COMMANDER
Wright Patterson AFB, Ohio

Dear Sir:

May I pardon this intrusion upon your time, as goodness knows, you are probably a very busy man. However, last nite I, my wife and two friends witnessed a phenomenon which I cannot explain, I called the OD at the base, he had no explanation for it, and suggested I write to you, to which I am anxiously waiting an answer. May I also state that I spent 4 yrs. in the Naval Air Corp, and was the first to hold tongue in cheek, at reading of some sightings reported by different people in different parts of the country. So Sir, please do not hold this letter in the light of a crank, or prankish letter.

At 10:50 sharp last nite, after viewing our Echo Satellite, and were in the back yard talking, my wife noticed a red lite coming from a southerly direction. I immediately explained that it probably was an aircraft making its way into the traffic pattern. However, it proceeded straight across the sky in a Northern direction, and about 3/4 the way across the sky, it veered sharply eastward, without changing speed, without any de-acceleration, and what made this item even more strange, was there was absolutely no sound. If it was as high as the Echo satellite, then it must have been going at least 30,000 to 40,000 miles per hr, as it moved swiftly across the sky. If it was a low flying object, why was it noiseless. If it was in the realm of a U-2 plane, which, I understand, has terrific gliding powers, and can cut its engines, and glide for tremendous distances, then why was the very bright light, red in color, shining at the same density, the whole path. I could understand if the red light was blinking off and on as usual, or I could understand if we saw other navigational lights, however, this was not the case, the light was of the same intensity the whole flight. I also assumed that even if it were a plane of the U-2 type, that some noise would be heard, as we would have probably have heard the tremendous air pressures hitting the skin, if the plane was low. If it were at an altitude of say 60,000 ft., then the light that shone would have been of tremendous size, as it shone very brightly. And with all of this, how can any power-plant as we know it, change direction, without any decrease in speed, at a sharp right angle. So to recap, it moved in a South to North direction, directly overhead, veered sharply to the East, The red light did not change in density, there was absolutely no sound at all. It moved across the sky approximately 3 to 4 times as fast as the Echo satellite.

I did not intend to over-whelm you with a lengthy letter, but would appreciate an answer when you have time.

Very truly Yours,

Dayton 29, Ohio

The following, extracted from 1/Lt Shannon's Report dated 24 Nov 61, is quoted for your information:

2400 hours, received call from a mother and son in Englewood, Ohio regarding a UFO. Described it as object brighter than a star appearing in the Southeast. The boy said it changes colors and is sometimes silver or green or red or blue. They both said it will appear to be still and then move quickly and stop again. Sky was described as mostly overcast. OD suggested they might be seeing a large searchlight but they did not know if it was or was not. OD started preparing Form 164. Party reported that a previous report of same object was submitted to FTD between 25 Aug and 1 Sep. Party hung up telephone before giving complete report or name.

10. BRIEF SUMMARY OF SIGHTING Bright light, like a star. Disappeared by fading out. Changed course.				11. COMMENTS Most logical conclusion as to identity of objt is that it was a high-flying a/c. Jet a/c have white lights under fuselage which is only 1 evident when the a/c are at high altitudes. Wind direction and altitude can be cause for absence of sound. Due to changing angle of observation and increasing distance, light could appear to snap out. Probably a/c.
