10. BRIEF SUMMARY OF SIGHTING

Object like crystal ball about 3 ft in diameter flying over airstrip at about 30 ft high for about 1500 ft then vertical into sky at very fast speed.

11. COMMENTS

The object viewed by these witnesses has characteristics which suggest a mirage. However, in the absence of such data as weather, direction, how sizes and distances were determined, it is impossible to reach a valid conclusion. This case is classed as insufficient data.
