10. BRIEF SUMMARY OF SIGHTING Round, blue-white object size of basketball. No sound heard. Appeared to break-up into several small chunks of blue-white light just prior to disappearing. No estimate of elevation. Light first appeared directly over auto and was first seen at an azimuth of 210° going away from observer. Disappeared at an azimuth of 210°; again no estimate of elevation. Flew in a straight line on 210° heading disappearing before it reached horizon.				11. COMMENTS Several reports received this month from several parts of the country, xxx all very similar to this one. The earth is passing through several meteor showers this month. Object observed by these witnesses was probably a meteor that burned out before reaching the earth's surface.
