the Long Distance Operator at Tiffin and she said it was impossible to check where the call came from. I was questioned as to size, shape, color, direction and distance. There was not much I could tell them, as I have no way of knowing distance in the sky. I think a scientist could figure the distance if he knew the true size of a given object. Like my son told me how many million of our earths could be placed inside the sun, that is scientific data.

I also mentioned Rev. ~~James Earl Ray~~ at Ft. Seneca. I heard he started out studying to be a scientist but switched and became a minister. The only thing Mr. ~~Ray~~ said was what I referred to in enclosed letter as the Solar Balloon.

ATK 7

I got in touch with him yesterday after the call from Dayton and told him he may be questioned. He said that he knew the object we saw with naked eye and also with his telescope was not a star; and had settled his mind to the idea it was the Soho Balloon, after I heard the news report. When I first sighted it, I dismissed it with the idea that it was a magnetic star, then later the Soho Balloon, now I even think it may be a radar station - some imagination! It is fascinating to watch - goes toward the planes, then like there is a signal it recedes. First sighted this object in Aug. and it was the only one, but have watched 4 of them in their capers all at the same time, but they are in different locations. Sometimes they act like a normal star should, then suddenly start their didos. If they are stars, they are wild ones as they desert their constellations. As you can watch a whole constellation, such as the big dipper, and the whole thing will gradually be farther north and from here it works to the north and east.

I never knew so many balloons were released in one day or at any time. Having never seen one, it could be possible that the orange-red object with a tiny white light, could be what your letter referred to, as running lights on a balloon. If they turn clockwise, counter clockwise, ascend and descend, blink or flash at times - that's it.

I was told the other day that the proving grounds at Ft. Clinton may be responsible for these objects as they do a lot of testing for the government.

Also early in the spring I seen a grey station wagon with white lettering on that said U. S. Government, State of Mich. on our road County Rd. ~~It stopped in front of house,~~ It stopped in front of house, 2 men got out, looked at telephone pole and wires, then continued down road north to first road, left one man out, the other came back almost to our house, stopped, took out a long-shining rod, walked over to a phone pole and I would say measured height from ground. He came up to our drive, turned around - headed north again and parked on side road. The two men took a ladder and other apparatus back into the woods. I called the phone Co. and they ^{knew} nothing. I called a neighbor man and he knew nothing.

but he seen them. Different people seen them
even at Ft. Seneca - were around for several days in
this vicinity. One person told me that they were
measuring at Ft. Seneca also, and they thought
it was for the topography, as we had quite
a flood in the spring of '54. We are located along
the Sandusky river on the east side, and through
this ice jam and flood, the river cut another
course, ruining farm land on the west side of river.
I don't know why they would call on the State of
Mich., we have our own army and civil engineers,
in Ohio. I magnation and "maybe's" taking over
again. But wonder if they have anything to
do with all this - most of it has come from
the direction of the woods - might just happen
that way - but I don't have the "intestinal fortitude"
to investigate.

We have never seen any of these objects
before. My husband is very level headed and he
said right from the first it is government business,
and nothing to be alarmed about, and he issued
me orders from our Hdqts. to mind my own business,
and keep my eyes out of sky. He says you have
capable people hired for that job and they know all
about it. Hope they do. Sorry I bothered you.
I call it "Operation Paranoia".

Sincerely
Mrs. ~~XXXXXXXXXX~~
