| 10. BRIEF SUMMARY OF SIGHTING Round, white objt size of second magnitude star. Traveled at high rate of speed across sky. At sighting 60° bearing 080. At disappearance 15° bearing 020. Heading 000. Lost in clouds on horizon. |                                                                                                                                                                                                       | 11. COMMENTS Speed of objt was too fast for satellite in orbit and too slow for meteor. It is possible that objt was light on an a/c fm one of several countries in the area. However, due to lack of pertinent info a valid conclusion cannot be made. |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
