10. BRIEF SUMMARY OF SIGHTING
Object traveled at changing speeds to the South. Second object followed the first with about 1 1/2 mile separation. Objects changed color from bright white to cherry red, then dimmed and returned to bright white. Finally dimmed and disappeared completely, still heading south. Accompanied by sound like a whistle.

11. COMMENTS
Information reported by the young witness is insufficient in that it is difficult to determine positions of the objects in relation to anything other than that they moved south. The objects were possibly a/c however the data is too limited to confirm this. Witness has made numerous reports to FTD of strange lights and is an avid believer that any unexplained (to him) light is a ship from outer space.
