10. BRIEF SUMMARY OF SIGHTING Round, Size of baseball, blue in color. Had tail 8-10' long red and yellow. Descended to W losing altitude very fast. Ended in blue glow.		11. COMMENTS Description is characteristic of fireball. Duration is longer than usual for meteor; however, some meteors have been known to be in view longer than 15 sec. Two witnesses reportedly saw an objt at about the same time, reporting a variance of 6 min. However, considering probability of errors in their time pieces, they probably saw same objt. This report is categorized as probably fireball.
