

PROJECT 10073 RECORD CARD

1. DATE 26 Dec 60 to 9 Jan 61		2. LOCATION E of Buffalo, New York		12. CONCLUSIONS ☐ Was Balloon ☐ Probably Balloon ☐ Possibly Balloon ☐ Was Aircraft ☐ Probably Aircraft ☐ Possibly Aircraft ☒ Was Astronomical Venus ☐ Probably Astronomical ☐ Possibly Astronomical ☐ Other _____ ☐ Insufficient Data for Evaluation ☐ Unknown	
3. DATE-TIME GROUP Local 1800 GMT 26/2400Z Dec 60		4. TYPE OF OBSERVATION ☒ Ground-Visual ☐ Ground-Radar ☒ Air-Visual ☐ Air-Intercept Radar			
5. PHOTOS ☒ Yes ☐ No		6. SOURCE Military and Civilian			
7. LENGTH OF OBSERVATION 2-3 hrs each night varied		8. NUMBER OF OBJECTS one		9. COURSE rotating to SW	
10. BRIEF SUMMARY OF SIGHTING Round, white to blue-white, size of pea at arms length. Blinking red light on each side of object. Turned around in circular motion, from left to right. Moved gradually to the S, then went to the W as it disappeared.				11. COMMENTS Investigating officer and other personnel visited place of sighting and photographed the object. Also used transits to track object. Photos reported to show nothing but track of Venus and surrounding stars. Check indicates that Venus is of a mag -3.8 during time these sightings were made--so bright it appears much closer than it actually is. Observations ceased at 2000 EST, the time when Venus set. It is concluded that the object observed was probably the planet Venus.	

UFO ANALYSIS SHEET

Location East of Buffalo, N.Y.

Date (Local) 26 Dec 60 to 9 Jan 61 Hour (Local) 1800

Hour (Z Time Group) 2400Z 26 Dec 60

Satellite: (Det 5 ATIC, Ext 3279) -----

Astronomical Phenomena (Meteor, Comet, Planet, etc) Planet Venus

Radar Analysis (AFCIN-4E1) N/A

Natural Phenomena (Ball Lightning, etc) -----

Aircraft, Balloons, Airships, etc -----

Other -----

Evaluation of Source Reliability Prob reliable

Analysis and Conclusions: The investigation officer and other personnel visited the place of sighting several times, and photographed the object. They also used transits to track the object. The photographs was reported to show nothing but the track of the planet Venus and surrounding stars. A check indicates that the planet Venus ~~is~~ was of a magnitude ≈ -3.8 during the time of these sightings, and it so bright that it appears much closer than it actualy is. The observations ceased when the object disappeared at 2000 EST, the time when Venus ~~disappeared~~ SET. It is concluded that the object observed was probably Venus.

THE DURATION OF THE SIGHTING AND THE MOTION
REPORTED FOR THE OBJECT SUPPORTS THIS CONCLUSION. *Reed*

9 Jan 61

TO: AFCIN-4E2, Maj Friend

The following, extracted from 1/Lt Repetti's Report dated 6 Jan 61,
is quoted for your information:

2250 hours, received call from Capt D [REDACTED], 4621st
Support Gp., Niagara Falls Municipal Airport, Niagara Falls, New York
who reported that at his commander's direction he observed and
photographed a UFO that appeared about 37 miles SE of Buffalo,
New York. He and others have observed these phenomena for the
last five or six days and he wanted to know if we (presumably
the Air Force) had anything going on up there that he had no
business getting curious about. He was informed that he
should make his report as directed by his CO and that he would
be contacted regarding his observation. His home phone is:
[REDACTED] and his duty phone is BU 5-6691 ext. 301 or 264.

9 Jan 61

TO: AFCIN-4E2, Maj Friend

The following, extracted from CWO Tenold's Report dated 7 Jan 61,
is quoted for your information:

Reference Lt Repetti's Report. Another phone call received from Capt Newbold, Niagara Falls Municipal Airport reference UFO Report from that Station. Wanted to know if we (ATIC) had done anything about his Report. I told him as far as I knew "No". He stated he was going up again tonight to photograph this object. Object is seen nightly SE of Buffalo near the Warsaw area off Alternate Highway 20. After tonight's photographs their station will make an official UFO Report. Said this object has been seen as long ago as around Christmas time. I was unable to contact Maj Friend to see if this information had ever reached his office. I told Capt Newbold (phone Nr on Repetti's Report) that our UFO Office would most likely contact his Base regarding his observations.

ATTN OF: CAS-G

SUBJECT: UFO Photographs

to: ATIC (AFCIN-4E4g)
Wright Patterson AFB
Ohio

Attached are the photographs described in the UFO Report submitted from this station, 7 January 1961. Subject of the attached photographs was later determined to be the planet Venus as seen through a haze (Reference UFO Report from this station, dated 10 Jan 61). The camera was aimed and focused upon the planet and the photographs were taken at approximately 1930 hours. No artificial light was in the area, with the exception of a flashlight being used by the photographer to assist him in making proper lens and shutter settings. The source of the objects appearing in the photos is undetermined, unless it resulted from improper film exposure or mechanical failure of the camera. The sky was clear with the exception of a light haze and some broken clouds at approximately 10,000 feet. Such clouds did not inhibit the viewing of the object. The ground was snow covered, and the temperature was approximately 10° Fahrenheit above zero.
